The Principal/Director of all Affiliated Engineering Colleges/Institutions/Departments Shivaji University, Kolhapur.

Sub-: Regarding revised structure, syllabi & equivalance of the various branches under the Faculty of Engineering & Technology.

Sir/Madam,

With reference to the subject mentioned above, I am directed to inform you that the university authorities have accepted and granted approval to the revised structure, syllabi & equivalence of the following branches under the Faculty of Engineering & Technology.

1	All Branches (except Electrical and	Structure & syllabi of B.E Part I & II
	Electronics, Architecture & Textile)	(Semester VII & VIII)
2	M.Text (TT/TC/Tech/Text)	Structure & Syllabi of M.Text (TT/TC/Tech/Text)
3	Bachelor of Textile (B.Text.)	Structure & Syllabus of B.Text Sem Part II (Semester III & IV)
4	Bachelor of Technology	Structure & Syllabus of B.Tech. First Year (Sem. I & II)
5	Bachelor of Technology	Structure & syllabi of B.Tech. Final Year Mechanical Sem VII & VIII
6	M.Tech.	Structure & Syllabus of M.Tech.Envioronmental,Computer Science, Electronics, Food Technology &Energy Technology
7	Electrical & Electronics Engineering	Exetention has been given to existing Structure & Syllabi of B.E. Electrical & Electronics Engineering.
8	B.Architecture	Structure & Syllabi of First Year B.Architecture Sem. I & II (C.B.C.S.)

The revised syllabi shall be implemented from the academic year 2016-17 (i.e. from July 2016) onwards. A CD containing revised structure, syllabi and equivalance is enclosed herewith. The revised syllabi is also made available on university website www.unishivaji.ac.in. Further, it is hereby informed that the question papers on the pre-revised syllabi shall be set for the examination to be held in October/November 2016 and April/May 2017. These chances are available for repeater students, if any.

You are therefore, requested to bring this to the notice of all students and techers concerned.

Thanking you,

Yours faithfully,

Sd/-

Dy. Registrar

The Principal/Director,

of all Affiliated Engineering Colleges/Institutions/Departments, Shivaji University, Kolhapur.

Sub:- Regarding new syllabus & structure of the M. E. Industrial Engg. (Sem I to IV) under the Faculty of Engineering & Technology.

Sir/Madam,

With reference to the subject mentioned above, I am directed to inform you that the University authorities have accepted and granted approval to new syllabus & structure of the M. E. Industrial Engg. (Sem I to IV) under the Faculty of Engg. & Technology.

The new syllabi shall be implemented from the academic year 2016-17 (i.e. from July 2016) onwards. A soft copy containing new structure, syllabus is enclosed herewith. The syllabus is also made available on University website www.unishivaji.ac.in.

You are therefore, requested to bring this to the notice of all students and teachers concerned.

Thanking you,

Yours faithfully,

Sd/-Dy. Registrar

M. Tech (Computer Science & Technology) - I Semester- I IN 501: Research Methodology

Teaching Scheme: L: 2 T: -- Credits: --

Unit 1 Research Methodology: An Introduction

Objectives of Research, Types of Research, Research Methods and Methodology, Defining a Research Problem, Techniques involved in Defining a Problem **6**

Unit 2 Research Design

Need for Research Design, Features of Good Design, Different Research Designs, Basic Principles of Experimental Designs, Sampling Design, Steps in Sampling Design, Types of Sampling Design, Sampling Fundamentals, Estimation, Sample size Determination, Random sampling **8**

Unit 3 Measurement and Scaling Techniques

Measurement in Research, Measurement Scales, Sources in Error, Techniques of Developing Measurement Tools, Scaling, Meaning of Scale, Scale Construction Techniques 6

Unit 4 Methods of Data Collection and Analysis

Collection of Primary and Secondary Data, Selection of appropriate method, Data Processing Operations, Elements of Analysis, Statistics in Research, Measures of Dispersion, Measures of Skewness, Regression Analysis, Correlation **6**

Unit 5 Techniques of Hypotheses, Parametric or Standard Tests

Basic concepts, Tests for Hypotheses I and II, Important parameters, Limitations of the tests of Hypotheses, Chi-square Test, Comparing Variance, As a non-parameteric Test, Conversion of Chi to Phi, Caution in using Chi-square test **6**

Unit 6 Analysis of Variance and Co-variance

ANOVA, One way ANOVA, Two Way ANOVA, ANOCOVA, Assumptions in ANOCOVA, Multivariate Analysis Technique, Classification of Multivariate Analysis, factor Analysis, R-type Q Type factor Analysis, Path Analysis 6 Interpretation and Report 2

-----F

Hrs

M. Tech (Computer Science & Technology) - I Semester- I CS 511: Mathematical Foundation of Computer Science

Teaching Scheme:L: 4T: -Credits: 4

Unit 1 Introduction

Mathematical notions and terminology of sets, sequences and tuples, functions and relations graphs, strings and languages. Boolean logic properties and representation. Definitions, Theorems and types of proofs, formal proofs, deductive, reduction to definition, proof by construction, contradiction, induction, indirect, automatic, counter-examples 5

Unit 2 State Machines and Grammars

Types of Languages, Types of grammar, recurrence relations, Regular expressions, Finite State Machines, DFA, NFA, Equivalence of DFA & NFA., Kleen's Theorem, pumping Lemma, Applications 5

Push down automata and CFG

PDA, N-PDA, CFG, ambiguous grammar, non ambiguous grammar, CNF, Parsers: Top-down, Bottom-up, applications 5

Unit 3 Turing Machines

Turing machines, variations of TMs, Combining TM's, programming techniques for TMs, Universal Turing Machines, recursive and recursively enumerable languages **6**

Unit 4 Decidability and Reducibility

Decidable languages, decidable problems concerning context-free languages, FA, PDA, Turing Machines, Undecidable problems from language theory, A simple undecidable problem (PCP), The halting problem- Diagonalization method, Reduction problems, mapping reducibility **8**

Unit 5 Computability

Primitive recursive functions, computable functions, primitive recursive functions. Computability examples, the recursion theorem **6**

Unit 6 Computational Complexity

Tractable and intractable problems, growth rates of functions. Time complexity of TM. Tractable decision problems. Theory of Optimization **6**

Department of Technology M. Tech (Computer Science & Technology) - I Semester- I CS 516: Seminar I

Teaching Scheme:P: 2T: -Credits: 2

Seminar-I shall be delivered on one of the advanced topics chosen in consultation with theguide after compiling the information from the latest literature and also internet. The concepts must be clearly understood and presented by the student. All modern methods of presentation should be used by the student. A hard copy of the report (25 to 30 pages A4 size, 12 fonts, Times New Roman, single spacing both side printed, preferably in IEEE format) should be submitted to the Department before delivering the seminar. A PDF copy of the report in soft form must be submitted to the guide along with other details if any.

(Student is expected to submit seminar report in Latex/Microsoft word in the standard format style file available in the department)

Department of Technology M. Tech (Computer Science & Technology) - I Semester- I CS 517: Mathematical Foundation of Computer Science Lab

Teaching Scheme:L: -P: -2Credits: 1

This lab consists of a set of minimum 8-10 Practical problems/ Tutorials / Research Problems and simulations based on the syllabus.

Department of Technology M. Tech (Computer Science & Technology) - I Semester- I CS 518: Design and Analysis of Algorithms Lab

Teaching Scheme:	L: -	T:- P:2	Credits: 1
-------------------------	------	---------	------------

This lab consists of a set of minimum 8-10 Practical problems/ Tutorials / Research Problems and simulations based on the following topics:

- 1. Divide and Conquer method- Binary search, Merge sort Quick sort
- 2. Job sequencing with deadlines
- 3. Minimum cost spanning trees
- 4. All pairs shortest paths
- 5. Optimal binary search trees
- 6. Reliability design
- 7. Lower bound Theory
- 8. NP-Hard and NP- complete problems
- 9. PARAM Algorithms
- 10. Mesh Algorithms
- 11. Hypercube Algorithms

Department of Technology M. Tech (Computer Science & Technology) - I Semester- I CS 519: Artificial Neural Network Lab

 Teaching Scheme:
 L: T: P: - 2
 Credits: 1

This lab consists of a set of minimum 8-10 Practical problems/ Tutorials / Research Problems and simulations based on the following topics:

- 1. Mc-Culloch Pitts Model
- 2. Hopfield model: Associative memory problem
- 3. Optimization problems
- 4. Simple Perceptions
- 5. feed forward n/w,
- 6. Multi-layer Network
- 7. Recurrent Network
- 8. Learning- Supervised Learning and Unsupervised Learning

SHIVAJI UNIVERSITY, KOLHAPUR – Credit System Syllabus w.e.f. 2016 – 17

Department of Technology

M. Tech (Computer Science & Technology) - I Semester- II **CS 521: Parallel Computer Architecture**

Teaching Scheme:	L: 4	P: -	Credits: 4
-------------------------	------	-------------	------------

Unit 1: System Architecture

History /Evolution, Definition: Hardware /Software Architecture Flynn's Classification: SISD, SIMD, MISD, MIMD, Physical Models: PVP, MPP, SMP, Cluster of Workstations (COW). Memory Architectures: Shared, Distributed & Hybrid, UMA, NUMA, CC-NUMA, Performance Metrics & Benchmarks, Architectural Trends based on TOP500 List of Supercomputers.

Unit 2: Advanced Microprocessor Techniques

CISC, RISC, EPIC, Superscalar, Superpipelined, ILP, TLP. Power Wall, Moore's Law redefined, Multicore Technologies Intel's TickTalk Model. Study of State-of-the -Art Processors: Intel/AMD x86 Series, Intel //IBM Itanium// POWER series, Introduction to Graphics Processing Units (GPU: NVIDIA)

Unit 3: System Interconnects

SAN: System Area Networks, Storage Area Networks including InfiniBand, GigaBit Ethernet. Scalable Coherent Interface (SCI) Standard.

Unit 4: Storage

Internal/ External, Disk Storage, Areal Density, Seek Time, Disk Power, Advanced RAID Levels, SATA vs SAS Disks, Network Attached Storage (NAS) and Direct Attached Storage, I/O Performance Benchmarks.

Unit 5: Software Architecture

Parallel Programming Models: Message Passing, Data Parallel, MPI /PVM Typical HPCC Software Stack including Cluster Monitoring Tools e.g. GANGLIA CUDA Programming Environment.

Unit 6: Case Studies

A typical Petaflop System based on Hybrid CPU/GPU Architectures, IBM SP System, C-DAC's latest PARAM System.

M. Tech (Computer Science & Technology) - I Semester- II CS 522: Computer Vision and Image Processing

Teaching Scheme: T: -Credits: 4 L: 4 **P:-**

Unit 1

Hrs Digital Image Fundamentals: - Digital image Representation - Functional Units of an Image processing system. Visual perception – Image Model Image sampling and Quantization – grayscale resolution - pixel relationship - image geometry. Image Transforms - Unitary Transform, Discrete Fourier Transform, Cosine Transform, Sine Transform, Hadamard Transform, Slant and KL Transform. 7

Unit 2

Image Enhancement – Histogram processing – Spatial operations – Image smoothing- Image Sharpening – Color Image Processing methods- Color Image Models 6 Unit 3

Image restoration and compression Degradation Model – Discrete Formulation – Circulant matrices - Constrained and Unconstrained restoration geometric transformations fundamentals - Compression Models - Error Free Compression - Lossy Compression - International Image Compression Standards. 7

Unit 4

Image Analysis and Computer Vision: Spatial feature Extraction - Transform feature -Edge detection-Boundary Representation-Region Representation-Moment Representation-Structure-Shape Features-Texture-Scene Matching and Detection-Image Segmentation-Classification techniques-Morphology-Interpolation. 7

Unit 5

Sensing 3D shape: how the 3rd dimension changes the problem. Stereo 3D description, 3Dmodel, matching, TINA. Direct 3D sensing-structured light, range finders, range image segmentation.6

Unit 6

Emerging IT applications: Recognition of characters, Fingerprints and faces-Image databases.5

Reference Books

- 5. Computer vision-Fairhurst (PHI).

M. Tech (Computer Science & Technology) - I Semester- II CS 523: Computer Security

Teaching Scheme:L: 4T: -P:-Credits: 4

Unit 1 Basic Cryptography and Cipher Techniques

Hrs

Classical crypto system, Stream & block ciphers, introduction to finite fields, DES, AES, RC5, Differential and liner cryptography **8**

Unit 2Asymmetric key cryptography

Introduction to number theory, RSA, key management, Diffi-Hellman key exchange elliptic curve arithmetic, elliptic curve cryptography, Zero knowledge proof systems. 7

Unit3 Authentication

Authentication requirements, Authentication Functions, Message Authentication Codes, Hash Functions, Security of Hash Functions and MACS, Digital Signatures, Authentication Protocols, Digital Signature Standard 6

Unit4 Network Security

Electronic Mail Security - Pretty Good Privacy, S/MIME, IP Security – IP Security Overview, IP Security Architecture, Authentication Header, Encapsulating security Payload 6

Unit 5 Web Security

Considerations, Secure Socket Layer and Transport Layer Security, Secure Electronic Transaction 6

Unit 6 Malicious Logic and System Security

Introduction, computer viruses, worms, Intruders - Intruders, Intruder detection, Password Management, Malicious Software - Viruses and Related Threats, Virus Countermeasures, Firewall - Firewall Design Principles, Trusted systems, recent trends in IP security- case study, legal issues, tools used to detect and prevent attacks **8**

Reference Books:

- 1. "Cryptography and Network Security Principles and Practices", Williams Stallings (LPE).
- 2. "Handbook of Applied Cryptography", Menezes, A. J., P. C. Van Oorschot, and S. A. Vanstone.
- 3. "Applied Cryptography: Protocols & Algorithms", Schneier, Bruce.
- 4. IP security-Case study, tools from appropriate white papers or journal papers from internet

Department of Technology

M. Tech (Computer Science & Technology) - I Semester-II CS 524: Business Intelligence (Elective- III)

Teaching Scheme: T: -**P:** -Credits: 3 L: 3

Unit1 Introducing the Technical Architecture

The value of architecture, Technical Architecture overview, Back room Architecture, Presentation Server Architecture, Front room Architecture, Infrastructure, Metadata, Security, 7

Unit2 Introducing Dimensional Modeling

Making the Case for Dimensional Modeling, Dimensional Modeling primer, Enterprise Data Warehouse Bus Architecture, More on Dimensions & Facts. 6

Unit 3 Designing the Dimensional Modeling

Modeling Process overview, Getting Organized, Four Step Modeling Process, Design the Dimensional Model. 5

Unit4 Introducing Extract, Transformation & Load

Round up the requirements, the 34 subsystems of ETL, Extracting Data, Cleaning & Conforming data. 6

Unit 5 Introducing Business Intelligence Applications

Importance of B.I. Applications, Analytical cycle for B.I., Types of B.I. Applications, Navigating Applications via the B.I portal. 6

Unit6 Designing & Developing B.I Applications

B.I. Application resource planning, B.I. Application Specification, B.I. Application Development, B.I. Application maintenance 6

M. Tech (Computer Science & Technology) - I

Semester- II

CS 524: Web Services and SOA (Elective- III)

Teaching Scheme:	L: 3	T: -	P: -	Credits: 3
-------------------------	-------------	------	-------------	------------

Unit1 Web services Technologies

What is Web services, Evolution and differences with Distributed computing, WSDL, SOAP, UDDI, Transactions, Business Process Execution Language for Web Services, WS-Security and the Web services security specifications, WS-Reliable Messaging, WS-Policy, WS-Attachments

Unit2 SOA Fundamentals

Defining SOA, Business Value of SOA, Evolution of SOA, SOA characteristics, concept of a service in SOA, misperceptions about SOA, Basic SOA architecture, infrastructure services, Enterprise Service Bus (ESB), SOA Enterprise Software models, IBM On Demand operating environment

Unit3 SOA Planning and Analysis

Stages of the SOA lifecycle, SOA Delivery Strategies, service-oriented analysis, Capture and assess business and IT issues and drivers, determining non-functional requirements (e.g., technical constraints, business constraints, runtime qualities, nonruntime qualities), business centric SOA and its benefits, Service modeling, Basic modeling building blocks, service models for legacy application integration and enterprise integration, Enterprise solution assets(ESA)

Unit4 SOA Design and implementation

Service-oriented design process, design activities, determine services and tasks based on business process model, choosing appropriate standards, articulate architecture, mapping business processes to technology, designing service integration environment (e.g., ESB, registry), Tools available for appropriate designing, implementing SOA, security implementation, implementation of integration patterns, services enablement, quality assurance

Unit5 Managing SOA Environment

Distributing service management and monitoring concepts, operational management challenges, Servicelevel agreement considerations. SOA governance (SLA, roles and responsibilities, policies, critical success factors, and metrices). OoS compliance in SOA governance, role of ESB in SOA governance, impact of changes to services in the SOA lifecycle

Unit6 Web 2.0 technologies

Introduction to Ajax, Ajax Design Basics, JavaScript, Blogs, Wikis, RSS feeds

M. Tech (Computer Science & Technology) - I Semester- II

CS 525: Artificial Intelligence and Natural Language Processing (Elective- IV)

Teaching Scheme:L: 3T: -P: -Credits: 3

Unit 1 Introduction, Problems, Problem Spaces, and Search

The AI problem, the underlying assumption, what is an AI technique?, the level of the model, criteria for success, some general reference, defining the problem as a state space search, production systems, problem characteristics, production system characteristics, issues in the design of search programs, additional problems

Unit 2 Heuristic Search Techniques

Generate-and-test, Hill climbing, Best-first search, Problem reduction, constraint satisfaction, meansend analysis

Unit 3 Knowledge Representation Issues, Predicate Logic

Representation and mappings, approaches to knowledge representation, issues in knowledge representation, the frame problem, representing simple facts in logic, representing instance and ISA relationships, computable functions and predicates, resolution, natural deduction

Unit 4 Representing Knowledge Using Rules, Statistical Reasoning

Procedural versus declarative knowledge, logic programming, forward versus backward reasoning, matching, control knowledge, probability and bayes theorem, certainty factors and rule-based systems, Bayesian networks, dempster-shafer theory, fuzzy logic.

Unit 5 Goals of NLP, Resources for NLP

Survey of applications, Levels of linguistic processing: morphology, syntax, semantics, lexicons and knowledge bases

Unit 6 Computational morphology

lemmatisation, Part-of-Speech Tagging, Finite-State Analysis.

Ambiguity and its resolution: Syntactic ambiguities and heuristics, lexical ambiguities and selectional restrictions, indeterminacy of reference

Department of Technology M. Tech (Computer Science & Technology) - I Semester- II

CS 525: System Modeling and Simulation (Elective- IV)

Teaching Scheme:L: 3T: -P: -Credits: 3

Unit 1 Introduction

When simulation is the appropriate tool and when it is not appropriate; Advantages and disadvantages of Simulation; Areas of application; Systems and system environment; Components of a system; Discrete and continuous systems; Model of a system; Types of Models; Discrete-Event System Simulation; Steps in a Simulation Study. The basics of Spreadsheet simulation, Simulation example: Simulation of queuing systems in a spreadsheet.

Unit 2 General Principles, Simulation Software

Concepts in Discrete-Event Simulation: The Event-Scheduling / Time-Advance Algorithm, World Views, Manual simulation Using Event Scheduling; List processing. Simulation in Java; Simulation in GPSS

Statistical Models in Simulation: Review of terminology and concepts; Useful statistical models; Discrete distributions; Continuous distributions; Poisson process; Empirical distributions.

Unit 3 Queuing Models

Characteristics of queuing systems; Queuing notation; Long-run measures of performance of queuing systems; Steady-state behavior of M/G/1 queue; Networks of queues; Rough-cut modeling: An illustration.

Unit 4 Random-Number Generation, Random-Variate Generation

Properties of random numbers; Generation of pseudo-random numbers; Techniques for generating random numbers; Tests for Random Numbers Random-Variate Generation: Inverse transform technique; Acceptance-Rejection technique; Special properties.

Unit 5 Input Modeling

Data Collection; Identifying the distribution with data; Parameter estimation; Goodness of Fit Tests; Fitting a non-stationary Poisson process; Selecting input models without data; Multivariate and Time-Series input models.

Unit 6 Estimation of Absolute Performance

Types of simulations with respect to output analysis; Stochastic nature of output data; Absolute measures of performance and their estimation; Output analysis for terminating simulations; Output analysis for steady-state simulations.

Verification, Calibration, and Validation; Optimization: Model building, verification and validation; Verification of simulation models; Calibration and validation of models, Optimization via Simulation

Department of Technology M. Tech (Computer Science & Technology) - I CS 516: Seminar II

Teaching Scheme:P: 2T: -Credits: 2

Seminar II shall be delivered preferably on the topic of dissertation or at least the area of dissertation. The concepts must be clearly understood and presented by the student. All modern methods of presentation should be used by the student. A hard copy of the report (25 to 30 pages A4 size, 12 fonts, Times New Roman, single spacing both side printed, well formatted preferably in IEEE format) should be submitted to the Department before delivering the seminar. A PDF copy of the report in soft form must be submitted to the guide along with other details if any

(Student is expected to submit seminar report in Latex/Microsoft word in the standard format style file available in the department)

Department of Technology M. Tech (Computer Science & Technology) - I Semester- II CS 527: Parallel Computer Architecture Lab

Teaching Scheme:L: -P: - 2Credits: 1

This lab consists of a set of minimum 8-10 Practical problems/ Tutorials / Research Problems and simulations based on the syllabus.

Department of Technology M. Tech (Computer Science & Technology) - I Semester- II CS 528: Computer Vision and Image Processing Lab

Teaching Scheme:L: -T: -P: 2Credits: 1

This lab consists of a set of minimum 8-10 Practical problems/ Tutorials / Research Problems and simulations based on the syllabus.

M. Tech (Computer Science & Technology) - I Semester- II CS 529: Computer Security Lab

Teaching Scheme:L: -T: -P: 2Credits: 1

This lab includes some cryptographic algorithms and problems. Few sample laboratory experiments are as follows:

1. Study of different Substitution and Transposition techniques.

2. Given Hill Cipher Key;

Encrypt your message, "....."

Show calculations and result.

Show corresponding decryption to get the original plaintext.

3. Implement numerical encryption using one round version of DES. Start with same bit pattern for K and P as,

0-0000 1-0001 2-0010

..... E- 1110 F- 1111.

a. Derive k1 - first round key

- b. Derive L0 and R0
- c. Expand R0 to get E[R0]

d. Calculate A = E[R0] XOR K1

e. Group the 48 bit result of (d) into sets of 6 bits and evaluate the corresponding

S-box substitution.

f. Concatenate the results of (e) to get a 32 bit result, B.

g. Apply permutation to get P(B)

h. Calculate R1=P(B) XOR L0

i. Write down ciphertext.

4. Using S-DES decrypt the string (10100010) using the key (0111111101). Show intermediate results after each function (IP, FK, SW, FK, IP-1). Then decode the first 4 bits of the plaintext string to a letter and the second 4 bits to another letter where we decode A through P in base 2 (i.e. A=0000, B=0001,..., P=1111).

Hint: as a midway check, after SW, the string should be (00010011).

5. Perform encryption and decryption using RSA algorithm

- 6. Study of Digital Signature Algorithm.
- 7. Study of Kerberos. How version 5 is different from version 4?
- 8. Study of role of encryption in the operation of virus.
- 9. Discuss examples of applications of IPsec.
- 10. List and briefly define the principal categories of SET participants.
- 11. List and define intruder classes and intrusion detection.
- 12. Firewall techniques to control access and enforce a security policy.

M. Tech (Computer Science & Technology) - II

Semester-III

CS 611: Industrial Training

Teaching Scheme:	L: -	T: -	P: 5 [*]	Credits: 4
-------------------------	------	-------------	-------------------	------------

The student shall undertake software development project at any of the industry/research organization/software company under the guidance of internal guide and a suitable Co-guide from that industry/research organization/software company for duration of eight weeks at the end of first year (during summer). The report of the development work is to be submitted to the University in the first week of semester III.

(Student is expected to submit report in Latex/Microsoft word in the standard format style file available in the department)

Department of Technology

M. Tech (Computer Science & Technology) - II Semester- III CS 612: Dissertation Phase I

Teaching Scheme:L: -T: -P: 5^* Credits: 10

The dissertation title should be identified on the basis of the literature survey and a presentation be delivered. The synopsis of the dissertation be prepared and submitted to the University for its Approval.

The student shall carry work related to the dissertation with the consent of the guide. This work shall include related hardware/software assignments, field work (if required) as decided by the guide. The student shall submit monthly progress report to the department and shall deliver a presentation at the end of Semester III submitting the progress of the work done. The work is to be jointly assessed for oral examinations by internal (guide) and external examiners appointed by the University.

(Student is expected to submit seminar report in Latex/Microsoft word in the standard format style file available in the department)

SHIVAJI UNIVERSITY, KOLHAPUR – Credit System Syllabus w.e.f. 2016 – 17

Department of Technology

M. Tech (Computer Science & Technology) - II Semester- IV CS 621: Dissertation Phase II

Teaching Scheme: L: - T: - P: 5^{*} Credits: 20

The student shall submit monthly progress report to the department and shall deliver a presentation of the work at the end of Semester IV submitting the report on the dissertation work. A pair of referees, as appointed by the University, one of which will be the guide and the other - external examiner will access the dissertation work during the oral examination.

(Student is expected to submit seminar report in Latex/Microsoft word in the standard format style file available in the department)
