C) 20%
D) 40%
37. In the past month one of your employees has shown a major decline in sales performance. Although the decline has been ongoing for a couple of months, it has been particularly steep during the past two weeks. In addition, she has started coming in late and seems very frustrated with her work. Her behaviour is influencing the atmosphere in the office as she is a popular employee and has been working for the company for the past two years. What would you do and why?

Choose the WORST options.

- A) You meet with the employee and explain that her negative behaviour is affecting not only her performance but that of the entire office. You express a sincere desire to help her during her rough patch on condition that she cooperate with you and improve her attitude.
- B) You feel that since she is a very popular employee it is crucial that she be replaced temporarily or else office performance will suffer. You assign

her to back office tasks for the time being and promise her that once her performance improves, you will re-instate her in her former position.

- C) You call a staff meeting to talk about the negative atmosphere in the office. You single out the problematic employee and discuss her contribution to this atmosphere in the hope that her behaviour will improve.
- D) You decide to let it blow over. She has been a consistently good employee until recently and you feel you need to "cut her some slack". Part of your job is to be sensitive to your employees' needs when necessary

Directions for question no 38 to 42: Read the following passage carefully and answer the questions given beside.

Cancer drugs need to be powerfully toxic to kill tumor cells. But they also can kill healthy cells, sometimes with brutal side effects. Now, scientists have designed a way to seal cancer drugs inside tiny capsules so the drugs won't harm the healthy cells while traveling through the bloodstream. They hold that medicine securely until they reach a tumor and a remote control "switch" finally triggers the drug's release.

Smaller than bacteria, the capsules are called nanoparticles because their size is measured in nanometers. A magnetic field is the invisible force generated by a magnet. Researchers use a magnetic field to work as that remote control switch. Focusing that field on the cancer site ensures that the medicine is released only where it's needed.

The nanoparticles don't seek tumors out. They do, however, tend to collect at tumor sites. Tumors tend to grow so fast that the blood vessels inside them can't keep up. This causes holes to form in the blood vessels. For a nano-package carrying the medicine, those leaky spots become a doorway from the bloodstream into the tumor. The nanoparticles slip in through those leaks, then accumulate in the tumor. Nanoparticles also can pile up in unwanted places. One such unhelpful collection point is the liver. This organ acts as a filter, snagging poisons out of the blood. It will also net some nanoparticles. Those caught in the liver could damage that organ if they shed too much of an anti-cancer drug.

For many years, researchers have studied how to make nanoparticles that won't drop their drug cargo at such unwanted sites. Sometimes they relied on a chemical trait of the tumor or the enzymes it produces to unlock the particles. But not all cancers have the same chemistry. So the medicine might still leak out to poison cells outside the tumor. The new innovation by Rinaldi's team is the creation of a nanoparticle that won't release its medicine anywhere until it gets very warm. And that warming occurs when the particle is exposed to a magnetic field.

38. Which of the following describes the correct meaning of the phrase "pile up" in the context of the passage?
- A) Collision
B) Accumulate
C) Large
D) None of these
39. Which of the following is a synonym of "release" in the context of the passage?
- A) Commute
B) Clemency
C) Parole
D) Discharge
40. Which of the following is an antonym of "accumulate" in the context of the passage?
- A) Heed
B) Break
C) Disperse
D) Accrue
41. Why blood vessels cannot hold tumor?
- A) Tumors needs open space to grow so they move out of the blood vessels.
B) Tumors like to form in liver so they move out of blood vessels.
C) Tumors grow very fast so that they move beyond the blood vessels.
D) None of the above

89. You are a department manager and you have recently thought of a new procedure that you believe would improve the work process. Some of the employees in your department agree with the change and some do not. One of your employees openly criticises the idea to your director. What would you do and why? Choose ONE option.
- A) You decide not to respond to the critics in order to avoid unnecessary conflict.
 - B) You reprimand the employee for going over your head to the director and work to promote your idea with even more enthusiasm.
 - C) You meet the employee for a talk and explain that bypassing your authority is unacceptable.
 - D) Employees' trust in their manager is important so you decide to implement only some of the changes to keep my employees satisfied.
90. At a marketing meeting with your supervisor and the senior marketing manager you find yourself in the midst of a conflict between them. You know that the two do not get along professionally and that they are in constant disagreement. They are now arguing about strategies for a new campaign, and are asking you to pick a side.

What would you do and why? Choose ONE option.

- A) You accept the idea of the senior marketing manager. Since she is more senior she has more influence on your status in the company and therefore it is politically wiser to support her.
- B) You accept the idea of your supervisor. Since he is directly above you, he has more influence on your daily routine in the company and therefore it is politically wiser to support him.
- C) You weigh up the advantages and disadvantages of each side and decide accordingly without getting involved in their personal conflict.

D) You believe that getting involved in this dispute would be detrimental to you as both sides are superior to you. Therefore, you refuse to pick a side saying that both strategies are equally successful.

91. You have been working as a salesperson for the past year and have consistently achieved great sales numbers. Due to personal reasons, you have recently been unfocused at work and as a result your work performance has declined. Additionally, due to changes in the market, the sales figures of your team have decreased as well. Your director does not seem to be taking the changes in the market into account and is blaming your poor performance on poor leadership on your part. What would you do and why? Choose the BEST option.

A) You explain your personal situation to the director and apologize for the decline in the performance of my team. You ask to take a few days off to recuperate.

B) You make a decision to put aside your personal situation and consult other sales directors regarding their ways of coping with a volatile market. You devote yourself entirely to your work.

C) You update the director on the changes in the market and explain that there is nothing that can be done at the moment to improve sales.

D) You scold your team members for their poor performance and set new, more attainable sales targets in line with the changes in the market.
