Bioremediation of Textile dyes: Microbial and Phyto remediation
Prof. S. P. Govindwar and Prof. J. P. Jadhav

Target: Effluent of textile industries
✓ Class of Dyes studies: 05 (Azo; Disperse; VAT; Direct & Reactive dyes)
✓ Bacterial Species Screened: 13
✓ Actinomycets studied: 1
✓ Fugal isolates used: 4 species
✓ Degradation using microbial consortium: 03

Publications: 125
I.F. range: 1 – 5
A Project for wet land development of textile waste water treatment: A DBT, New Delhi Supported Program
