SU/BOS/Sci. & Tech/

No 0 0 3 5 8

Date: 15/09/2021

To,

17 SEP 2021

The Principal/ Director,  
All affiliated Engineering Colleges/ Institute,  
Shivaji University, Kolhapur.

**Subject :** Regarding revised Syllabus and equivalence of CBCS Final Year B.Tech.  
Part-IV Sem-VII-VIII Program under Faculty of Science and Technology.

Sir/Madam,

With reference to the subject mentioned above, I am directed to inform you that the University Authorities have accepted and granted approval to structure and Syllabus of CBCS Final Year B.Tech. Part-IV Sem-VII-VIII under the Faculty of Science & Technology.

**B. Tech. Programme (Branch)**

1.	Civil Engineering & Technology
2.	Mechanical Engineering & Technology .....
3.	Electrical Engineering & Technology
4.	Chemical Engineering & Technology
5.	Electronics Engineering & Technology
6.	Electronics and Telecommunication Engineering & Technology
7.	Computer Science Engineering & Technology
8.	Information Technology Engineering & Technology
9.	Production

This revised syllabus and equivalence shall be implemented with effect from the academic year 2021-2022 (i.e. from June 2021) onwards. A soft copy containing syllabus is attached herewith and it is available on university website [www.unishivaji.ac.in](http://www.unishivaji.ac.in).

The question papers on the pre-revised syllabi of above mentioned course will be set for the examinations to be held in October /November 2021 & March/April 2022. These chances are available for repeater students, if any.

You are, therefore, requested to bring this to the notice of all students and teachers concerned.

Thanking you,

Yours faithfully,

Dy. Registrar

Copy to:

1	The I/c Dean, Faculty of Science & Technology	7	Computer Centre
2	The Chairman, Respective Board of Studies	8	Affiliation Section (T.1)
3	Director, Examination and Evaluation	9	Affiliation Section (T.2)
4	Eligibility Section	10	P.G.Admission Section
5	O.E. - 4	11	P.G Seminar Section

# **SHIVAJI UNIVERSITY, KOLHAPUR**

**REVISED SYLLABUS AND STRUCTURE  
FINAL YEAR (B. Tech.)**

## **MECHANICAL ENGINEERING**

To be introduced from the academic year 2021-22  
(i.e. from June 2021) onwards

(Subject to the modifications will be made from time to time)

# FINAL YEAR MECHANICAL ENGINEERING – CBCS PATTERN

CIE- Continuous Internal  
EvaluationESE – End Semester  
Examination

• Candidate contact hours per week : 30 Hours(Minimum)	• Total Marks for B.E. Sem VII & VIII : <b>1550</b>
• Theory/Tutorial Duration:60 Minutes and Practical Duration:120 Minutes	• Total Credits for B.E. Sem VII & VIII : <b>50</b>
• In theory examination there will be a passing based on separate head of passing for examination of CIE and ESE.	
• There shall be separate passing for theory and practical (term work)courses.	

Note:

1. Professional Core Courses-Mechanical Engineering (PCC-ME) are compulsory.
2. Professional Core Electives –Mechanical Engineering (PCE-ME) are compulsory.
3. Summer Internship -Mechanical Engineering (SI-ME) is compulsory.
4. Project Work Mechanical Engineering (PW-ME) is compulsory.
5. PCC-ME\*\*\*- Online Certificate Course.

**The Student should register the online course with Moodle/Swayam/MOOC/NPTEL. etc. of his interest in Recent Advances in Mechanical Engineering at a Start of his/her final year (i.e. at Semester VII.) and Same is intimated to Head of Department or Coordinator. For Term Work, Student has to Submit Completion Certificate of Course to the Department till end of Semester VIII. Term Work will be given at the end of Semester VIII. The Head of Department has to assign a Coordinator or Supervisor for Online Certificate Course.**

**Semester VII**

<b>Sr. No</b>	<b>Code No.</b>	<b>Subject</b>	<b>Credits</b>
1.	PCC ME 401	Refrigeration and Air Conditioning	4
2.	PCC ME 402	Mechanical System Design	4
3.	PCC ME 403	Finite Element Analysis	4
4.	PCE ME 404	Elective I	4
5.	PCE ME 405	Elective II	4
6.	PCC ME 406	Seminar	1
7.	SI ME 407	Summer Internship @	1
8.	PW ME 408	Project Phase -I	3
		Total	25

**Semester VIII**

<b>Sr. No</b>	<b>Code No.</b>	<b>Subject</b>	<b>Credits</b>
1.	PCC ME 409	Mechatronics	4
2.	PCC ME 410	Energy and Power Engineering	4
3.	PCC ME 411	Noise and Vibration	4
4.	PCE ME 412	Elective III	4
5.	PCE ME 413	Elective IV	4
6.	<b>PCE ME414***</b>	<b>Online Certificate Course</b>	<b>2</b>
7.	PW ME 415	Project Phase –II	3

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech (Mechanical Engineering) CBCS PATTERN Semester VII**  
**REFRIGERATION AND AIR CONDITIONING**  
**SUBJECT CODE: PCC ME401**

**Teaching Scheme:**

Lectures: 3Hrs/Week

Practical: 2Hrs/Week

Credits:4

**Examination Scheme:**

ESE: 70Marks

CIE: 30Marks

Term Work: 25Marks

Oral Exam: 25 Marks

---

**Pre-requisites:** Applied Thermodynamics, Heat and Mass Transfer

**Course Objectives:**

The course aims to:

1. Study basic refrigeration cycles and Psychometric.
2. Performance Evaluation of Refrigeration and Air Conditioning Systems
3. Enable the student to analyze and solve refrigeration related problems by applying principles of mathematics, science and engineering

**Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Demonstrate an understanding of the need and importance of HVAC technology, the typical and some advanced and innovative schematic designs, and the goals of HVAC engineering and HVAC systems.
2. Demonstrate an understanding thermal comfort conditions with respect to temperature and humidity and human clothing and activities and its impact on human comfort, productivity, and health.
3. Demonstrate an understanding of psychometrics and its application in HVAC engineering and design and will practice or observe psychometric measurements.
4. Demonstrate an understanding of heat transfer in buildings with a given architectural design and its application to heating and cooling load estimation especially including thermal lag effects by conducting a detailed annual load analysis for a representative building and present the results of this analysis in a formal report possibly including recommendations for energy conservation.
5. Demonstrate an understanding of the engineering and operation of vapour compression and possibly heat-driven refrigeration systems and evaporative cooling systems and understand contemporary issues of ozone depletion and global warming potential with respect to refrigeration systems.

## **Unit 1**

### **Application of Second Law of Thermodynamics**

**[03]**

A Refrigerating Machine – The Second Law Interpretation, Introduction to Heat pump, Heat Engine and Refrigerator (with Numerical treatment), Energy Ratios (EER), BEE star rating COP, Power Consumption of a Refrigerating Machine, Refrigeration Cycle, vapour as a Refrigerant Reversed Carnot Cycle Limitations of Carnot Cycle with Gas as a Refrigerant, Reversed Brayton or Joule or Bell Coleman Cycle, Introduction to aero-plane air conditioning cycles (Only Theory)

## **Unit 2**

### **Vapour Compression System**

**[08]**

Limitations of Reversed Carnot Cycle with vapour as a Refrigerant, Dry versus Wet Compression, Throttling versus Isentropic Expansion, Introduction to Vapour Compression Cycle and Vapour Absorption cycle. Pressure Enthalpy Diagram and Calculations (Numerical on VCR Cycle) and effect of Operating Conditions, effect of Evaporator Pressure Effect of Condenser Pressure, effect of Suction Vapour Superheat, effect of Liquid Sub cooling, Using Liquid- Vapour Regenerative Heat Exchanger, Actual Vapour Compression Cycle. Removal of flash gas, Flash intercooling, Introduction to cryogenic Engineering and applications,

## **Unit 3**

### **Refrigerants and Refrigeration Equipment**

**[09]**

Classification, Desirable Properties like Thermodynamic, physical, and chemical. Comparison among commonly used refrigerants, Selection of Refrigerants, Effect on Ozone depletion and global warming, Alternative Refrigerants. Environmental Protection protocol and India's commitment. Introduction to role of ASHRAE & ISHRAE in refrigeration and air conditioning area, ASHRAE Nomenclatures. Insulation, types and different applications, properties of ideal insulations. Introduction to Equipment such as Compressor, Condenser, Evaporator, Expansion devices. Applications of Refrigeration in Dairy plant, Ice-plant, Cold storage.

## **Unit 4**

### **Psychrometry and Human Comfort**

**[09]**

Moist air as a working substance, Psychrometric properties of air, Use of Psychrometric tables and charts, Processes, Combinations and Calculations (Numerical on Psychrometry), ADP, Coil Condition line, Sensible heat factor, Bypass factor, Air washer and its applications. Thermal exchange between human body and environment, factors affecting comfort, effective temperature comfort chart, ventilation requirements.

## **Unit 5**

### **Heating and Cooling load calculations**

**[05]**

Design of air conditioning systems, different Heat sources,- Adiabatic mixing of two air streams, sensible heat factor, RSHF, GSHP, ERSHP, Room apparatus dew point and coil apparatus dew point, Ventilation and infiltration, Inside and Outside Design condition. Cooling Load estimation, Introduction to, Variable Refrigerant Flow systems, VAV control systems, Inverter Units. Introduction to Inverter technology and its use in power failure, Introduction to Phase change material used for temperature retention in refrigerator.

## **Unit 6**

### **Air Distribution System**

**[06]**

Re-circulated air, Ventilation air, Duct work, Use of friction loss and rectangular equivalent of round duct chart, duct system, principle of duct sizing, and air distribution it's norms, diffusers, dampers, layout, duct systems for theaters, auditorium, hospitals, assembly shop etc. Energy Conservations and Green Buildings, Freeze drying, Pharmaceutical and hospital air conditioning, textile, car air conditioning (plant layout, system components and design conditioning)

### **Term Work:**

1. Study of various conventional and Nonconventional methods of refrigeration.
2. Study and demonstration of refrigeration system. (Water cooler, refrigerators, chiller, ice plant and cold storage).
3. Trial on Electrolux-Refrigeration Test Rig.
4. Trial on heat pump test rig.
5. Study and trial on vapour absorption system
6. Trial two stage cascade system.
7. Trial on ice plant test rig
8. Trial on window air conditioner or Air Conditioning Test Rig
9. Study and demonstration on air conditioning systems. (Unitary viz Room/Split and Packaged Air Conditioners and central air conditioning/system)
10. Study and demonstration on Compressor, Condenser, Evaporator, Expansion, devices, Types, selection. Component balancing, safety devices and refrigeration controls
11. Study and demonstration of dehydration, charging leak testing and testing of refrigeration system with trouble shooting.
12. Study and demonstration of controls and safety devices in refrigeration and air conditioning.
13. Visit to central air conditioning or cold storage or dairy plant to ice plant related with refrigeration and air conditioning system.
14. Market survey of various refrigeration and air conditioning systems which include the equipment's with related specifications, manufacturers, cost and comparison with respect to tonnage, cost and presentation of report in the laboratory.

**(Three trials and market survey report is compulsory.Total 10 are compulsory)**

2. "Refrigeration and Air Conditioning", by Er. R. K. Rajput. ( 3<sup>rd</sup> Edition, Katson book.)

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech (Mechanical Engineering) CBCS PATTERN Semester VII**  
**Mechanical System Design**  
**SUBJECT CODE:PCC-ME402**

Teaching Scheme:  
Lectures: 3Hrs/ Week  
Practical: 2Hrs/Week  
Credits:4

Examination Scheme:  
ESE: 70 Marks  
CIE: 30Marks  
Term Work: 25 Marks  
Oral Exam: 25 Marks

**Pre-requisites:** Applied Mechanics, Analysis of Mechanical Elements, Theory of Machines (I&II), Machine Design (I&II),

**Course Objectives:**

The course aims to

1. Enable student to develop competency for new system by involving Industrial engineering aspects.
2. Acquaint student about the use of IS Codes during the design of pressure vessels.
3. Introduce student to design the mechanical Systems. Like Clutch and Braking.
4. Familiarize student about design machine tool gearbox, design internal combustion(IC) engine components and material handling systems.

**Course Outcomes:**

On completion of the course, students will be able to

1. Understand the role of aesthetics, ergonomics and creativity in design.
2. Understand theories and principles used in design of pressure vessels. IC Engine and material handling equipments.
3. Analyze and select suitable materials and design parameters during the design of pressure vessels, IC engine components, machine tool gear box and material handling systems as per industrial and societal requirement.
4. Evaluate the load carrying capacity, stress bearing capacity in various mechanical systems like unfired pressure vessels, IC engine components.
5. Design various mechanical systems like pressure vessels, machine tool gear boxes, material handling systems, etc. as per industrial and societal requirement.
6. Create the competency in mechanical system design by applying industrial design aspect

**Unit 01**

**Aesthetic and Ergonomic Consideration in Design:**

**[6]**

Basic types of product forms, Designing for appearance, shape, Design features, Materials, Finishes, proportions, Symmetry, Contrast etc. Morgon's colour code. Ergonomic considerations- Relation between man, machine and environmental factors. Design of displays and controls. Practical examples of products or equipment's using ergonomic and aesthetic design principles. Creativity concept in designing. Theoretical treatment of optimum design and adequate design.

**Unit 02**

**Pressure Vessel Design**

**[7]**

Thin and thick cylinders; Failure criteria of vessels; Lame's equation; Clavarino's and Birnie's equation; Autofrettage and compound cylinders; Types of pressure vessels-Horizontal and vertical; Classification of pressure vessel as per IS2825, 1969, Introduction to design of pressure vessels as per IS Codes. Shell and end closures. Effect of opening and nozzles in shell and covers. Types of pressure vessel support.

### **Unit 03**

#### **Design of Braking and Clutch System**

[7]

**Brakes:** Design consideration in brakes, Band, Internal expanding shoe, External contracting shoe. Thermal consideration and rating of brakes.

**Clutches:** Design requirement of friction clutches, Selection criteria, Torque transmitting capacity of single plate, Multi disc clutch, Cone clutch and Centrifugal clutch.

### **Unit 04**

#### **Design of Gear boxes for machine tool applications**

[7]

Determination of variable speed range- Graphical representation of speeds- Structure diagram- Deviation diagram- Ray diagram- Selection of optimum ray diagram- Difference between number of teeth of successive gears in a change gear box- Analysis of twelve speed gear box- Compound ray diagram

### **Unit 05**

#### **Design of I. C. Engine Components**

[7]

Introduction to selection of material for I. C. engine components, Design of cylinder and cylinder head, Design of cylinder liners, Design of piston and piston-pins, Piston rings, Design of connecting rod, Design of crank-shaft and crank-pin.

### **Unit 06**

#### **Design of Material Handling System**

[6]

Design of belt and chain conveyors – Power requirement, Selection of belt and chain, Design of tension take up unit, Idler pulley.

#### **TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

1. A detail design report and A2 size sheet containing working drawing of detail and assembly of
  - a) Design of Machine Tool Gear Box.(Three Stage, Twelve speed gear Box)
  - b) Pressure vessel design/ Brake design or Clutch design.
2. Assignment based on
  - a) Aesthetic and Ergonomic design considerations –case study.
  - b) Problems on Material Handling System.
  - c) Minimum four Problems on Design of IC Engine components. such as connecting rod, crank shaft, piston with piston rings and pins, cylinder and cylinder head.

#### **TEXT BOOKS:**

12. "Fundamentals of Machine Component Design", Junvinall Wiley India, 5<sup>th</sup> Edition.
13. "Mechanical System Design", Anurag Dixit, SCITECH Publication.
14. "Principles of Machine Tool", Sen. Bhattacharya, New Central Book Agency.
15. Material Handling Equipments by N. Rudenko, Peace Publication.
16. Material Handling Equipments by Alexandrov, Mir Publication.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBSE PATTERN Semester VII**

**FINITE ELEMENT ANALYSIS**

**SUBJECT CODE: PCC ME 403**

**Teaching Scheme:**

Lectures : 03 Hrs. per week

Practical : 02 Hrs. per week

Credits: 04

**Examination Scheme:**

ESE : 70 Marks

CIE : 30 Marks

Term Work : 25 Marks

**Pre-requisites: Matrices, Partial differentiation, Strength of materials.**

**Course Objectives:**

1. To define the basic finite element formulation techniques
2. To derive the finite element equations for 1D, 2D Elements.
3. To formulate and solve basic problems in Solid Mechanics & heat transfer.
4. To use commercial software to solve Basic Engineering problems in Solid Mechanics & heat transfer.

**Course Outcomes:** At the end of this course, student will be able to

1. Elaborate the fundamental concepts of Finite Element method.
2. Understand the key concepts like Shape function, element stiffness and boundary conditions by finite element formulations for 1D problem.
3. Apply the finite element formulations for two dimensional problems using constant strain triangle.
4. Demonstrate the modeling aspects of axisymmetric solids subjected to axisymmetric loading.
5. Apply the finite element formulations for Planer Trusses using 1D element.
6. Solve Scalar field problems by Finite element formulation.

**Unit 1 FUNDAMENTAL CONCEPTS**

**04**

Introduction to FEA, Brief History, General FEM procedure, Simplification of problem through Symmetry, Various terminologies associated with FEA (Discretization, nodes and element) Stiffness matrix and its properties.) Application of FEM in various fields. Advantages and Disadvantages of FEA

**Unit 2 ONE DIMENSIONAL ELEMENT****07**

Introduction to One dimensional element, Types of One dimensional element, Derivation of Stiffness matrix and Shape function for one dimensional Linear and Quadratic element. Stress analysis of a Stepped bar, Thermal analysis of a Composite Wall and Torsion analysis of a shaft using 1 D element. Treatment of Boundary conditions by Elimination approach and Penalty approach

**Unit 3 TWO-DIMENSIONAL ELEMENT****08**

Introduction to two-dimensional element, Derivation of Stiffness matrix and Shape function for two dimensional linear element. Numericals on Two-Dimensional analysis using 2D elements (Constant Strain Triangle)

**Unit 4 ANALYSIS OF AXISYMMETRIC SOLIDS****06**

Introduction & applications of Axisymmetric elements, axisymmetric formulation, finite element modeling, triangular element and stress calculations

**Unit 5 ANALYSIS OF TRUSS****08**

Trusses:-Plane trusses, Local and Global coordinate systems, Derivation of Global stiffness matrix, Formulae for calculating L and M, element stiffness matrix, Stress Calculations, Assembly of global stiffness matrix.

**Unit 6 SCALAR FIELD PROBLEMS****07**

Introduction, Steady state heat transfer, one dimensional heat transfer in thin fins, Two dimensional steady state heat conduction, Two dimensional fins.

**TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

1. Assignment on Discretization – types of elements, choice of element and type of meshing – automatic, mapped, meshing in critical areas.
2. Finite Element Analysis of Stepped bar (Two or Three Steps only) using,
  - a) Finite Element Approach (Theory)
  - b) Finite Element Software (ANSYS / HYPERWORKS etc.)Compare the results obtained by above methods.

### 3. Finite element analysis of Composite wall (Minimum threeslabs)

- a) Finite Element Approach(Theory)
- b) Finite Element Software (ANSYS / HYPERWORKSetc.) Compare the results obtained by abovemethods.

### 4. Use of any ONE Standard software package like ANSYS / HYPER WORKS etc. for solving following problems: (**ANY FIVE**)

- ☐ Static Analysis of Truss
- ☐ Static Analysis of Beam
- ☐ Static Analysis of Plate with a circular hole
- ☐ Thermal analysis of Composite wall under Convection &Conduction.
- ☐ Torsional Analysis of a shaft.
- ☐ Analysis of Wallbracket.
- ☐ Analysis of 1Dfin.
- ☐ Introduction to Ansys Work bench
- ☐ Importing external geometry file into ANSYSClassic.
- ☐ Analysis of a machine element using ANSYS / HYPER WORKS etc.

### 5. Finite element analysis of STEPPED BAR in ANSYS using**APDL**.

#### **TEXT BOOKS:**

1. “Introduction to Finite Elements in Engineering”; Chandrupatala-Belgundu, PHI.
2. “Finite Element Method with Application in Engineering” Y. M. Desai, T. I. Eldho, A. H. Shah, Pearson.
3. “Textbook of Finite Elements Analysis”, P. Sheshu, Prentice-Hall of India Private Limited, New Delhi.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech (Mechanical Engineering) CBCS PATTERN Semester VII**  
**Experimental Mechanics (Elective- I)**  
**SUBJECT CODE: PCE ME404**

**Teaching Scheme:**

Lectures: 3Hrs/Week

Practical: 2Hrs/Week

Credits:4

**Examination Scheme:**

ESE: 70 Marks

CIE: 30Marks

Term Work: 25Marks

---

**Pre-requisites:** Analysis of mechanical elements, material science

**Course Objectives:**

1. Introduce the concept of experimental stress analysis
2. Prepare mechanical engineering students for advanced graduate studies in various experimental stress analysis techniques like photo elasticity, strain gauge etc.
3. Supply qualified personnel to meet the requirement in experimental stress analysis

**Course Outcomes:**

1. To analyze photo elastic technique for stress analysis
2. To explain the concept of strain gages and its applications
3. To elaborate the concept of coating methods.
4. To apply the knowledge of Moiré fringe method for stress analysis

**Unit 01 Principles of Experimental Approach-**

**[03]**

Introduction to Experimental Mechanics, advantages scope of Experimental Mechanics in design, various experimental methods of stress analysis and their relative merits and demerits

**Unit 02 Two Dimensional Photo elasticity-**

**[11]**

- ☐ Stress optics law, material fringe value in terms of stress and strain, significance of material fringe value
- ☐ Nature of light, Wave theory of light - optical interference

- Photoelastic Materials - Criteria for selection, common photoelastic materials and their properties, Photoelastic sheet casting and model making, calibration of photoelastic material, calibration methods using circular disc
- polariscope, its scope in photo elasticity, various configurations of polariscope
- effect of stressed model in plane and circular polariscope, isoclinics, isochromatics, their significance in photoelastic stress analysis
- Properties of 2D photoelastic model materials, Materials for 2D photoelasticity
- Methods for fractional fringe measurement, Tardy's method of compensation (Derivation)

### **Unit 03 Analysis of Photo elastic Data–**

**[06]**

Principle of photoelasticity, methods of photoelastic stress analysis, temporary and permanent double refraction

Determination of direction of principal stresses at a given point, shear difference method, oblique incidence method and electrical analogy method.

### **Unit 04 Strain Measurement Using Strain Gauges–**

**[07]**

Concept, meaning of strain gauges, desirable properties of strain gauges, types of strain gauges, Strain measurement using electrical resistance strain gauge, Selection and mounting of strain gauge, criteria for selection, mounting of gauge and checking its installation

### **Unit 05 Strain Gauge Circuitry–**

**[07]**

Wheatstone bridge circuit, its role in measurement of resistance change, condition for bridge balance, different configurations of Wheatstone bridge, output voltage of Wheatstone bridge, relationship between output voltage and strain, commercial strain indicators, potentiometer circuit.

Introduction to strain gauge rosettes, two, three and four element rosettes, different configurations of rosettes and their comparison, determination of magnitudes and direction of principal stresses when principal stress directions are specified and not specified.

### **Unit 06 Coating Methods and Moiré Fringe method–**

**[06]**

Introduction, Brittle coating, coating stresses, crack patterns, crack detection techniques, selection of brittle coating, advantages, Birefringent coating:- Limitations and applications, Introduction to Birefringent coating, Birefringence coating stresses, Effects of coating thickness: Reinforcing effects, Poisson's effect, reflection polar scope

Introduction to Moiré fringe method of stress analysis – Mechanism of fringe formation, approaches to moiré fringe analysis, advantages, limitations and applications

## **TERM WORK :**

Any eight out of the following list

1. Bonding of strain gauge and checking its installation.
2. Determination of gauge factor for one arm sensitive and two arm sensitive configuration.
3. Determination of gauge factor for four arm sensitive and four arm sensitive two linear and two lateral configuration.
4. Transducer applications of strain gauge- determination of unknown weight using load cell.
5. Study of photo elastic stress analysis – use of diffused light transmission polariscope.
6. Determination of fractional fringe order using Tardy's method.
7. Calibration of photoelastic materials - determination of material fringe value.
8. Study of Moiré Fringe Technique.
9. Study of Brittle Coating Method.
10. Study of photo elastic materials.

## **TEXT BOOKS:**

1. "Experimental Stress Analysis", Dr. Sadhu Singh; Khanna Publishers, 5<sup>th</sup> Edition.
2. "Experimental Stress Analysis", U.C. Jindal, Pearson Publications, 1<sup>st</sup> Edition.
3. "Experimental Stress Analysis", Abdul Muben; Dhanpat Rai and Co., 1<sup>st</sup> Edition.
4. "Experimental Stress Analysis", Vazirani, Khanna Publications.
5. "Stress Analysis and Experimental Techniques an Introduction", J. Srinivas, Narosa Publications.

## **REFERENCE BOOKS:**

1. "Experimental Stress Analysis", J.W. Dally and W.F. Riley, Tata McGraw Hill Book Company, 3<sup>rd</sup> Edition.
2. "Principles of Experimental Stress Analysis", by American Society for Metals, 6<sup>th</sup> Edition.
3. "Experimental Stress Analysis", L.S. Srinath., Tata McGraw Hill.
4. "Experimental Stress Analysis", Dove and Adams Merrill, 1<sup>st</sup> Edition.
5. "The Strain Gauge Primer", Perry Listner McGraw Hill Book Company 2<sup>nd</sup> Edition.
6. "Moiré Fringes", Theocoris., Pergamon Press limited.
7. "Experimental Stress Analysis Principles and Method", by Holister G.S., Cambridge Engineering Services.

**SHIVAJI UNIVERSITY, KOLHAPUR**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**  
**HUMAN AND PROFESSIONAL ETHICS (Elective-I)**  
**SUBJECT CODE: PCE ME 404**

**Teaching Scheme:**

Lectures : 03 Hrs. per week

Practical : 02 Hrs. per week

Credit:04

**Examination Scheme:**

ESE: 70Marks

CIE: 30Marks

Term Work: 25Marks

**Pre-requisites:NA**

**CourseObjectives:**

The objective of the course is an exploration of human values which go into making a good human being, a good human society and a good life. The context is the work life

1. and the personal life of modern Indian professionals.

2. The movement to identify and remote the values shared by societies around the world is relatively new.

It is only in recent years as globalization extended its reach to even remote corners of

3. the earth that he need to refocus and build upon what we as a human society have in common, has become apparent.

4. Increased contact between peoples and nations enhances awareness of our kinship and the shared code of ethics and conduct that underlies all civilization.

5. It's the Human values that we must now promote to create a common vision and means for moving forward toward a more peaceful and sustainable world.

6. The course also aims to have students appreciate the vastness of the Universe and the

wonder of its parts, and the philosophical significance of this for improving the quality of human life through value clarification.

**Course Outcomes:** Upon successful completion of this course, the student will be able to:

Understand the role of cognitive and moral values in world views, by discussing and  
**1.** writing about the ethical implications of modern scientific and technological results

Recognize the difference between matters of fact and matters of value, while  
understanding the important ways in which facts influence value assessments and how  
**2.** value judgments shape our vision of "the facts"

Understand ethical methodologies and competency in ethical deliberation on rationally  
applying these methodologies to contemporary ethical questions related to scientific  
**3.** progress and technological power

**4.** Understand why ethics plays an important role in science and technology

To help students apply this understanding to make their living better at different levels-  
**5.** individual, family, society and nature

To facilitate the students in applying this understanding in their profession and lead an  
**6.** ethical life

## **Unit 1 Human Values**

**[8]**

The value, crisis in the contemporary Indian Society, The Indian system of values in the Indian constitution, Aesthetic values: perception and enjoyment of beauty, Relative and absolute values, Morals Values and Ethics, Integrity Service Work Ethic Service Learning Civic Virtue, Respect for Others, Respect for the Environment, Quest for Living Peacefully and happily, Attitude of Nonviolence Innate dignity for human life, Bring out the best in oneself caring Sharing Honesty Courage, Valuing Time, Co-operation, Commitment, Empathy, Self-Confidence Character, Spirituality

- Unit 2      Harmony in the Human Being      [6]**
1. Human Being is more than just the Body 2. Harmony of the Self (I) with the Body  
3. Understanding Myself as Co-existence of the Self and the Body 4. Understanding Needs of the Self and the Needs of the Body
- Unit 3      Harmony in the Family and Society and Harmony in the Nature      [6]**
1. Family as a basic unit of Human Interaction and Values in Relationships 2. The Basics for respect and today's Crisis: Affection, Care, Guidance, Reverence, Glory, Gratitude and Love 3. Comprehensive Human Goal : The Five dimensions of Human Endeavour
- Unit 4      Safety      [5]**
- Safety and risk - assessment of safety and risk - risk benefit analysis and reducing risk – The Government Regulator's Approach to Risk- the three mile island, Chernobyl and Bhopal case studies. Collegiality and loyalty - respect for authority - collective bargaining - confidentiality - conflicts of interest - occupational crime
- Unit 5      Responsibilities and Rights      [5]**
- Engineers responsibility, Professional rights - Employee rights - Intellectual Property Rights (IPR) - Discrimination
- Unit 6      Experimentation and Global Issues      [10]**
- Engineering as Experimentation – Engineers as responsible Experimenters – Codes of Ethics – A Balanced Outlook on Law.  
Multinational corporations - Business Ethics -Environmental ethics –Role in Technological Development- computer ethics - weapons development - engineers as managers-consulting engineers-engineers as expert witnesses and advisors -Honesty-moral leadership-sample codes of Ethics like ASME, ASCE, IEEE, Institution of Engineers (India), Indian Institute of Materials Management, Institution of electronics and telecommunication engineers (IETE), India, etc.

### **TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

The term work should be carried out with the methodology of Lectures, group discussions (based on case studies), movies, field visits, essays, and student self-investigation sessions.

1. TEN modules based on the topics mentioned above and including –

- Group Discussions based on Case Studies with Report/Essays.
- Undergoing the Art of Living's *YES+ / Happiness Programme* on the Awareness of Human Values conducted by VyaktiVikas Kendra ,Bangalore in assistance with

### **INTERNATIONAL ASSOCIATION OF HUMAN VALUES.(IAHV).**

- Visits (with report writing) to Public Institutes like Municipal Corporation, ZP, Co-op organizations, social clubs like charitable trusts, Waste Water/Air Pollution Control Plant, Slum Areas etc.
- Conduction of Health and Hygiene Awareness Camp for Society.
- Study of economic status of the society – Survey data collection, analysis and any suggestions.
- Study of impacts of technology on society.

### **TEXT BOOKS:**

1. “Professional Ethics and Human Values”, M.P. Raghavan, Scitech Publications (India) Pvt Ltd.
2. “Human Values and Professional Ethics”, Jayashri and Suresh B S ,S Chand .
3. “Ethics in Engineering”, Mike Martin and Roland Schinzinger, , Tata McGraw-Hill, New York, (1996).
4. “Engineering Ethics(Including Human Values)”, Govindarajan M, Natarajan S, Senthil Kumar V. S, Prentice Hall of India, New Delhi.
5. “A Textbook on Professional Ethics and Human Values”, Naagarazan, R.S. ,New Age Publishers .

## **REFERENCE BOOKS:**

1. “Engineering Ethics”, Charles D. Fleddermann, Pearson Education / Prentice Hall of India , New Jersey, (Indian Reprint now available).(2004)
2. “A foundation course in Human Values and professional Ethics”, R. R. Gaur, R. Sangal, G P Bagaria, Excel books, New Delhi, 2010, ISBN 978-8-174-46781-2
3. “Engineering Ethics –Concepts and Cases” Charles E Harris, Michael S. Protchard and Michael J Rabins, , Wadsworth Thompson Leatning, United States, (Indian Reprint now available), (2000).
4. “Ethics and the Conduct of Business”, John R Boatright, Pearson Education, New Delhi, (2003).
5. “Fundamentals of Ethics for Scientists and Engineers”, Edmund G Seebauer and Robert L Barry, Oxford University Press, Oxford.
6. “Business Ethics – An Indian Perspective”, Prof. (Col) P S Bajaj and Dr. Raj Agrawal, Biztantra, New Delhi, (2004).

## **RELEVANT WEBSITES, MOVIES AND DOCUMENTARI**

1. Value Education websites, <http://uhv.ac.in>, <http://www.uptu.ac.in>
2. Story of Stuff, <http://www.storyofstuff.com>
3. Al Gore, An Inconvenient Truth, Paramount Classics, USA

**AUTOMOBILE ENGINEERING (ELECTIVE –I)**  
**SUBJECT CODE: PCE ME 404**

**Teaching Scheme:**

Lectures: 3Hrs/Week  
Practical: 2Hrs/Week  
Credits: 4

**Examination Scheme:**

ESE: 70 Marks  
CIE: 30 Marks  
Term work: 25Marks

---

**Pre-requisites: IC Engine & Power plant**

**Course Objectives:**

The course aims to:

1. Describe importance and basic knowledge of automobile engineering.
2. Classify various automobile layouts and bodies.
3. Demonstrate automobile systems, wheels and tyres and automobile electrical and electronic systems for understanding construction and working principle.
4. Enable students to analyze and solve problems on automobile system by focus and critical thinking.
5. Demonstrate use of modern trends, techniques and skill to fulfill industrial needs by arranging industrial visit.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Explain components of automobile.
2. Distinguish various types of automobile lay outs as per drive given to wheels.
3. Identify types of automobile bodies and materials used for the same.
4. Demonstrate various automobile systems like clutch, gearbox final drive, brake, steering suspension wheels and Tyres, and its construction and working.
5. Demonstrate various electrical and electronic systems like lighting, starting charging electronic controlled management system and its construction and working principle, sensors used in automobile
6. Solve the problems related with various resistances for the automobile, engine power calculation.
7. Explain modern trends, techniques used in industries.

**Unit 1. Introduction****[06]**

Automobile history and development, Classification, vehicle layouts- engine location and drive arrangement, safety regulations, specifications of vehicles, Type of vehicle bodies, body parts and its advanced materials, Type of vehicle coaches , Chassis types, constructional details, Types of Frames, sub frames, frameless vehicles, details of chassis material.

**Unit 2. TransmissionSystem****[06]**

Clutch – Function and requirements, Classification, Construction and working of Single-plate, Multi-plate, Diaphragm spring and centrifugal clutches, Fluid flywheel.

Gear Box – Necessity, classification, construction of manual gear boxes like Sliding mesh, constant mesh, Synchromesh, Epicyclic gear train, Automatic transmission, Torque convertor, Electronic transmission control, Overdrive. Propeller shaft, Differential and final drive.

**Unit 3 Steering andSuspension Systems****[08]**

Live and dead axles, live axle arrangementSteering systems, function, principle of steering, Ackerman and Davis, steering geometry, center point steering, cornering force, slip angle, scrub radius, steering characteristic, steering gearbox, power steering, collapsible steering.

Suspension system- Functions, Sprung and un sprung mass, Types of suspension linkages, types of spring - leaf, coil, air springs, telescopic shock absorber, hydro gas suspension, rubber suspension, Air suspension

**Unit 4 Brakes, WheelsandTyres****[07]**

Brakes: Need, principle, types, Mechanical, hydraulic and pneumatic brakes disc and drum types, airbrakes, servo and power braking, ABS, brake adjustments, defects and causes, Electronic Brake Distribution(EBD).

Wheels and Tyres: Wheel construction, alloy wheel, Types, tyre construction, tread design, specification, factors affecting tyre performance, tyre wear and its causes, wheel balancing.

**Unit 5 Electrical andElectronicSystems****[07]**

Automotive batteries - lead acid batteries, Advances in batteries ,battery charging system, alternators, principle and operation of cutout and regulators, starter motor, Bendix drive, lighting and electrical accessories, automobile air conditioning, panel board instruments. Electronic Controlled Management (ECM) Systems, Automobile wiring. Sensors used in automobile.

**Unit 6 Performance & Recent Trends inAutomobiles****[06]**

Resistance to vehicle motion, Air, Rolling and Gradient resistance, Acceleration, Gradability and draw bar pull, Traction and Tractive effort, Distribution of weight, Power required for vehicle propulsion, (Numerical on Vehicle Resistance), Cruise Control, Adaptive Cruise Control (ACC), Electronic Stability Program (ESP), Traction Control System (TCS).

**Term Work:**

Minimum eight experiments from Group A and all experiments from Group B are to be performed.

**Group A.**

1. Study and demonstration of four wheeler chassis layout and vehicle body parts and its materials.
2. Study and Demonstration of working of single plate automobile clutch and clutch plate lining materials.
3. Study and demonstration of synchromesh gearbox. (necessity, interlocking mechanism, gear shifting mechanism (Troubleshooting))
4. Study and demonstration of final drive and differential. (Types of final drive gear, Troubleshooting)
5. Study and demonstration of front wheel steering geometry and steering mechanism. (Troubleshooting)
6. Study and demonstration of suspension system of a four-wheeler. (Any one suspension system from conventional or independent, trouble shooting)
7. Study and demonstration of working Hydraulic braking system. (Air bleeding of hydraulic brake, Trouble shooting)
8. Study and demonstration of Lead acid Battery. (Troubleshooting)
9. Study and demonstration of electrical charging system. (Troubleshooting)
10. Study and demonstration of electrical starting system. (Troubleshooting)
11. Study and demonstration of  
a) D. C. Electric Horn b) Electric Fuel Gauge c) Flasher Unit. d) Wiper Circuit
12. Study of automobile air conditioning system.

**Group B.**

- 1 Experiment on wheel balancing and front wheel alignment.
  - 2 Visit to servicing station for study of vehicle maintenance, repairs and report.
- OR
2. Visit to Automobile manufacturing industry.

**Text Books:**

1. "Automobile Engineering", Dr. Kirpal Singh (Vol. I and II) Standard Publishers, New Delhi.
2. "Automobile Mechanics", N K Giri.
3. "Automobile Engineering", G.B.S. Narang., Khanna Publication, 3rd Edition.
4. "Automotive Technology", H.M. Sethi. Tata McGraw-Hill Education, (2001).
5. "Automobile Engineering", Banga and Singh.
6. "Automotive Mechanics", Joseph Heitner, Affiliated Eastern Law House, 2nd Edition., (1967).
7. "Motor Vehicle Technology and Practical Work", Dolan. J.A., ELBS, (1978).
8. "Automobile Electrical Equipment", P.L. Kohali, Technical Education Series, 1st Edition.
9. "Automobile Engineering", R.B. Gupta, Satya Prakashan, 9th Edition.
10. "Automotive Excellence Volume 1 and 2", Gelncoe, Tata McGraw-Hill Publication.

**Reference Books:**

1. “Motor Vehicles”, Newton and Steed
2. “Motor Manuals (Vol I to VII )”, A.W. Judge., Chapman and Hall Publication.
3. “Automobile Mechanics”, W.H. Crouse., Tata McGraw Hill Publishing Co.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**  
**COMPUTATIONAL FLUID DYNAMICS (Elective I)**

**SUBJECT CODE: PCE ME 404**

**Teaching Scheme:**

Lectures: 3Hrs/Week

Practical: 2Hrs/Week

Credits:4

**Examination Scheme:**

ESE: 70Marks

CIE: 30Marks

Term Work: 25Marks

---

**Pre-requisites:** Fluid Mechanics, Heat and Mass Transfer, Applied Numerical Methods

**Course Objectives:**

The course aims to:

1. Provide Fundamental fluid dynamic principles and their applications.
2. Carry out research in the area of Computational Fluid Dynamics.
3. Provide students with the necessary skills to use commercial Computational Fluid Dynamics packages
4. Introduce the student to widely used techniques in the numerical solution of fluid equations, issues that arise in the solution of such equations, and modern trends in CFD.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Understand of the basic theory of Computational Fluid Dynamics, including discretisation, accuracy and stability.
2. Capable of writing a simple solver and using a sophisticated commercial CFD package.
3. Develop programming skills to solve some specific CFD problems.
4. Ability to assess fluid mechanics problems commonly encountered in industrial and environmental settings, construct and apply computational models, determine critical control parameters and relate them to desired outcomes and write reports.

**Unit 1 Introduction to Computational Fluid Dynamics and Principles of Conservation [08]**

Computational Fluid Dynamics: What, When, and Why? CFD Applications, Numerical vs. Analytical vs. Experimental, Modeling vs. Experimentation, typical problems, Problem Solving with CFD — Methodology, The Governing Equations of Fluid Dynamics and Heat transfer, Models of the flow- Control Volume, Fluid Element, Substantial Derivative, Divergence of Velocity, Continuity Equation Different Models and their Equivalence, Integral versus Differential Form of the Equations, The Momentum Equation, The Energy Equation, Summary Equations for Viscous Flow (the Navier-Stokes Equations) Equations for Inviscid Flow (the Euler Equations) Forms of the Governing Equations Particularly Suited for CFD

## **Unit 2 Basic of Discretization and Grid Generation**

[06]

Basic aspects of discretization - Discretization techniques Finite difference - Finite volume and Finite element method Comparison of discretization by the three methods, Transformation of non-uniform grids to uniform grids - General transformation of the equations -Form of the governing equations suitable for CFD - Compressed grids - Boundary fitted co-ordinate systems Elliptic grid generation - Adaptive grids - Modern developments in gridgeneration.

## **Unit 3 Finite Difference Method**

[06]

Finite Difference Formulations: Introductory remarks, Taylor Series Expansions,. Finite difference equations, Central Forward, Backward Numerical error, Explicit, Implicit, Semi-implicit(Crank- Nicholson method), Solution methods Direct, Iterative, Thomas algorithm, Gauss- Jacobi, Gauss- seidal method, Alternate Directional Implicit, Applications. 1-D examples, 2-D examples.

## **Unit 4 Finite Volume Method**

[08]

### **i. For Diffusion**

Introduction, FVM for 1D steady state Diffusion, FVM for 2 D Diffusion

### **i. For Convection Diffusion**

Introduction, Steady 1-D Convection and Diffusion, Central Differencing, Upwind Differencing, Hybrid Differencing, Power Law Scheme, QUICK scheme.

## **Unit 5 Introduction to Solution Algorithms for Pressure Velocity Coupling in Steady Flows and Turbulence and Multiphase Modeling(Introductory Treatment)**

[06]

Introduction, staggered grid, introduction to SIMPLE, SIMLEC, SIMPLER, PISO algorithms, Modeling of multiphase problems, Level set methods, VOF method. Coupled LS+VOF.

## **Unit 6 Introduction to Turbulence and its Modeling**

[06]

What is turbulence?; Transition from laminar to turbulent flow; Effect of turbulence on time averaged Navier -Stokes equations; Characteristics of simple turbulent flows; Introduction to Turbulent Models like Mixing length Model, k-epsilon model, Reynolds stress equation models, Algebraic stress equation models; Some recent Advances, introduction to LES, DNS.

**Term Work:**

1. Simulate and solve two problems, each 2-d and 3-d steady and unsteady flows using any commercial CFD package like Ansys-FLUENT, STAR CCM, FLUIDYNE, Ansys-CFX, Open Source etc.
2. Write codes using C, C++, SciLab for at least one each, 1-d and 2-d steady flows and do the post processing to verify with analytical results.

**Text Books:-**

1. "Computational Fluid Mechanics the Basics with Applications", Anderson J. D. Jr, Tata McGraw Hill Education Pvt.Ltd.
2. "An Introduction to Computational Fluid Dynamics the Finite Volume Method" H. K. Versteeg and W. Malalasekera, Pearson Publication.
3. "Numerical Heat Transfer Fluid Flow", Suhas V. Patankar, Taylor and Francis.
4. "Introduction to Computational Fluid Dynamics", Pradip Niyogi, S. K. Chakrabarty, M. K. Laha, Pearson Publication.
5. "Introduction to Computational Fluid Dynamics: Development, Application and Analysis", Atul Sharma, Wiley

**Reference Books:-**

1. "Computational Fluid Dynamics: A Practical Approach", Jiyuan Tu, Guan Heng Yeoh, Chaoqun Liu, Butterworth-Heinemann.
2. "Computational Fluid Dynamics", T. J. Chung, Cambridge University Press.
3. "Introduction to Computational Fluid Dynamics", Anil W. Date, Cambridge University Press.
4. "Convective Heat and Mass Transfer", S. Mostafa Ghiaasiaan, Cambridge University Press.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**

**Process Equipment Design (Elective- I)**

**SUBJECT CODE: PCE ME 404**

**Teaching Scheme:**

Lectures: 3Hrs/ Week

Practical: 2Hrs/Week

Credits:4

**Examination Scheme:**

ESE: 70 Marks

CIE: 30Marks

Term Work: 25Marks

---

**Pre-requisites:** Heat and Mass Transfer.

**Course Objectives:**

1. Acquaint several design codes used in the design process.
2. Study design of process equipments such as pressure vessel, storage tank, heat exchanger etc.

**Course Outcomes:**

1. Illustrate understanding of process design parameters.
2. Design and develop pressure vessels.
3. Demonstrate capabilities developed for designing storage tank, agitators.

**Unit 01**

**(6)**

**Process Design Parameters**

Basic concepts in process design, block diagrams for flow of processes, material flow balance. Importance of codes and standards and their applications. P and ID, Process Data Sheet, PFD and other documents used for designing. Review of Design pressures, temperatures, design stresses, factor of safety, minimum shell thickness and corrosion allowance, weld joints efficiency, design loading, stress concentration and thermal stresses, failure criteria. Selection of material for process equipment's using ASME Codes.

**Unit 02**

**Design of Pressure Vessels**

**(8)**

Types of pressure vessels, selection of various parameters for their design Pressure vessel subjected to Internal Pressure: Complete design as per ASME code of Cylindrical and spherical

shells. Design of various end closures such as: Flat, Hemispherical, Torrispherical, Elliptical and Conical.

Design of openings: nozzles and manholes. Design of Flanged joints; Gasket selection and design of supports for process vessels. Pressure vessel subjected to External Pressure: Design of shell, heads, nozzles, flanged joints and stiffening rings.

### **Unit 03 (6)**

#### **Design of Tall Vessels and Large Storage Tanks**

(a) Determination of equivalent stress under combined loadings including seismic and wind loads application of it to vertical equipment like distillation column.

(b) Design of Storage Tanks:

Study of various types of storage vessels and applications. Atmospheric vessels, vessels for storing volatile and non-volatile liquids. Various types of roofs used in storage vessels. Manholes, nozzles and mounting design. Design of Rectangular tanks.

### **Unit 04 (6)**

#### **Vessel Supports**

Introduction and classification of supports. Design of skirt support considering stresses due to dead weight, wind load, seismic load and periodic vibration. Design of base plate, skirt bearing plate, anchor bolts. Design of Lug and bracket support.

### **Unit 05 (6)**

#### **Process Piping Design**

Flow diagrams and pipe work symbols, design of layout of water, steam and compressed air pipes work, pipe fitting, linings and flanged connections. Types of valves used on pipe line. Fabrication of pipe lines, expansion joints and pipe supports.

### **Unit 06 (6)**

#### **Heat Exchangers**

Heat exchangers: Design of vessels, Design of Shell and Tube Heat Exchanger, Study and design of various types of jackets like plain half coil, channel, limpet coil.

#### **Agitator**

Study of various types of agitators and their applications. Baffling, Power requirement of agitation. General design of agitator including blades, shaft, blade assembly.

**TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

- 1) Design of Pressure vessels and large tanks.
- 2) Design of Heat exchangers used in industries.
- 3) Design and development of equipment useful to process industries such as sugar, cement, chemical industries.
- 4) Preparing flow diagrams of processes, piping layout, etc.
- 5) Report based on visit to industries such as sugar, cement, chemical industries.

**TEXT BOOKS:**

- 1) "Process Equipment Design", Dr. M.V. Joshi, Mc-Millan Publication.
- 2) "Process Equipment Design", Browell and Young, Wiley India.
- 3) "Chemical Equipment Design", B.C. Bhattacharya.

**REFERENCE BOOKS:**

- 1) "Plant Design and Economics", Max and Timasulaus Kalus, Tata McGraw Hill.
- 2) "Industrial Instrumentation Servicing Hand Book", Cannel Grady, Tata McGraw Hill.
- 3) "Handbook of Instrumentation and Control", Kellen Heward, Tata McGraw Hill.
- 4) "Chemical Engineering Handbook", Perry John, Tata McGraw Hill.
- 5) "Industrial Pipe Work", D.N.W. Kentish, Tata McGraw Hill.
- 6) "Chemical Engineering", J.M. Coulson, Richardson, Sinnott, Maxwell, McMillan Publication.
- 7) "Pressure Vessel Design Hand Book", H. Bedna.
- 8) "Dryden's Outlines of Chemical Technology", Roa M. Gopala, Sitting M., East West Press Pvt. Ltd., New Delhi.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**

**ADVANCED FOUNDRY TECHNOLOGY (Elective I)**

**SUBJECT CODE: PCE ME 404**

**TeachingScheme:**

Lectures: 3Hrs/ Week

Practical: 2Hrs/Week

Credits:4

**ExaminationScheme:**

ESE: 70 Marks

CIE: 30Marks

Term Work: 25Marks

---

**Course Prerequisites:**

1. Manufacturingprocesses,
2. Thermodynamics
3. Machinedrawing,
4. MachineDesign

**Course Objectives:**

1. To acquaint students with the basic concepts of foundry processes
2. To impart knowledge of Ferrous and Non Ferrous Metal Processing
3. To study casting design process
4. To analyze the casting process

**Course Outcomes:** At the end of this course, student will be able to

1. Understand the basic casting design procedure.
2. Understand fundamental knowledge of Ferrous and Non-Ferrous Metal.
3. Design of the castings for different application.
4. Understand the need of castability.

## **Unit 1: Metalcasting—overview**

**(6)**

Applications and production, historical perspective, casting process, sand casting, characteristics of sand casting processes, Classification, metal mold casting processes and casting processes using other mould/core materials, Pattern materials, types of patterns, Mould and core making materials and their characteristics, investment casting, die casting, ferrous casting, nonferrous castings, new casting development

## **Unit 2: Solid modeling of casting**

**(8)**

Elementary aspects of pattern and mould design using CAD software. Resin bonded mould and core making processes and machines. Special casting processes and their applications - low pressure die casting, investment casting, squeeze casting,

Casting features, modeling techniques, graphical user interface, model representation, model exchange format, model verifications.

## **Unit 3: Pattern mold and core design**

**(8)**

Mould production - equipment for moulding, moulding technique - pattern utilization, hand and machine compaction, machine moulding, mould drying and hardening. Cores and core making - core boxes, compaction, core hardening, closing of mould.

Orientation and parting, mould parting analysis, pattern design, core features, core print design and analysis, Mould cavity layout

## **Unit 4: Feeder and Gating design and analysis**

**(8)**

Casting solidification, solidification time and rate, feeder location and shape, feeder and neck design, feed aid design, solidification analysis, vector element method, optimization and validation, examples based on feeding design

Mould filling, gating system and types, gating channel layout, optimal filling time, gating element design, mould filling analysis, numerical simulation, optimization and validation, examples based on gating design

## **Unit 5: Process planning and costing**

**(6)**

Casting process selection, process shapes and parameters, tooling cost estimation, material cost estimation, conversion cost estimation product design for castability, castability analysis

## **Unit 6: Quality control in foundry**

**(6)**

Melting and quality control of various steels and non-ferrous alloys - casting defects - fettling, inspection and testing of castings. Prediction of casting defects - porosity, segregation, shrinkage and hot tearing. Casting defects, their causes and remedies. Shop floor quality control tests such as composition control, Wedge test, fluidity, temperature measurement. Casting Modification by different methods like Friction stir processing.

## TERMWORK

1. Design of pattern layout for a given component
2. Design of gating system for a given component (ferrous/nonferrous)
3. Design of riser ring system for a given component (ferrous/nonferrous)
4. Design for pressure die casting/centrifugal casting
5. Study of TS/ISO/QS norms for foundry industry
6. Industrial visit to a modern foundry and its report  
(Use of computer in design is essential)

## Text Books

- 1) Metal casting: computer aided design and analysis, B. Ravi, Prentice Hall India.
- 2) Principles of Metal Castings-Heine, Loper and Rosenthal (TMH)
- 3) Principles of Foundry Technology-P.L. Jain (TMH)

## REFERENCE BOOKS

- 1) Indian Institution of Foundry men-Foundry Journal
- 2) Advanced Pattern Making-Cox I.I. (The Technical Press, London.)
- 3) ASM Handbook-Vol. 15 Castings. (McGraw Hill)
- 4) Metal Castings-Principles & Practice-T.V. Ramana Rao. (New Age Publishers.)
- 5) AFS and Control handbook-AFS.

**Examination Scheme:**

ESE: 70 marks

CIE : 30 marks

Term work: 25 marks

Pre- requisites: Fluid Mechanics, Materials Science, Hydraulics and Pneumatics, I. C. Engines.

**Course Objectives:**

1. To identify components and design configurations of Aircraft.
2. To understand basics of aerodynamics and structure of Aircraft.
3. To impart the knowledge about various systems of Aircraft.
4. To study different materials of Aircraft.

**Course Outcomes:** At the end of this course students will be able to:

1. Describe the basic components and various types of aircraft configurations.
2. Discuss the basics of aerodynamics and structure.
3. Outline the working of various power plants used in aircraft.
4. Discuss the principles and working of various systems involved in aircraft.
5. Describe the significance and suitability of different aircraft materials.

**UNIT I**

**Introduction to Aircraft:**

**[6]**

Types of Aircrafts-Lighter than Air/Heavier than Air aircrafts Conventional Design configurations based on power plant location, Wing vertical location, intake location, tail unit arrangements, landing gear

arrangements. Unconventional configurations- Biplane, variable sweep, canard layout, twin boom layouts, span loaders, blended body wing layout, STOL and STOVL Aircraft, stealth Aircraft. Advantages and disadvantages of these configurations.

## **UNIT II**

### **Basics of Aerodynamics and Structures:**

[8]

Aerofoil Nomenclature, Types of Aerofoil, Wing section- Aerodynamic Center, Aspect Ratio, Effects of lift, drag speed, air density on drag. Forces on the airplane, Airflow over wing section, Pressure Distribution over a wing section, Generation of Lift, Drag, Pitching Moments, Types of Drag, Lift curve, Drag Curve, Lift/ Drag Ratio Curve, Factors affecting lift and drag, Center of pressure and its effects. Basic components of an Aircraft, structural members, Aircraft Axis system, Aircraft Motions, Control surfaces and high lift devices.

## **UNIT III**

### **Introduction to Propulsion System:**

[6]

Principles of aircraft propulsion, Types of power plants, basic components in power plants - inlet, compressor, combustion chamber, turbine and nozzle. Types of fuel - Illustration of working of air breathing engines.

## **UNIT IV**

### **Aircraft Mechanical, Electrical and Electronic Systems:**

[8]

Types of Mechanical Systems, Environmental control systems (ECS), Pneumatic systems, hydraulic systems, Fuel systems, Landing gear systems, Engine Control systems, Ice and rain protection systems, Cabin pressurization and air conditioning systems, steering and brakes systems auxiliary power unit, avionics, Flight controls, Autopilot and Flight management systems, Navigation systems, Communication, Information systems Radar system. fire protection systems, de- icing and anti -icing system.

## **UNIT V**

[6]

### **Aircraft Fuel and Hydraulic Systems:**

Characteristics of aircraft fuel system. Gravity feed and pressure. A generalized fuel system. Fuel pumps- classification. Fuel control unit. Engine starting sequence. Starting and Ignition systems. Engine oils and a typical lubricating system. Hydraulic fluid. Hydraulic system and components. Study of typical workable system. Power packs. Hydraulic actuators. Pneumatic system and components. Use of bleed air. Emergency lowering of landing gear and braking. Shock absorbers - Retraction mechanism.

## **UNIT VI**

### **Introduction to Aircraft Materials:**

[6]

General properties of materials, Definition of terms, Requirements of aircraft materials, Testing of aircraft materials, Inspection methods, Application and trends in usage in aircraft structures and engines, Introduction to smart materials and nanomaterials; Selection of materials for use in aircraft.

**TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

1. Assignment on Study of basic components and design configurations of Aircraft.
2. Assignment on Study of Aerodynamics and structures of Aircraft.
3. Assignment on Study of Mechanical systems of Aircraft.
4. Assignment on Study of Electrical and Electronic systems of Aircraft.
5. Assignment on Study of Fuel supply system and Hydraulic, Pneumatic systems of Aircraft.
6. Assignment on Study of different Aircraft materials.
7. Two reports on Industrial Exposure or Visit.

**Practical Exposure:**

With an intent to get some exposure on Aerospace and related industries, the colleges can arrange

- Industry visits to some of the Industries in Aerospace like HAL (Hindustan Aeronautics Ltd.), NAL (National Aerospace Ltd.), ISRO (Indian Space Research Organization) and students need to submit a report on the learning from the visits.  
(OR)
- Visits to Aerospace Museums  
(OR)
- Building Miniature models of Aircraft/ Gliders etc. as Hands on Exercises conducted as competitions.

**TEXT BOOKS:**

1. Fundamentals of Flight, Shevell, Pearson Education, 2nd Edition.
2. Mechanics of Flight by A.C Kermode, Pearson Education, 5th Edition
3. Ian Moir and Allan Sea bridge, Aircraft Systems: Mechanical, Electrical and Avionics-Subsystem Integration,, AIAA Educational Series, 2001.
4. Aircraft Material and Processes, Titterton G F, English Book Store New Delhi, 1998

**REFERENCE BOOKS:**

1. Flight without Formulae by A.C Kermode, Pearson Education, 10<sup>th</sup> Edition
2. Introduction to Flight by Dave Anderson
3. Treager, S., "Gas Turbine Technology", McGraw Hill 1997.
4. William A Neese, Aircraft Hydraulic Systems, Himalayan Books; 2007.
5. S R Maunder, Pneumatic Systems,, Tata McGraw Hill Publishing Co.; 1995.
6. Advanced Aerospace Material, H Buhl, Springer Berlin 1992
7. 'Aircraft Maintenance and Repair', Frank Delp, Michael J. Kroes and William A. Watkins, Glencoe and McGraw- Hill , 6<sup>th</sup> Edition, (1993).

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**

**TOTAL QUALITY MANAGEMENT (Elective-II)**

**SUBJECT CODE:PCE ME 405**

**Teaching Scheme:**

Lectures: 3Hrs.perweek

Practical- 2 Hrs. per week

Credit: 04

**Examination Scheme:**

ESE: 70Marks

CIE: 30Marks

Term Work: 25 Marks

Practical/Oral : 00 Marks

**Pre-requisites:**

**Course Objectives:**

- 1 Know the concept of total quality and role of quality assurance.
- 2 Understand planning and controlling techniques for quality
- 3 Understand the key issues and some popular approaches to TQM implementation
- 4 Know the reliability approach for quality
- 5 Understand the current trends in TQM

**Course Outcomes:** At the end of this course, student will be able to

- 1 Understand the concepts of total quality and quality assurance approaches.  
They will identify and solve issues in quality related problems in manufacturing or
- 2 service sector at various stages by using various TQM tools and techniques,
- 3 Understand vendor rating and select suitable vendor

- 4 Interpret various quality attributes and discuss the various quality approaches.
- 5 Calculate reliability of system

6 They will identify and solve issues in industries using the various techniques of TQM such as 5S, JIT, TPM, Reliability Engineering, Quality Circle etc.

Unit 1      **Quality Assurance System:**      [6]

Concept of total quality ,role and objectives of Q.A. Q.A. cycle, process approach to Q.A. (input-process-output), Information feedback, Significance of feedback and field complaints analysis in Q.A., Significance of internal customer approach, Defect prevention programs for Q.A.

Unit 2      **Planning and Controlling Techniques for Quality**      [7]

Planning for quality – The dimensions of Quality(quality of Design, conformance, performance and service) Quality planning with vendors, Vendor control procedures, Vendor-rating.

Controlling techniques for quality – Seven statistical tools, Process capability analysis, Problem solving new management tools, Why-why analysis, Six sigma-Concept, Need, Implementation.

Unit 3      **Robust and Reliable Product Approach for Quality**      [7]

Product and system reliability: Basic concepts, Prediction and evaluation of parallel, Series and combined system reliability, Reliability tests (life testing, burn - in test, accelerated life testing),

FMEA; and FTA, Taguchi's quality Philosophy, System design, Parameter design, Tolerance design, Orthogonal arrays, S/N ratio, Loss functions.

Unit 4	<b>Principles and Approaches to TQM:</b>	[6]
	<p>Basic concepts: definition of TQM, TQM and traditional management approach, Principles, characteristics, and benefits of TQM. Approaches to TQM: Deming's approach, Juran's trilogy, Crosby and quality improvement, Ishikawa's CWQC.</p>	
Unit 5	<b>The Essentials of TQM:</b>	[7]
	<p>Customer Focus, -Customer perception of quality, Quality policy deployment, Quality function deployment, Voice of customer, Customer satisfaction, Kano's model of satisfaction, Customer retention.</p> <p>TQM Leadership- Role and commitment and accountability of leadership, Quality policy and objectives, Organizational structure for TQM, Role of HR in TQM, Training for TQM, Developing quality culture.</p> <p>Tools and Techniques for TQM: 5-Scampaign, TEI, quality circles, QFD, poka-yoke, KAIZEN</p>	
Unit 6	<b>Current Trends in TQM:</b>	[7]
	<p>TQM in service sector: Definition and meaning and service, problems in defining service quality, attributes of service quality, SERVQUAL model, Implementing TQM in service industries, Measurement system for service quality.</p> <p>Quality Management Systems: ISO9001:2008 Series Standards—Clauses, contents, interpretation and implementation, audit Sector Specific Standards—AS9100, ISO/ TS 16949, TL9000,</p> <p>Quality Awards: National and International quality awards, Criteria and case studies.</p>	

## **TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

Term Work: case studies through industrial visits on:

1. Tools and techniques of TQM
2. TQM implementation in manufacturing sector
3. TQM implementation in Service Sector
4. ISO 9001-2008 implantation.

(Presentation is preferable for case studies)

### **Content Assessment Tool**

1. case studies on above topic
2. case studies on above topic
3. case studies on above topic
4. case studies on above topic.
5. Four assignments based on the syllabus

## **TEXT BOOKS:**

- 1 “Practical Reliability Engineering”, Patrick D.T. O’connor, , Wiley India, (ISBN 978-81-265- 1642-1), 4th Edition.
- 2 “Total Quality Management–Text and cases”, Jankiraman and Gopal, Prentice Hall India Publication. (ISBN 978-81-203-2995-9).
- 3 “Total Quality Management” Dr. Suri and Dr. Sharma, Wiley Publication, (ISBN 978-93- 5004-317-2).
- 4 “Total Quality Management”, Dr. Rajaram, Wiley Publication, (ISBN 978-81-7722-63-2).

## **REFERENCE BOOKS:**

- 1 “Total Quality Management”, Dale H. Besterfield, et.al., Pearson Education, Asia (ISBN 978-81-317-3227-4).

- 9 “Fundamentals of Quality Control and Improvement”, Amitava Mitra Pearson Education, Asia.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**

**Industrial Product Design (Elective- II)**

**SUBJECT CODE:PCE-ME-405**

**TeachingScheme:**

Lectures: 3Hrs/ Week

Practical: 2Hrs/Week

Credits:4

**Examination Scheme:**

ESE: 70Marks

CIE: 30 Marks

Term Work: 25Marks

---

**Pre-requisites:** Machine Design, Manufacturing Engineering.

**Course Objectives:**

The course aims to:

1. Study the various parameters in product design and development like
  - Finding Customer Need
  - Doing Market Research in various parameters for product
  - Product Specification criteria
  - Product Architecture and Prototyping
  - Cost and Value Engineering
  - Design for Manufacturing and Assembly
  - Standards in Ergonomics and Industrial Safety
2. Practice exposure to Case Studies and CAD Software with a product case.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Find the Customer Needs for a Quality Product through Market Research in product development process, Concept Generation, Selection and Testing.
2. Describe basics of Product Architecture, Prototyping and Cost and Value Engineering. Select the Standard Ergonomics and Industry Safety parameters in Product Design.

**Unit01**

**[06]**

**Introduction**

Challenges of product development, Identify customer needs, Successful product development, Quality aspect of product design, Market Research, Survey.

## **Unit02**

**[07]**

### **Product Development Process and Planning**

Innovation and Creativity in Product Design, Product Planning Processes, Product specifications: Process of setting specifications. (Concept Generation–Selection–Testing)

## **Unit03**

**[07]**

### **Product Architecture**

Product Architecture: Implication of architecture, Establishing the architecture, Related system level design issue, Product Data Management, Use of Computerized Data Management and Process, Industrial Design: Overview.

## **Unit04**

**[07]**

### **Design for Manufacturing and Assembly**

Tolerance, Design of Gauges, Design for Environment, Prototyping, Engineering Materials, Concurrent Engineering, Product Costing, Value engineering.

## **Unit05**

**[08]**

### **Aesthetics:**

Aesthetic Considerations, Visual Effects of Form and Color in Product Design.

### **Ergonomics:**

Ergonomics and product design and automated systems, Anthropomorphic data and its applications in ergonomic design, Limitations of Anthropomorphic data, General approach to the Man-Machine Relationship - Work station Design and environment (working position and posture).

### **Control and Displays:**

Configurations and sizes of various controls and displays, Design of controls in automobiles, machine tools etc., Design of instruments and controls.

## **Unit06**

**[05]**

### **Industrial Safety:**

An approach to Industrial Design - Elements of Design Structure for Industrial Design in engineering applications in manufacturing systems. Personal protective Equipment and Environment Control Prevention and specific safety measures for manufacturing and processing industry and chemical industry.

### **Term Work:**

1. Case Study on any TWO (by a group, a group of Min. 02 and Max. 04 students to be presented in front of all students) covering following points,

- a. Product Development Process /Planning.
- b. Product Architecture.
- c. Design for Manufacturing.
- d. Design for Assembly.
- e. Aesthetic and Ergonomic considerations in Product Design.
- f. Industrial Safety in Machine and Equipment Handling.
- g. Health Safety in Product Design.
- h. Environmental Safety and ISO 14000 Systems.

2. Development of any Product using high end CAD software considering following points.

- a) Need of Customer, Methodology of Market Survey.
- b) Invention / Innovation of a product with modifications required.
- c) Aesthetics (Form and Color) and Ergonomics consideration in design.
- d) Preparation of various Views of the product.
- e) Design for Assembly Procedures.
- f) Product and Maintenance Manual.
- g) Product Database Management.

A report should be prepared with details, drawing sheet, Bill of Material, Assembly–Disassembly Procedure, Maintenance Manual and Cost Estimation (if required) Presentation of the product designed.

#### **Text Books:**

1. “Product Design and Development”, Karl T. Ulrich, Steven G. Eppinger; Irwin Tata McGraw Hill, 3rd Edition.
2. “Product Design and Manufacturing”, A.C. Chitale and R.C. Gupta, Prentice Hall of India, 3rd Edition.
3. “Product Design”, Otto and Wood, Pearson Education.
4. “Human Factor Engineering”, L P Singh, Galgotia Publication Pvt. Ltd, 1st Edition.

#### **Reference Books:**

1. “New Product Development”, Tim Jones, Butterworth, Heinemann, Oxford, (1997).
2. “Assembly Automation and Product Design”, Geoffrey Boothroyd, Marcel Dekker, CRC Press.
3. “Industrial Product Design”, C W Flureshem.
4. “Industrial Design for Engineers”, Mayall W.H, London, Hiffee Books Ltd.
5. “Introduction to Ergonomics”, R.C. Bridger, Tata McGraw Hill Publication

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**  
**ADVANCED FORMING PROCESSES (Elective-II)**  
**SUBJECT CODE:PCE-ME-405**

**TeachingScheme:**

Lectures: 3Hrs/Week

Practical: 2Hrs/Week

Credits:4

**ExaminationScheme:**

ESE: 70Marks

CIE: 30Marks

Term Work: 25Marks

**Course objectives:**

The course aims to:

1. Understand the fundamentals of various traditional, nontraditional and advanced metalforming processes
2. Study different types of traditional, nontraditional and advanced metal working processes, their advantages, limitations and applications
3. Understand how the processes are carried out in industry

**Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Solve for strain rates, temperatures and metallurgical states in forming problems using constitutive relations
2. Develop process maps for metal forming processes using plasticity principles
3. Estimate formability limits for bulk metals and sheets
4. Evaluate high energy rate deformation process parameters.

**Unit 1 Introduction and Fundamentals of Forming Processes: [05]**

Importance of manufacturing technology, Classification of manufacturing processes, Selection of materials and manufacturing processes. Study of various forming processes their significance and comparison of various manufacturing processes on different criteria. Need for near net shape manufacturing.

Theory of elasticity, Simple Stress and Strains- Elastic stresses and strains, Plastic stresses and strains, Poisson's ratio, True stress and True strain, Empirical relations for the stress strain curve, Idealized stress strain curve. Two and three dimensional stresses and strains- Principal stresses and strains, Mean (Hydrostatic) stress and stress deviators, Principal strains, Equilibrium in Cartesian, cylindrical and spherical coordinates

**Unit 2 Theory of Plasticity [07]**

Theory of dislocations, Slip line field theory, Slab method and lower and upper bound methods for load, their significance in investigating and modeling of metal working operations. Plastic work. Yield criteria- Tresca and Von-mises yield criteria, General plastic stress-strain relations (Theory of plasticity). Effect of Temperature on plastic deformation, Cold forming- and effect of annealing on cold formed materials- recovery, Recrystallization and grain growth, warm forming and hot forming. Effect of strain rate on plastic deformation and super plasticity. Effect of friction and lubrication in metal forming. Classification of forming processes on various criteria

### **Unit 3 Bulk Forming of Metallic Materials [08]**

**Forging Processes:** Introduction to types of forging and forging equipment's, Modeling of forging process, Calculation of forging loads in closed die forging, Effect of forging variables on properties, forging die design, Design principles, Pre form design considerations and die materials, Forging Defects.

**Rolling Process:** Introduction to types of rolling and rolling mills, Forces and geometrical relationships in rolling, Simplified analyses of rolling load, Variables, Torque and power, Roll pass design, Rolling mill control, Theories of cold rolling, hot rolling, transverse rolling, Rolling of bars and shapes. Rolling defects

**Extrusion:** Classification and applications, Extrusion equipment. Hot and cold extrusion, hydrostatic extrusion. Patterns of metal deformation in extrusion, Analyses of extrusion process, Extrusion Defects.

**Rod, Wire and Tube Drawing:** Classification of drawing processes. Rod Drawing, Wire Drawing, Tube Drawing. The Drawing Die. Modeling of Drawing Process.

### **Unit 4 Sheet Metal Forming Processes: Introduction and Classification [07]**

**Shearing Processes:** Classification and applications, Open Contour Shearing, Closed Contour Shearing. Shearing mechanism.

**Bending Processes:** Applications, Bending Parameters, Spring back in Bending, Residual stresses in bending. Bending equipment, Press Brake, Roll Bending Machines and Contour Roll forming.

**Stretch Forming:** Applications, Stretch forming machines and accessories.

**Deep Drawing:** Applications. Deformation zones in deep drawing, Blank holding pressure. Ironing. Deep Drawing force. Limiting Drawing Ratio. Effect of Anisotropy. Redrawing.

### **Unit 5 High Velocity Forming and High Energy Rate Forming [06]**

Introduction and Classification. Characteristics of HVF and HERF Processes.

**High Velocity Forming Machines:** Pneumatic (Compressed air) Hammer, Compressed Gas Forming Hammer, Gas Combustion High Speed Hammers,

**High Energy Rate Forming Processes:** Explosive Forming, Principles and Types of Explosives. Classification of Explosive Forming Methods, Process variables, Failure of Formed products, Advantages and limitations,

**Electro Magnetic Forming:** Principles of the process, Basic Methods of Electromagnetic Forming, Pressure required in EMF, Advantages and Limitations of EMF. Safety Considerations.

**Electro Hydraulic Forming:** Principles of the Process, Energy requirements, Process variables, Advantages and Limitations, Future of HVF and HERF.

### **Unit 6 Recent Trends in Forming: [07]**

Thixo-forging, isothermal forging, super plastic forming technology, forming of super conductors, forming of ceramics and glasses, Forming of plastics and composite materials- Extrusion, Form moulding, Thermo forming, Cold forming and Solid phase forming, Design and economic considerations.

**Rubber Pad Forming** (Flexible – Die Forming) and **Hydro forming** (Fluid forming Processes).

**Spinning:** Conventional spinning, Flow Turning (Shear spinning), Tube spinning,

**Super Plastic Forming of Sheets:** Blow Forming and Vacuum Forming, Thermo forming Methods, Super Plastic Forming/ Diffusion Bonding Process. Sheet Metal Formability, Testing of Formability, Forming Limit Diagrams.

### **Term Work:**

1. One exercise each on i. Rolling ii. Forging iii. Extrusion, iv. Wire and deep drawing forming processes
2. Four exercises on High velocity and high energy rate forming
3. Industrial visits to observe bulk metal, sheet metal and High velocity and high energy rate forming processes

**Text Books:**

1. "Modern Manufacturing", MikellGroover, Wiley publication.
2. "Mechanical Metallurgy", George E. Dieter, Tata McGraw Hill Education (India) Pvt. Ltd. 3rd Edition, ( ISBN 978-1-25-906479-1), (2013).

9. "Roll Forming Handbook", Geotge T. Halmos CRC Press, Taylor and Francis(ISBN :0-8247-9563-6) ,(2006).

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final Year B.Tech(Mechanical Engineering) CBSE PATTERN Semester VII**

**DESIGN OF THERMAL SYSTEM(Elective-II)**

**SUBJECT CODE:PCE ME 405**

**TeachingScheme:**

Lectures:3Hrs/Week

Practical:2Hrs/Week/Batch

Credits:4

**ExaminationScheme:**

ESE: 70Marks

CIE:30 Marks

TermWork:25Marks

---

**Pre-requisites:** Applied Thermodynamics, Heat and Mass Transfer.

**Courseobjectives:**

The course aimsto:

1. Learn Thermal system designmethodology.
2. Understand real life situations and be able to decide an approach for problemsolving.
3. Design simple thermal systems with advanced tools where in integration of more than one component is required.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Understand the thermal system designmethodology.
2. Decide an approach to solve real life thermal system designproblems.
3. Design simple thermal systems with advanced computer aidedsystems.
4. Gain confidence in problemsolving.

**Unit 1**

**Introduction to ThermalSystemDesign**

**[06]**

Classification of design, Optimal and nearly optimal design, Methodology of design, Aspects of thermal system design, Assessment concept and creation, Component modeling.

**Unit 2**

**Design ofRefrigerationSystem**

**[07]**

Design of basic components of refrigeration system, Design of refrigeration systems: vapour compression system- Household refrigerator, Ice plant, Vapour absorption systems using waste heat and solar energy.

**Unit 3**

**Heat Transfer and Design Analysis of AirConditioningSystem**

**[07]**

Design of Air conditioning systems: Design considerations, Load calculations, Single unit room air conditioners, Central air conditioning plant, Industrial drying systems, Component selection and Computer Aided PipingDesign.

#### **Unit 4**

##### **Design of Solar System**

[07]

Design of solar assisted water heating systems, Preliminary specifications, Concepts development, detailed design for feasibility study, Component design.

#### **Unit 5**

##### **Design of Advanced Cooling Systems**

[06]

Design of advanced heat exchanger networks, Design of electronic miniature cooling systems, Utilization of Nano- Fluids for cooling systems.

#### **Unit 6**

##### **Design and Economic Analysis of Waste Heat Recovery Systems**

[07]

Design of waste heat recovery systems, Design specifications, Concept development, Detailed specifications and component design, Thermo Economic Evaluation and additional costing Considerations.

#### **Term Work:**

Any six assignments to be completed

1. Design of water chilling plant
2. Design of cold storage plant
3. Design and optimization of fins
4. Design of waste heat recovery system for diesel power plant
5. Design of Dehumidification plant used for industrial drying.
6. Design of gas turbine system
7. Design of shell and tube heat exchangers

**\*(Designing of any one basic component with CAE software like ANSYS, HYPERWORKS)**

#### **Text Books:**

1. "HVAC System Design Handbook" ASHRAE.
2. "Design and Optimization of Thermal Systems", Yogesh Jalurkar, CRC Press.
3. "Design and Simulation of Thermal Systems", N.V. Suryanarayana, Oner Arici, Tata McGraw Hill Inc.
4. "Thermal System Design", Stoecker, Tata McGraw Hill Publication, 3<sup>rd</sup> Edition.

#### **Reference Books:**

1. "Essentials of Thermal System Design", C. Balaji, CRC Press.
2. "Design of Fluid Thermal Systems", Janna W.S., Cengage Learning, 4<sup>th</sup> Edition.
3. Online Tutorials and ANSYS User Guide.

## **Shivaji University Kolhapur**

**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**

### **SMART MATERIALS** (Elective-II)

**SUBJECT CODE:PCE ME 405**

#### **Teaching Scheme:**

**Lectures: 3 Hrs/ Week**

**Practical: 2 Hrs/ Week**

**Credits: 4**

#### **Examination Scheme:**

**ESE: 70 Marks**

**CIE: 30 Marks**

**Term Work: 25 Marks**

Pre-requisites: Mechatronics, Testing and Measurement.

**Course Objectives:** The course aims to:

1. The course is designed to give an insight into the latest development regarding, Smart materials & their types.
2. Study HBLS and LBHS based smart materials.
3. Study use of actuators and sensors in forming a smart system and its applications.
4. To know advances in smart structures and materials
5. To understand smart composites.

#### **Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Classify smart materials and explain their functions.
2. Explain the smart materials and their uses
3. Use of different sensors and actuators
4. Should suggest suitable material for actuators
5. Ability to interpret emerging technical literature related to smart materials and structures and demonstrates knowledge in a project.

#### **Unit 1 Overview of Smart Materials**

**[06]**

Introduction, Components of smart systems – Sensors, actuators, Transducers, MEMS, Introduction to piezoelectric materials, Magnetostrictive smart materials, Active smart polymers, Shape memory alloys

## **Unit 2 Types of Smart Materials**

**[06]**

Introduction to HBLS (high bandwidth low strain) generating smart materials- Piezoelectric and Magnetostrictive materials, LBHS (low bandwidth high strain) generating smart materials- Shape memory alloys and electro-active polymers.

## **Unit 3 Actuators Based on Smart Materials**

**[08]**

HBLS based actuators- Piezoelectric actuators- Induced strain actuation model, Unimorph and bimorph actuators, Actuators embedded in composite laminate. Magnetostrictive actuators - Mini actuators, Thermal instabilities, Magnetostrictive composites, MEMS based actuators. LBHS based actuators: Shape memory alloy based actuators, Electro-active polymer.

## **Unit 4 Sensors Based on Smart Materials**

**[06]**

Sensors based on HBLS smart materials- Piezoelectric sensors, Magnetostrictive sensors, MEMS sensors, Sensors based on LBHS smart materials- Shape memory alloy based encoders, EAP based sensors.

## **Unit 5 Integration of Smart Sensors and Actuators**

**[08]**

Case studies to advanced smart materials - Active fiber composites, Energy harvesting Actuators, energy Scavenging sensors, Self-healing smart materials

## **Unit 6 Applications of Smart Material**

**[06]**

Structural applications of smart materials, Structural acoustic control, and vibration control applications. Aerospace and transportation applications

### **Term work:**

Any eight assignments based on above syllabus.

### **Text Books:**

1. "Smart Materials and Structures", Gandhi, Thompson and Gandhi, ChapmanandHall London.
2. "Smart Structures and Materials", Bryan Culshaw, ARtech House, (1996).

**Reference Books:**

1. “Smart Material Systems and MEMS”, Vardhan, Vinoy, Gopalkrishanan, Willey India Edition.
2. Smart Structures, Gauenzi, P., Wiley, 2009, Dover Publication.

## **Shivaji University Kolhapur**

**Final Year B.Tech (Mechanical Engineering) CBCS PATTERN Semester VII**

**DESIGN FOR SUSTAINABILITY (Elective-II) SUBJECT**

**CODE: PCE ME 405**

### **Teaching Scheme:**

Lectures : 03 Hrs. per week

Practical : 02 Hrs. per week

Credit : 04

### **Examination Scheme:**

ESE : 70 Marks

CIE : 30 Marks

Term Work : 25 Marks

### **Pre-requisites:**

### **Course Objectives:**

- 1 Enable student to design products and equipment for sustainability
- 2 Use appropriate methodology to analyze and improve product design in terms of sustainability issues.
- 3 Know contextual factors impacting the engineering discipline.
- 4 Apply systematic engineering synthesis and design processes.

**Course Outcomes:** At the end of this course, student will be able to

- 1 Explain the role of sustainability in the design process
- 2 Describe principles of materials selection based on sustainable principles
- 3 Apply a systematic approach to system redesign in terms of energy efficiency, water efficiency and transport efficiency

- 4 Give examples of engineering innovation including sustainable design
- 5 Explain and Apply principles of disposal and recycling
- 6 Design the products that are environmental friendly.

**Unit 1 INTRODUCTION TO SUSTAINABILITY [06]**

Definition and Language of sustainability in engineering design, natural resource terminology, carrying capacity, strategies used during sustainable design scope and significance

**Unit 2 TOOLS AND TECHNIQUES [08]**

Lifecycle analysis, carbon footprint, lifecycle assessment (LCA) and its types & sustainable product design, lightweight and material reduction, whole system design, design for durability, repairs & upgrade, disassembly & recycling, reducing energy losses.

**Unit 3 FOUNDATIONAL CONCEPTS & PRINCIPLES [09]**

Infrastructure for managing flows of materials, energy and activities; sustainable value creation approaches for all stakeholders, environmental design characteristics; design changes & continual improvement; inclusive sustainable design principles, crowd sourcing, multiple-objective designs; infrastructures that support system thinking; knowledge management for sustainable design, learning systems and experimentation; smart data systems, understanding variation

**Unit 4 CONSIDERATION DURING SUSTAINABLE DESIGN [06]**

Industrial Ecology, Multiple Lifecycle Design, Green Engineering, Bio-mimicry, Design for environment, Design for Flexibility

## **Unit 5 HUMAN DESIGN**

**[07]**

Preservation for natural conditions, Urban design and Industrial sites planning with human and environmental comfort, simple case study of sustainability design consideration in the Automobile components, Components used in Industries and societal routine use.

## **Unit 6 ECONOMICAL ASPECTS AND CONSERVATION**

**[04]**

Economical aspects of sustainable design, energy conservation, water conservation, material conservation, bio-degradability of materials.

### **TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

1. Minimum Six Assignments based on the above syllabus.

**Note: Assignments should include case study of live example.**

### **TEXT BOOKS:**

- 1 “Design for Sustainability: A practical approach for developing economics”, M.R.M. Cruland J.C. Diehi, Delf, University of Technology, USA.
- 2 “Introduction to Sustainability”, Jong Jin Kim; National Pollution Prevention center for higher education.
- 3 “Design for Sustainability a Practical Approach”, Tracy Bhamra; Gower Publication.

### **REFERENCE BOOKS:**

- 1 “Integral Sustainable Design: Transformative Perspectives”, Mark Dekay Earth Scan an imprint of Taylor and Francis Group.
- 2 “Sustainable Energy Systems and Applications”, Ibrahim Dincer; Calin Zamfirescu Springer Publications.
3. Clarke, Abigail & John K. Gershenson 2006. Design for the Life Cycle. Life-cycle Engineering Laboratory, Department of Mechanical Engineering-Engineering Mechanics, Michigan Technological University.

- 4 Ramaswamy, Rohit, 1996. Design and Management of Service Processes: Keeping Customers for Life, Prentice Hall.
- 5 Finster, Mark P., 2013. Sustainable Perspectives to Design and Innovation.
- 6 Schmitt, Brent, Customer Experience Management, Wiley and Sons, 2003.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**  
**Flexible Manufacturing Systems (Elective II)**  
**SUBJECT CODE: PCE ME405**

**Teaching Scheme:**

Lectures: 3Hrs/Week

Practical: 2Hrs/Week

Credits:4

**Examination Scheme:**

ESE: 70 Marks

CIE: 30Marks

Term Work: 25Marks

---

**Pre-requisites:** Manufacturing Processes, Computer Integrated Manufacturing Systems.

**Course Objectives:**

1. To study fundamental concepts of flexible manufacturing systems
2. To familiarize students to various components of FMS.
3. To impart knowledge of flexible assembly systems.

**Course Outcomes: At the end of this course Students are able to**

1. Understand meaning of flexible manufacturing system
2. Know about activities in modern PPC system.
3. Explain the concept of group technology, and how it relates to cellular manufacturing.
4. Explore primary capabilities of flexibility in the FMS.
5. Explore automated inspection techniques.
6. Know about different types of FMS with components.

**Unit 1: Introduction and control structure of FMS: [07]**

Flexible and rigid manufacturing, F.M. Cell and F.M. System concept, Types and components of FMS, Tests of flexibility, Group Technology and FMS, unmanned factories, Economic and Social aspects of FMS. Architecture of typical FMS, Automated work piece flow, Control system architecture – Factory level, Cell level; hierarchical control system for FMS, transmission medium, signaling, network topology, Manufacturing Automation Protocol; communication interfaces, Structure and functions of manufacturing cell, Distributed Numerical Control (DNC), FMS Diagnostics, conceptual DBMS, relevance of DBMS in FMS

**Unit 2: Production planning and control in FMS: [07]**

Activities in modern PPC system, process planning, computer aided process planning systems- retrieval and generative, material requirement planning, and shop floor control, scheduling algorithms, heuristic approach and optimized production technology approach to scheduling, automated scheduling systems, inventory control in FMS, MRP-II or ERP

**Unit 3: Tooling and Fixturing in FMS: [08]**

Modern cutting tools and tool materials, tool holders, modular tooling, tool monitoring, presetting and offsets, wear and radius compensation, tool magazines, automatic tool changers, robotized tool assembly, tool management system Part holding on Pallets, standard fixtures, pallet changers, pallet pool, flexible fixturing – principles and methodologies, modular fixturing system: Tslot based, dowel pin based, fixturing components, computer aided fixture design – locating and clamping, use of GT in fixture design, fixture database

**Unit 4 : Group Technology and material handling in FMS: [09]**

GT concepts, Advantages of GT, Part family formation-coding and classification systems; Part machine group analysis, Methods for cell formation, Cellular vs. FMS production. Material Handling in FMS: Functions of an integrated material handling system in FMS, Flexibilities in material handling, Industrial robots for load / unload applications, Robotic cell layouts and FMS layouts, Automatically Guided Vehicles (AGVs) – types, features, guidance technologies and applications; Automated warehousing - AS/RS, storage and retrieval machines in AS/RS.

**Unit 5: Automated Inspection Systems: [05]**

Online offline inspection, automated inspection techniques, contact non-contact inspection, application of m/c vision system in inspection, CMM, study of inspection and post inspection software, FIS (flexible inspection system)

**Unit 6: Flexible Assembly Systems: [05]**

Basic Concepts, classification, planning and scheduling in FAS, loading and scheduling in F.A. cells. Lean & Agile Manufacturing: definition and principles of lean manufacturing, benefits, methodologies for transferring to lean manufacturing, definition, principles of agility, market forces and agility, reorganizing the production system for agility, managing relationships for agility.

**TERM WORK:**

Minimum eight assignments based on the following.

1. Develop a form code using any classification system for 3 parts.
2. Application of rank order clustering algorithm to identify logical part families and machines groups.
3. Exercise on any scheduling algorithm.
4. Exercise on flexible Fixturing.
5. Simulation of FMS shop, using Simulation software package (like ARENA, OpenCIM/ OpenFMS or equivalent) using various modules like Arrive, Server, Depart, Simulate modules, Creating models of FMS shops and simulating the performance to obtain output results
6. Exercises on assessment of performance of batch production systems for the following measures  
a) Manufacturing lead time, b) Work - in - process, c) Machine utilization

**TEXT BOOKS:**

1. Flexible manufacturing systems in practice applications, design and simulation: by Joseph Talavage et al. Publisher: Taylor and Francis US
2. Computer integrated design and manufacturing by Bedworth et al. McGraw-Hill, 1991
3. Performance modeling of automated manufacturing systems by N. Viswanadham, Y. Narahari-1992
4. Automation, production systems and computer integrated manufacturing by Groover- Pearson education
5. CAD/CAM by P.N. Rao, Tewari NK, Kundra TK, "Computer Aided Manufacturing", Tata McGraw Hill Publications
6. FMS By H K Shivanand

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBSE PATTERN Semester VII**

**SEMINAR**

**SUBJECT CODE:PCC ME 406**

**Teaching Scheme:**

Practical: 02Hrs/week

**Credit:1**

**Examination Scheme:**

Term Work: 25 Marks

**Course Objectives:-**

The course aims to:

1. Create awareness about latest technological aspects
2. Improve presentation and communication skills
3. Improve skills related to search on the internet
4. Motivate for research in respective area
5. Provide platform for interaction amongst students on advanced and/or emerging topics of technology.

**Course Outcomes:-**

Upon successful completion of this course, the student will be able to

1. Have and develop presentation skills.
2. Impart knowledge in different aspects of knowledge domains.
3. Make them aware of knowledge in industry perspective and new industry trends.
4. Build confidence and improve communication skills.
5. Collect ideas through literature survey about new innovations, analyze and present them.
6. Sharpen their personality and intelligence.

**Schedule for the semester**

1. **1st week:** Discussion of relevance, objectives and outcome expectations with students.
2. **2nd to 4th week:** Preliminary discussions, topic identification and synopsis submission, topic approval by guide.
3. **5th to 10th week:** Collecting detailed information, discussion with guide, preparation of Seminar report and PPT, approval from guide.
4. **11th to 14th week:** Seminar delivery by each student for 20 minutes followed by question answer session and discussion for 10 minutes. Each student should deliver seminar in front of other students from the batch, guide and another expert appointed by HOD

**Topic selection**

Individual student shall chose seminar topic from engineering/allied/applied field under the guidance of allotted guide. Student should collect information from reference books, handbooks, technical research journals, catalogues, etc. related with the topic and beyond the details covered in the curriculum of mechanical engineering undergraduate course.

**Instructions for report writing and presentation**

Prepare two hard copies of seminar report of 20 to 30 pages each (one for student and other for department). For standardization of the seminar reports the following format should be strictly followed. Student should also submit soft copy of the seminar report and presentation.

1. Page size: Trimmed A4
2. Top Margin: 1.00 Inches
3. Bottom Margin: 1.32 Inches
4. Left Margin: 1.5 Inches
5. Right Margin: 1.0 Inches
6. Para Text: Font - Times New Roman; 12 Point
7. Line Spacing: 1.5 Lines
8. Page Numbers: Right aligned and in footer. Font Times New Roman; 12 Point
9. Headings: Times New Roman, 14 Point, Boldface
10. Certificate: All Students Should Attach Standard Format

The entire seminar should be documented as one chapter. The usual steps involved in writing report are: (a) logical analysis of the subject-matter; (b) preparation of the final outline; (c) preparation of the rough draft; (d) rewriting and polishing; (e) preparation of the final bibliography; and (f) writing the final draft. For more details about report writing and formats students and guide are advised to refer, "Kothari, C.R., *Research Methodology Methods and Techniques*, New Delhi, New Age International (P) Ltd., Publishers, 2nd Edition, 2004" Record of the referred literature should be submitted in either hard or soft form at the time of seminar presentation.

#### **Seminar work load**

1. 2 hours work load/practical batch/faculty

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final Year B.Tech (Mechanical Engineering) CBCS PATTERN Semester VII**

**SUMMER INTERNSHIP**

**SUBJECT CODE: -SI ME 407**

**Teaching Scheme:**

Credits: 01

**Examination Scheme:**

Term Work: 25 Marks

---

**Course Objective:**

The course aims to:

1. Familiar the students to realize an industrial work.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Comprehend the knowledge gained in the coursework
2. Create, select, learn and apply appropriate techniques, resources, and modern engineering tools.

**Industrial Training**

The students have to undergo an industrial training of minimum two weeks in an industry preferably dealing with Mechanical engineering during the semester break after Sixth semester and complete within 15 calendar days before the start of seventh semester. The students have to submit a report of the training undergone and present the contents of the report before the evaluation committee constituted by the department. An internal evaluation will be conducted for examining the quality and authenticity of contents of the report and award the marks at the end of the semester.

It is expected that students should undertake small assignment or work related to any of the course related aspect. Report is based on compilation of work carried out related to facility and layout planning, Industrial engineering- time study and motion study, Line efficiency evaluation and improvement, Process capability evaluation, Industrial automation, Process or machinery modification as identified.

**Industrial Training Report Format:**

Maximum fifteen students in one batch, involving three groups of maximum five students, shall work under one Faculty. The same group shall work for project under the same guide. However, each student should have different industrial training and its presentation.

The report should be of 20 to 30 pages. For standardization of the report the following format should be strictly followed.

1. Page Size: Trimmed A4
2. Top Margin: 1.00 Inch
3. Bottom Margin: 1.32 Inches
4. Left Margin: 1.5 Inches
5. Right Margin: 1.0 Inch
6. Para Text: Times New Roman 12 Point. Font

7. Line Spacing: 1.5Lines
8. Page Numbers: Right Aligned at Footer. Font 12 Point. Times New Roman
9. Headings: Times New Roman, 14 Point ., Bold Face
10. Certificate: All students should attach standard format of Certificate as described by the department. Certificate should be awarded to batch and not to individual student. Certificate should have signatures of Guide, Head of Department and Principal/Director.

The entire report should be documented as one chapter with details like

1. “Name of Industry with address along with completed training certificate”
2. Area in which Industrial training is completed

**All Students have to present their reports individually.**

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VII**

**PROJECT PHASE-I**  
**SUBJECT CODE: PW ME408**

**Teaching Scheme:**

Practical: 2 Hrs/Week/Batch  
Credits: 3

**Examination Scheme:**

Term Work: 25 Marks  
Oral Exams: 25 Marks

**Course Objectives:**

The course aims to:

1. Embed the skill in group of students to work independently on a topic/ problem/ experimentation selected by them and encourage them to think independently on their own to bring out the conclusion under the given circumstances of the curriculum period in the budget provided with the guidance of the faculty.
2. Encourage creative thinking process to help them to get confidence by planning and carrying out the work plan of the project and to successfully complete the same, through observations, discussions and decision making process.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to:

1. Improve the professional competency and research aptitude in relevant area.
2. Develop the work practice in students to apply theoretical and practical tools/techniques to solve real life problems related to industry and current research.

**Project Phase I Load:**

A batch of maximum three groups of four to five students per group, shall work under one Faculty member of department. The group of one student is strictly not allowed.

**Project Phase I Definition:**

The project phase I work can be a design project / experimental project and or computer simulation project on Mechanical engineering or any of the topics related with Mechanical engineering stream. The project phase I work is allotted in groups on different topics.

The students groups are required to undertake the project phase-I during the seventh semester and the same is continued in the eighth semester (Phase-II). Project Phase-I consists of reviews of the work carried earlier and the submission of preliminary report. Report should highlight scope, objectives, methodology, approach and tools to be used like software and others, outline of project and expected results and outcome along with timeframe.

The project phase I work is to be extended for project phase II at B. E. (Mech.) Sem. VIII with same group working under guidance of same Faculty member assigned for project phase I.

**Project Phase I Term Work:**

The term work under project submitted by students shall include

1. Work Diary: Work Diary maintained by group and countersigned by the guide weekly. The contents of work diary shall reflect the efforts taken by project group for
  - a. Searching suitable project work
  - b. Brief report preferably on journals/research or conference papers/books or literature surveyed to select and bring up the project.

- c. Day to day activities carried out related to project work for entire semester.
- d. Synopsis.

The group should submit the synopsis in following format

- i. Title of Project
  - ii. Names of Students
  - iii. Name of Guide
  - iv. Relevance
  - v. Present Theory and Practices
  - vi. Proposed work
  - vii. Expenditure
  - viii. References
2. The synopsis shall be signed by each student in the group, approved by the guide and endorsed by the Head of the Department
  3. Presentation: The group has to make a presentation in front of the Faculty members of department at the end of semester.

### **Project Phase I Report Format:**

Project Phase I report should be of 25 to 30 pages (typed on A4 size sheets). For standardization of the project phase I reports the following format should be strictly followed.

1. Page Size: Trimmed A4
2. Top Margin: 1.00 Inch
3. Bottom Margin: 1.32 Inches
4. Left Margin: 1.5 Inches
5. Right Margin: 1.0 Inch
6. Para Text: Times New Roman 12 Point Font
7. Line Spacing: 1.5 Lines
8. Page Numbers: Right Aligned at Footer. Font 12 Point. Times New Roman
9. Headings: Times New Roman, 14 Point, Bold Face
10. References: References should have the following format  
For Books: "Title of Book", Authors, Publisher, Edition  
For Papers: "Title of Paper, Authors, Journal/Conference Details, Year

### **Important Notes:**

- Project group should continue maintaining a diary for project and should write (a) Book referred (b) Company visited (c) Person contacted (d) Computer work done (e) Paper referred (f) Creative thinking.
- The Diary along with Project Phase I Report shall be assessed at the time of oral examination
- One copy of the report should be submitted to Institute/ Department, One copy to Guide and one copy should remain with each student of the project group.

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VIII**  
**Mechatronics**

**SUBJECT CODE:PCC ME 409**

**Teaching Scheme:**

Lectures : 03 Hrs. per week

Practical : 02 Hrs. per week

Credit :04

**Examination Scheme:**

ESE : 70Marks

CIE : 30 Marks

TermWork : 25Marks

External Oral : 25 Marks

**Pre-requisites:**

**Course Objectives:**

- 1 To learn how to apply the principles of Mechatronics and automation for the development of system.
- 2 To learn the automation technology and industrial automation as applications of Mechatronics in manufacturing system.
- 3 To supply qualified personnel to meet the requirement of specialist in Mechatronics.  
To prepare Mechanical Engineering students for advanced graduate studies in
- 4 Mechatronics, Manufacturing engineering and related field.

**Course Outcomes:** At the end of this course, student will be able to

- 1 Develop a simulation model for simple physical systems and explain Mechatronics design process.
- 2 Outline appropriate sensors and actuators for an engineering application
- 3 Write simple PLC programs
- 4 Explain various applications of design of Mechatronic systems

**Unit 1 Introduction to Mechatronics****6**

Introduction to Mechatronics, Mechatronics systems, multi discipline scenario Transducers & Sensors, Position Sensors: Limit switch, photoelectric switches, proximity sensors, incremental & absolute encoders, decoders & relays. Displacement: Potentiometer sensors, capacitive displacement sensors. Velocity sensors: Tachogenerator, use of encoders, advances in sensors.

**Unit 2 Signal Conditioning****6**

Signal conditioning process, Operational amplifier (inverting amplifier, non-inverting amplifier, summing, integrating amplifier, differentiating amplifier, logarithmic amplifier), protection, filtering, data acquisition, multiplexer, analog to digital converter (ADC), digital to analog converter (DAC). Sample and hold, demultiplexing. Polling and interrupts.

**Unit 3 Digital circuits, Microprocessor and Microcontroller****8**

Introduction to Digital logic gates, Boolean algebra, application of logic gates, Combinational and sequential logic, flip flop, D flip flop, JK flip flop, Master slave flip flop. Comparison between microprocessor and micro controller, organization of a microprocessor and microcontroller system, architecture of PIC controller, instruction types and set, Introduction and applications of Arduino and Raspberry, Pi microcontroller, Applications of microcontroller.

**Unit 4 Introduction to PLC****6**

Introduction, definition, PLC system and components of PLC input output module, PLC advantages and disadvantages. Ladder diagram & PLC programming fundamentals, machine control terminology, update – solve ladder – update, physical components Vs. program components.

**Unit 5 Applications of PLC****8**

Internal relays, light control example, disagreement circuit, majority circuit, oscillator, holding (sealed or latches) contacts, always ON always OFF contacts, fail safe circuits, PLC timer and counter functions – Introduction and types. Industrial applications – Automatic liquid filling system, liquid mixture, traffic control.

**Unit 6 Industrial control systems****6**

Introduction Human machine Interface (HMI), Difference between HMI and PLC, Introduction to SCADA and its industrial applications, motion controller, applications of RFID technology and machine vision, Introduction to DCS.

#### **TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

1. Trial on sensors (minimum four)
2. Assignment on Microprocessor and Microcontroller.
3. PLC programming on Industrial Applications based on Timers, Counters, internal relays (Minimum 4 applications)
4. Fabrication of Simple Mechatronics working project by a group of 4/5 students using hardware and suitable software.
5. Assignment on HMI and SCADA
6. Industrial visit to study Mechatronics system application & submission of visit report.

**Note: Mechatronics Laboratory is expected to have a simple 8 input 8 output PLC**

#### **REFERENCE BOOKS:**

- 1 Mechatronics – Mahalik, TATA McGraw Hill
- 2 Mechatronics – W. Bolton, Pearson education
- 3 Microprocessor 8085 – Gaokar
- 4 Introduction to PLC programming, NIIT
- 5 Programmable logical controller, Hackworth % Hackworth, Pearson Education
- 6 Programmable logical controller, Reis Webb, Prentice Hall
- 7 SCADA, Stuart A. Boyer, ISA Publication.
- 8 Mechatronics – Appu Kuttam, Oxford publications
- 9 Human Machine Interface – Dhananjay R. Kalbande, Prashant Kanade, Wiley Publications
- 10 Arduino - Richard Blum, Pearson education

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VIII**

**ENERGY AND POWER ENGINEERING**

**SUBJECT CODE:PCC ME 410**

**Teaching Scheme:**

Lectures: 3Hrs/Week

Practical: 2Hrs/Week

Credits:4

**Examination Scheme:**

ESE: 70Marks

CIE: 30Marks

Term Work: 25Marks

---

**Pre-requisites:** Basic mechanical Engineering, Thermodynamics, Heat and Mass Transfer, Fluid and Turbo Machinery.

**Course Objectives:**

1. Enable the student to estimate the potential of energy sources.
2. Acquire the knowledge of renewable sources of energy and utilization.
3. Understand the new trends in power and energy sectors.
4. Study various power stations, Performance and economic analysis.

**Course Outcomes**

1. Analyze the utilization of solar, wind energetic.
2. Demonstrate need of different energy sources and their importance.
3. Illustrate power plant economics.
4. Comprehend various equipment's /systems utilized in power plants

## **Unit 01**

### **Solarenergy**

**[07]**

Introduction to Renewable Energy sources, Solar potential, Solar radiation spectrum, Solar radiation geometry, Solar radiation data, Solar Collectors - flat plate, evacuated tube, Cylindrical parabolic, Concentrating paraboloid, Graphical representation of efficiency of various Collectors, Modern thermal energy storage - Ultra capacitors / Super capacitors, Super conducting materials, New generation batteries.

## **Unit02**

### **Solar photovoltaic system[08]**

Operating Principle of Photovoltaic cell concepts, Photo-cell materials, Cell module array, Series and parallel connections, Maximum power point tracking, Study of standalone system with battery and AC or DC load, Hybrid systems (Diesel-PV, Wind-PV, Biomass-Diesel systems), Applications, Introduction, Principle and operation of fuel cells, classification and types of fuel cell, Fuel for fuel cells, Application of fuelcells.

## **Unit03**

### **Wind energy [04]**

Wind parameters and wind data, Power from wind, Site selection, Wind energy conversion systems and their classification, Construction and working of typical wind mill, Introduction to OTEC.

## **Unit04**

### **I. Power plants [08]**

Different types of power plants – Thermal, Hydro, IC Engine, Gas Turbine, Nuclear and their characteristics, Combined Cycle, Pumped storage, Compressed Air storage power plants and their characteristics, Comparison of Power plants with respect to various parameters, Issues in Power plants,

### **II. Power scenario in India**

Power scenario in India and world, NTPC, NHPC and their role in Power development in India, Power generation in Private sector, Power distribution, Power grid corporation of India, State grids, Railway grids and International grids.

## **Unit05**

### **I. Instrumentation**

**[08]**

Flow measurement of feed water, fuel, air, steam with correction factor for temperature, Speed measurement, Level recorders, Radiation detectors, Smoke density measurement, Dust monitor, Flue gas oxygen analyzer – Analysis of impurities in feed water and steam – Dissolved oxygen analyzer – Chromatography – PH meter – fuel analyzer – Pollution monitoring instruments, Integration of instrumentation system.

### **II. LoadCurves**

Load Curves and Load duration curves (Numerical treatments), Performance and operational characteristics of power plants, Peak load, Intermediate load and Base load plants and their characteristics, Input output characteristics of power plants, Economic division of between Base load plant and peak load plants, Tariff methods.

## **Unit06**

### **Energy Marketing and Management[05]**

Energy Management, Energy Marketing: Selling and marketing in India, Creating supply chain in India, Successfully working with business and virtual teams in India, Navigating the financial, legal and accounting environment, Human Resources issues, India's business culture in energy sector, Conservation of energy.

### **Term Work**

1. Study of performance of solar collectors.
2. Demonstration and measurement of solar radiation using pyranometer.
3. Study of power plant instruments.
4. Study of combined cycle gas based and coal based Power plant.
5. Study of load curves and selection of plants for power generation.
6. Study of Indian electricity grid code.
7. Industrial visit to any power plant / Survey based / Project based industrial visit.
8. Energy Audit - Case study of an organization and report

**Text Books**

1. “Solar Energy”, S.P.Sukhatme and J.K.Nayak, Tata McGraw-Hill, 3<sup>rd</sup> Edition,(2008).
2. “Non-Conventional Energy Sources”, G.D.Rai.-Khanna Publisher, 4<sup>th</sup>Edition.
3. “Power Plant Technology”, M.M.ElWakil, Tata McGraw-Hill. Int, 2<sup>nd</sup> Edition. Reprint, (2010).
4. “Power Plant Engineering”, Domkundwar and Arora, Dhanpatrai andSons.
5. “Modern Power Engineering”, John Weisman and L.E. Eckart, Prentice Hall of India, (1985).

**Reference Books**

SHIVAJI UNIVERSITY, KOLHAPUR,  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VIII**

**Noise and Vibrations**

SUBJECT CODE: PCC ME 411

**Teaching Scheme:**

Lectures: 3Hrs/ Week

Practical: 2Hrs/Week

Credits: 4

**Examination Scheme:**

ESE: 70Marks

CIE: 30 Marks

Term Work: 25Marks

Oral Exam: 25 marks

---

**Pre-requisites:** Engineering Mathematics, Theory of Machines.

Course Objectives:

**The Course aims to**

1. Study basic concepts of vibration analysis.
2. Acquaint with the principles of vibration measuring instruments.
3. Create awareness about principles of sound level measurement and noise.

Course Outcomes:

**On Completion of the course, student will be able to**

1. Understand relevance of noise in mechanical systems.
2. Carryout measurement of various vibration parameters.
3. Analyze vibratory response of mechanical element/system.
4. Estimate natural frequency of mechanical element/system.
5. Develop mathematical model to represent dynamic system

**Unit 01**

**Introduction**

**(7) Hrs**

Vibration and oscillation, Causes and effects of vibrations, Vibration parameters – spring, mass, damper, Motion – periodic, non-periodic, harmonic, non- harmonic, Degree of freedom, Static equilibrium position, Vibration classification, Steps involved in vibration analysis, Simple harmonic motion, Equivalent stiffness of spring combination, un-damped free vibration.

**Unit 02**

**Single DoF System**

**(7) Hrs**

- a) Damped free vibrations, Types of damping, Logarithmic decrement and damping materials.
- b) Forced Vibrations: Types of excitation, Forced excitation, Transmissibility-Force transmissibility and motion transmissibility, Vibration isolators, commercial isolation materials and shock mounts.

### **Unit 03**

#### **Two DoF System**

**(6) Hrs**

- a) Free undamped vibrations – Principal modes and natural frequencies, Co-ordinate coupling and principalco-ordinates.
- b) Forced vibrations (Undamped) – Harmonic excitation, Vibration Dampers and absorbers.

### **Unit 04**

#### **Introduction to Multi DoF System**

**(7) Hrs**

- a) Free vibrations of Multi DOF System-Flexibility and stiffness influence coefficient matrix, Equation of motion.
- b) Rayleigh's method and Holzer method.

### **Unit 05**

#### **Vibration Measuring Instruments**

**(6) Hrs**

Instruments for measurement of displacement, velocity, acceleration and frequency of Vibration, Exciters FFT analyzer. Introduction to Condition Monitoring and Fault Diagnosis.

### **Unit 06**

#### **Introduction to Noise**

**(7) Hrs**

Frequency dependent human response to sound, Sound pressure dependent human response, Decibel scale, Relation among sound power, Sound intensity and sound pressure level, Non auditory effects of noise on people, Auditory effects of noise, Noise standards and limits, Ambient emission noise standards in INDIA.

### **TERM WORK:**

**Minimum Eight Experiments out of following list. (Any 8 out of 1 to 9)**

1. Experiment on equivalent spring mass system.
2. Experiment on study of forced vibration characteristics
3. Determination of logarithmic decrement for single DOF damped system
4. Experiment on torsional vibration of two rotors without damping
5. Experiment on torsional vibration of three rotors without damping
6. Use of different types of exciters for vibration analysis.
7. Measurement of vibration parameters using vibration measuring instruments
8. Introduction to FFT analyzer, and prediction of spectral response of vibrating machine from workshop.
9. Measurement of Noise by using noise measuring instruments.

### **TEXT BOOKS:**

1. "Mechanical Vibrations", Singiresu S. Rao, Pearson Education, ISBN –81-297-0179-0- (2004).
2. "Mechanical Vibrations", G. K. Grover, Published by Nemchand and Brothers, Roorkee.
3. "Mechanical Vibrations", Dr. V. P. Singh, Published by S. Chand and Sons New Delhi.
4. "Noise and Vibration Control", Leo L. Bernack, Tata Mc- Graw Hill Publication.
5. "Mechanical Vibration and Noise Engineering", A. G. Ambekar, Prentice Hall of India.
6. "Fundamentals of Vibrations", Balchandran Magrab, Cengage Learning.
6. "Theory of Vibrations with Applications", W. Thomson, Pearson Education, 2<sup>nd</sup> Edition.
7. "Mechanical Vibration", Dr Debabrata Nag, Wiley India Pvt. Ltd, ISBN 978-81-265-3090-8.

### **REFERENCE BOOKS:**

1. "Mechanical Vibration", Austin Church, Wiley Eastern. 2<sup>nd</sup> Edition.
2. "Schaum's Outline Series in Mechanical Vibration", S. Graham Kelly, 6<sup>th</sup> Edition.
3. "Kinematics, Dynamics and Design of Machinery", Waldron, Wiley India, 2<sup>nd</sup> Edition.
4. "Mechanical Vibrations", J.P. Den Hartog, Tata Mc Grawhill Book Company Inc., 4<sup>th</sup> Edition.
5. "Introduction to Dynamics and Control", Leonard Meirovitch, J. Wiley, New York.
6. "Elements of Vibration Analysis" Leonard Meirovitch, Tata Mc Graw-Hill, New York. 2<sup>nd</sup> Edition.
7. "Principles of Vibration", Benson H. Tongue, Oxford University Press., 4<sup>th</sup> Edition.
8. "Vibrations and Noise for Engineers", Kewal Pujara Dhanpat Rai and Sons, (1992).
9. "Mechanical Vibration", William J Palm III Wiley India Pvt. Ltd., ISBN 978-81-265-3168-4, 1<sup>st</sup> Edition.

SHIVAJI UNIVERSITY, KOLHAPUR,

Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VIII

**INDUSTRIAL ENGINEERING (ELECTIVE-III)**

**SUBJECT CODE: PCE ME 412**

**Teaching Scheme:**

Lecturers: 3Hrs/Week

Practical: 2Hrs/Week

Credits: 4

**Examination Scheme:**

CSE: 70Marks

CIE: 30 Marks

Term Work: 25Marks

**Pre-requisites:** Industrial Management and Operation Research

**Course Objectives:**

1. To introduce students the concepts, principles and framework of Industrial Engineering and various productivity enhancement techniques.
2. To understand Method study and time study techniques.
3. To acquaint the students with tools and technique of material handling.
4. To acquaint the students the concept of value analysis, job evaluation and merit rating.

**Course Outcomes:** At the end of this course, students are able to

1. Manage and implement different concepts involved in methods study and understanding of work content in different situations.
2. Measure and estimate standard time for job.
3. Understand different types of plant layouts.
4. Interpret job evaluation and merit rating.

**Unit 1: Introduction to Industrial Engineering Productivity**

[06]

(A) **Introduction to Industrial Engineering**—Definition, Scope, Responsibilities, Important contributors to I.E., Tools and techniques of industrial engineering. (B) **Productivity**—Concept, objectives, Factors affecting productivity, Tools and techniques to improve productivity, Productivity measurement models

**Unit 2: Method Study**

[08]

Historical background, role of work study in improving productivity, method study procedure, selection of jobs, information, collection and recording; Recording techniques, charts, diagrams, templates, models, critical analysis, development, installation, and maintaining better method

**Unit 3: Motion Study & Human Factor Engineering (Ergonomics)**

[06]

- A) **Motion Study:** Principles of motion economy, micro motion study, SIMO chart, MEMO motion study, cycle graph, chronocyclegraph
- B) **Human Factor Engineering (Ergonomics):** Introduction, objectives definition, man machine system, physiological work measurement, design of controls.

#### **Unit 4: Work Measurement (Time Study)**

[08]

Definition, objectives, procedure, time study equipment, performance rating, allowances, concept of normal time and standard time, calculation of standard time, work sampling, predetermined motion time analysis.

#### **Unit 5: Facility Design**

[06]

Plant site selection, factors influencing the selection, optimum decision on choice of site and analysis, types of plant layout, advantages and disadvantages of layout, principles and objectives of plant layout, tools and techniques of layout planning, material handling- Objective, elements, functions, principles, types of material handling equipments.

#### **Unit 6: Value analysis & Job evaluation and merit rating**

[06]

**A] Value analysis:** Definition, concept of approaches of value analysis and engineering, steps, evaluation, and applications of value analysis.

**B] Job evaluation and merit rating:** Definition, objectives, procedure of job evaluation, different schemes and their advantages and disadvantages.

#### **TERM WORK**

**Any Eight Assessments of the following:**

1. Problems on productivity.
2. Case study on method study.
3. Man; Machine chart program.
4. Two handed process chart.
5. Stop watch time study for an operation.
6. Work sampling.
7. Plant site location analysis.
8. Case study on Value analysis concept.
9. Case study on job evaluation and merit rating.

#### **TEXT BOOKS:**

1. Introduction to Work Study, ILO, Geneva and Oxford and IBH Publi. Co. Pvt.Ltd.
2. M. Telsang, "Industrial Engineering and Production Management", S. Chand Publication.
3. L.C. Jhamb, "Industrial Engineering", Everest Publication, Pune.
4. O.P. Khanna, "Work Study" Dhanpat Rai Publi. New Delhi.
5. M Mahajan, Industrial Engineering and Production Management, Dhanpat Rai and Co.
6. Banga and Sharma, Industrial Organization & Engineering Economics, Khanna publication.

#### **REFERENCE BOOKS:**

1. R.M. Barnes, "Motion and time study design and measurement of work" John Wiley & Sons Inc. 7<sup>th</sup> Edi.
2. H.B. Maynard and others, "Industrial Engg. Handbook" IV<sup>th</sup> Edi. McGraw Hill Publi.
3. J. Adam, E.E. R. J. Ebert "Production and Operation Management", Prentice Hall Englewood Cliff N.
4. David Sumanth, "Productivity Engg. And Management", Tata McGraw Hill, New Delhi.
5. Gavriel Salvendy "Hand book of Industrial engineering" John Wiley and sons, New York, 2007
6. M. I. Khan "Industrial engineering" New age international (P) Ltd, New Delhi, 2004.
7. International labour office, "Introduction to work study" Publisher International labour office, 1969.

Digitalized2008.

8. Introduction to Work Study by ILO, ISBN 978-81-204-1718-2, Oxford & IBH Publishing Company, New Delhi, Second Indian Adaptation, 2008.
9. Zandin K.B., Most Work Measurement Systems, ISBN 0824709535, CRC Press, 2002.

**SHIVAJI UNIVERSITY, KOLHAPUR**

**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VIII**

**PRODUCTION MANAGEMENT (ELECTIVE-III)**

**SUBJECT CODE: PCE ME 412**

**TeachingScheme:**

Lectures: 3Hrs/Week

Practical:2Hrs/Week

Credits:4

**ExaminationScheme:**

ESE: 70Marks

CIE: 30Marks

Term Work: 25Marks

**Pre-requisites: Mathematics, Production Engineering.**

**Course Objectives:**

The course aims to:

1. Get acquainted with basic aspects of Productionmanagement
2. Study various important planning, organizing and controlling aspects of Operations management
3. Study different operational issues in manufacturing and serviceorganizations.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to

1. The students will have fair understanding of the role of Production / Operations Management played in businessprocesses.
2. Emphasis on both familiarization of various production processes and service systems and quantitative analysis of problems arising in the management ofoperations.

**Unit 1 Introduction to Production Management**

**[07]**

Production types, Objectives and scope of Production Management(1), Production Planning and Control (PPC)- Definition and elements and activities of production planning and production control Relevance(2), Strategy formulation process(3), Order qualifiers and order winners(4), Strategic options for Operations- Product – Process Matrix(5), Product portfolio, Process technology(6), WCMpractices(7).

**Unit 2 Product and Process Design**

**[06]**

Determinants of process characteristics- Volume, Variety, Flow, Types of processes(1), Choice of Process, Equipment selection(2), Use of BEP in selection process- Product matrix(3). Estimation of Demand- Time series Analysis and causal forecasting techniques, Least square method, Moving average and exponential smoothing forecasting method(4) Role of Product Development in competitiveness(5), Product Life Cycle (PLC),Product Development Process (6).

**Unit 3 Capacity and Scheduling of Operations**

**[07]**

Capacity- Definition, Measure of Capacity(1), Capacity strategies,Estimation of number of machines(2), Overcapacity and under capacity factors, Aggregate Planning, Aggregate Planning

Strategies(3), Use of transportation model approach to aggregate planning Loading, scheduling and sequencing(4), Priority sequencing rules(5). Sequencing problems, n job 2 machines, n Job '3' machines(6). Forward and backward scheduling, Critical ratio scheduling, Production Control Activities(7)

#### **Unit 4 Supply Chain Management and Advanced Manufacturing Techniques [08]**

Concept of supply chain and supply chain management(1), Manufacturing supply chain, SCM activities, Supply chain strategies, Managing supply chain, Measuring supply chain performance(2),JIT Philosophy, Origin and core logic of JIT, Elements of JIT(3), Kanban System-Design of Kanban containers(4), JIT.Implementation issues and performance(5), Lean Manufacturing- Pillars(6), features and process comparison with Traditional Manufacturing(7-8).

#### **Unit 5 Total Productive Maintenance and Replacement [06]**

Introduction, Definition, Six big losses, Stages of maintenance(1), Pillars stages of TPM Development(2), Overall Equipment Effectiveness (OEE) (3) Computation Replacement - need, Replacement of items whose maintenance cost increases with time(4) (with and without considering time value of money), Replacement of items that fail suddenly(5-6)

#### **Unit 6 Production Economics [06]**

Demand and supply, Demand curve and supply curve(1), Equilibrium of supply and demand(2), Elasticity of demand Production function, Factors of production, Isoquants(3), Review - Time value of money, Cash flows(4), Evaluation criteria for capital projects(5) (investment) Payback period, IRR and BCR(6)

#### **Term Work:**

1. Presentation on Case study on "Interdepartmental relationship in a business organization"
2. Presentation on Case study on "Design for Manufacturing and Assembly".
3. Assignment on Demand Forecasting.
4. Problems on Job sequencing- Single Machine Scheduling, Priority Sequence and Johnson's Algorithm.
5. Presentation on Case study on "Implementation of JIT in a small/ medium company".
6. Problems on Estimate OEE and Replacement Analysis.
7. Exercises on Analyzing tools in Project preparation.
8. Presentation on World Class Manufacturing Practices like Toyoto Mfg. system, etc.

#### **Text Books:**

1. "Industrial Engineering and Production Management", Martand Telsang, S Chand and Company New Delhi, (2009).
2. "Productions and Operations Management", Kanishka Bedi, Oxford Higher Education., 3<sup>rd</sup> Edition.
3. "Production and Operation Management", Tripathi, , Scitech Publications.
4. "Production and Operation Management", S.N. Chary, Tata Mc Graw Hill, 5<sup>th</sup> Edition.

#### **Reference Books:**

1. "Production and Operations Management", Buffa. Elwood modern Wiley India, 8<sup>th</sup> Edition.
2. "Operation Management, Process and Value Chain", Krajewski and Ritzman, Malhotra Pearson Education.

3. "Production and Operations Management", Ashwathappa, Bhat , HimalayaPublishing
4. "Techniques of Value Analysis and Engineering", MilesLawrence.
5. "Operation Management Theory and Practice", Mahadevan B PearsonEducation,(2007)
6. "Operations Management" Kaitherand Frazer, CengagePublication
7. "Production and Operation Management", Everett E. Adam and Ebert, PHI Publication, ISBN no.9788120308381.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VIII**  
**Fracture Mechanics (Elective- III)**  
**SUBJECT CODE:PCE ME 412**

**Teaching Scheme:**

Lectures: 3Hrs/ Week

Practical: 2Hrs/Week

Credits: 4

**Examination Scheme:**

ESE: 70Marks

CIE: 30Marks

Term Work: 25Marks

---

**Pre-requisites:** Advanced strength of materials or theory of elasticity

**Course Objectives:**

1. Develop basic fundamental understanding of the effects of crack-like defects.
2. Identify and formulate the stress intensity factor ( $K$ ) for typical crack configurations
3. Identify and formulate the strain energy release rate ( $G$ ).
4. Identify and formulate  $J$  - integral and the stress and strain fields around a crack tip for nonlinear and elasto-plastic materials.
5. Define fracture toughness of materials using  $K_{IC}$ ,  $G_{IC}$  and  $J_{IC}$ .
6. Employ the standard and nonstandard fracture mechanics tests to determine the fracture toughness of materials.
7. Predict the fatigue life of structures using fracture mechanics approaches.

**Course Outcomes:**

1. Understand and account for the theoretical background of linear and nonlinear fracture mechanics.
2. Carry out fracture mechanics analysis and design, using handbooks, of simple crack problems in linear and nonlinear materials.
3. Determine the loading applied on a crack.
4. Evaluate fracture mechanics testing.
5. Carry out analyses of crack growth
6. Determine whether or not stable crack growth can become unstable.
7. Apply the knowledge from the course on practical cases where linear fracture mechanics is insufficient

**Unit01****[07]**

Fracture mechanics principles: Introduction and historical review, Mechanisms of Fracture, Sources of micro and macro cracks. Stress concentration due to elliptical hole, Griffith's energy balance approach. Fracture mechanics approach to design- strengths, stiffness and toughness. Stress intensity approach

**Unit02****[07]**

Linear elastic fracture mechanics, Crack tip stress and deformations, Relation between stress intensity factor and fracture toughness, Stress intensity factor. Dislocation theories of brittle fracture, ductile fracture, Notch effects, Fracture under combined stresses.

Fatigue Failure: Stress cycle, S-N curve, Description of fatigue fractured parts, Phases of fatigue fracture, Fatigue crack propagation, Effects of metallurgical variables, Temperature, Stress concentration, Size and surface factors, Fatigue under combined stresses.

**Unit03****[06]**

Elasto plastic fracture mechanics introduction, Elasto-plastic factor criteria, Crack-opening displacement (COD) and crack tip opening displacement (CTOD), J- Integral to solve energy of crack formation, the crack resistance (R-curves).

**Unit04****[07]**

Creep Failure: Creep curve, Structural changes and mechanisms during creep, Activation energy for steady-state creep, Fracture at elevated temperature.

Brittle Fracture: Transition temperature curves, Fracture analysis diagrams, various types of embrittlement, Fracture under very rapid loading.

**Unit05****[06]**

Ductile Fracture: Condition for necking, Dislocation and void formation activities, Types of fractured parts.

Assessment of Types of Fractures by Observation: Comparison between different fractured parts undergoing various type of fracture.

**Unit06****[07]**

Design Application of the Knowledge of Failure: Design considering fatigue-Geber's parabola, Soderberg equation, Lubricating optimally to combat bearing failures. Selection of materials to prevent seizure, galling, etc. Wear reduction techniques, Fracture toughness consideration in design.

**TERM WORK:**

Minimum eight assignments from the following

1. The Evaluation of Fracture toughness by Numerical Methods of finite elements.
2. Methods for Evaluating Fracture toughness by Numerical Methods of Finite Differences (FD).
3. Evaluating Fracture toughness by Numerical Methods of Boundary Integral Equations.
4. The Evaluation of Fracture toughness by Experimental Methods.
5. Study of the Methods for Evaluating Fracture toughness by Compliance Method.
6. The Evaluation of Fracture toughness by Photoelasticity.
7. The Evaluation of Fracture toughness by Interferometry and Holography.
8. The Experimental evaluation of Fracture toughness by
  - a. Plane strain fracture toughness method
  - b. J Integral
9. Comparison between computer modeling and Experimental verification of Fatigue properties of S-N diagram, fatigue limit, fatigue crack growth rate, Paris law.

**TEXT BOOKS:**

1. "Fracture Mechanics – Fundamentals and application", T.L. Anderson, CRC Press.
2. "Elements of Fracture Mechanics", Prashant Kumar, Tata McGraw –Hill, New Delhi.

**REFERENCE BOOKS:**

1. "Metal Fatigue Design and Theory", Madouyag, F.
2. "Fatigue Design of Machine Components", Sors, L., Pergamon Press.
3. "Fracture and Fatigue Control Structures", Rolfe, S.T. and Barson, J.M., Prentice Hall of India.
4. "Elementary Engineering Fracture Mechanics", Broek, D., Noordhoff.
5. "Mechanical Metallurgy", Dieter, G.E., Tata McGraw Hill Book Co., New Delhi.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VIII**

**Reliability Engineering (Elective- III)**

**SUBJECT CODE:PCE ME 412**

**TeachingScheme:**

Lectures: 3Hrs/ Week

Practical: 2Hrs/Week

Credits: 4

**ExaminationScheme:**

ESE: 70Marks

CIE: 30 Marks

Term Work: 25Marks

---

**Pre-requisites:** Manufacturing Engineering, Mathematics.

**Course Objectives:**

1. Introduce principles of reliability in engineering design.
2. Develop understanding of concepts of failures, maintainability and availability of the intended products/systems and services.
3. Develop an ability to analyze field failure data in order to evaluate system reliability.
4. Develop an ability to apply various reliability techniques to solve interdisciplinary reliability problems.

**Course Outcomes:**

1. Explain basics of reliability, maintain ability and availability and differentiate among them.
2. Apply fundamentals of reliability to estimate reliability of mechanical systems, electronic devices, software's and human.
3. Analyze field failure data for reliability analysis.
4. Evaluate system reliability using various techniques.

**Unit 01**

**Fundamentals of Reliability and its Measures**

**[07]**

Brief history of reliability, Concepts, Terms and definitions, System safety, Quality and reliability, Lifecycle cost of a product or system, System effectiveness, Concept of failure, Laws of probability, Random variables, Discrete and continuous probability distributions.

**Measures:** Reliability function, Hazard rate function, CDF, PDF, MTTF, MTBF, Median time to Failure, Mean, Mode, Median, Skewness, Kurtosis, Variance and standard deviation, Typical forms of hazard rate function, Bathtub curve.

## **Unit 02**

### **Reliability Distributions**

[06]

Basic reliability distribution, Conditional reliability, Constant Failure Rate (CFR) model, Binomial distribution, Normal, Poisson, Lognormal, Rayleigh, Weibull etc., Fitting probability distributions graphically and estimation of distribution parameters, Calculation of  $R(t)$ ,  $F(t)$ ,  $f(t)$ ,  $\lambda(t)$ , MTTF,  $t_{med}$ ,  $t_{mode}$  for above distributions.

## **Unit 03**

### **Reliability Evaluation of Systems**

[07]

System Reliability block diagram- Series configuration, Parallel configuration, Mixed configurations, Redundant systems, Standby redundant, Load sharing systems etc. High level versus low level redundancy, k-out-of-n redundancy, Network reduction and decomposition methods, Cut and tie set approach for reliability evaluation. Fault tree analysis (FTA), Success tree method, Failure mode and effect analysis (FMEA), Failure modes effects and criticality analysis (FMECA), Markov analysis, Monte Carlo simulation.

## **Unit 04**

### **Maintainability and Availability**

[07]

**Maintainability** - Objectives of maintenance, Types of maintenance, Concept of maintainability, factors affecting maintainability, System downtime, Measures of maintainability, Mean time to repair (MTTR), Analysis of downtime, Repair time distributions, Stochastic point processes, Reliability centered maintenance (RCM).

**Availability** - Availability concepts and definitions, important availability measures, Inherent, achieved and operational availability.

## **Unit 05**

### **Reliability Testing and Data Analysis**

[06]

**Reliability Testing** - Life testing, Burn-in testing, Acceptance testing, Accelerated life testing, highly accelerated life testing (HALT) and reliability growth testing.

**Data Collection and Analysis** - Data collection, Empirical methods, Estimation of performance measures for ungrouped complete data, Grouped complete data, Analysis of censored data, Pareto analysis, and Goodness-of-fit tests.

## **Unit 06**

### **Interdisciplinary Approach and Life Cycle Cost (LCC)**

[07]

Electronics - Reliability of electronic components, Component types and failure mechanism. Software - Introduction, errors, Software testing, Hardware/ software interface. Human reliability analysis (HRA) - Introduction, human error in maintenance, Impact on system reliability. Reliability costs, effect of reliability on LCC, Categories of costs, Calculation of LCC.

## **TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

### **Any Four Assignments out of following.**

1. Theory of Reliability and Probability.
2. Fitting probability distributions graphically and estimation of distribution parameters.
3. Numerical based on Reliability Evaluation of Systems.
4. Maintainability and availability
5. Reliability testing

## **TEXT BOOKS:**

1. "Introduction to Probability Models", Sheldon M. Ross, Elsevier, 9<sup>th</sup> Edition.
2. "An Introduction to Reliability and Maintainability Engineering", Charles E. Ebling, Tata McGraw Hill Education Private Limited, New Delhi (2004).
3. "Reliability Engineering", L. S. Srinath, East West Press, New Delhi (1991).
4. "Reliability Engineering", K. K. Agarwal, Springer International Edition.
5. "Reliability Engineering", E. Balagurusamy, Tata McGraw Hill.
6. "Reliability Engineering: Theory and Practice", Alessandro Birolini, Springer (2010).
7. "Reliability Evaluation of Engineering Systems: Concepts and Techniques", Roy Billinton and Ronald Norman Allan, Springer (1992).
8. "Practical Reliability Engineering", Patrick D. T. O'Connor, David Newton, Richard Bromley, John Wiley and Sons. (2002)
9. "Reliability Engineering: Probabilistic Models and Maintenance Methods", Joel A. Nachlas Taylor and Francis (2005).
10. "Reliability in Engineering Design", K. C. Kapur, L. R. Lamberson, John Wiley and Sons.
11. "Reliability Theory with Application to Preventive Maintenance", I. Gertsbakh, Springer Inc. Edition.
12. "Reliability Engineering and Quality Management", Onkar N. Pandey, Bhupesh Aneja, Katson and Sons.

## **REFERENCE BOOKS:**

1. "Reliability Engineering and Risk Analysis – A practical Guide", Mohammad Modarres, Mark Kaminskiy, Vasily Krivstov, CRC Press, Taylor and Francis Group.
2. "Life Cycle Reliability Engineering", Guangbin Yang, John Wiley and Sons (2007).
3. "Case studies in Reliability and Maintenance", W. R. Blischke, D.N.P. Murthy, John Wiley and Sons (2003).
4. "Maintenance, Replacement and Reliability: Theory and Applications", Andrew Kennedy, Skilling Jardine, Albert H. C. Tsang, CRC/Taylor and Francis (2006).
5. "Engineering Reliability – New Techniques and Applications", B.S. Dhillon, Chanan Singh, John Wiley and Sons (1981).
6. "Engineering Maintainability", B. S. Dhillon Prentice Hall of India., (1999).

## **SHIVAJI UNIVERSITY, KOLHAPUR**

**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VIII**

### **ADVANCED I.C.ENGINE (Elective –III)**

**SUBJECT CODE:PCE ME 412**

**Teaching Scheme:**

Lectures: 3Hrs/Week

Practical: 2Hrs/Week

Credits: 4

**Examination Scheme:**

ESE: 70 Marks

CIE: 30 Marks

Term work: 25Marks

---

**Pre-requisites: I C Engine****Course Objectives:**

The course aims to:

- 1) Understand modern fuel injection systems.
- 2) Understand thermodynamics of combustion phenomenon.
- 3) Understand cause of emission and its control.
- 4) Understand alternative fuels for I C engines.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to

- 1) Analyze fuel injection system of I C engines
- 2) Analyze the combustion in thermodynamic point of view.
- 3) Know design aspects of combustion chamber.
- 4) Know new trends in I C engines.
- 5) Know the modification in engines for alternative fuels.
- 6) Know advanced emission control methods

**Unit 1 SI Engines****[06]**

Review of SI engine, Over-expanded engine cycle, Fuel characteristics, Fuel rating. Modern Carburetor. Recent Spark Plug, Spark Timing. Multi-Point Fuel injection system and its components, Sensors and transducers, ECU. Feedback system, Airflow and fuel flow phenomenon, Fuel injection pumps.

**Unit 2 CI Engines****[06]**

Review of CI engine, Electronic fuel injection system, ECU, sensors and transducers, Feedback system, Fuel spray behavior, recent fuel injector and injection timing, Advance turbo charging system.

**Unit3 Combustion****[08]**

SI engine combustion phenomenon, Turbulence characteristics, Chamber optimization Strategy, Thermodynamic analysis of SI engine combustion (Combustion Analyzer) CI Engine combustion phenomena, Swirl, Swirl Measurement, Generation of Swirl during induction, Swirl within cylinder, Chamber optimization Strategy, Thermodynamic analysis of CI engine combustion (Combustion Analyzer)

**Unit4 Alternate Fuels****[07]**

Hydrogen and Fuel cells, Ethanol, Bio-Diesels, Alcohols, LPG- Engine Modification, Combustion and Emission characteristics of SI and CI Engine using alternative fuels.

**Unit5 Engine Emission, Pollution And Its Controls****[07]**

Formation of HC, NO<sub>x</sub>, CO mechanism, Smoke and Particulates emission, Methods of Controlling Emissions, Measuring Equipment's and methods, International and National Emission Norms

**Unit 6 Trends in IC Engines****[06]**

Variable Valve Timing, Recent CRDI engine, Variable Turbo Geometry system, 3- Way Catalytic Converter, Homogeneous Charge Compression Ignition, Variable compression ratio engine, Low Heat Rejection Engine, Lean Burn Engine, Six- Stroke Engine, Gasoline Direct Injection System.

**Term Work:**

Seven assignments (One Assignment on each unit and two assignments on unit three) and One case Study.

**Text Books:**

1. "Internal Combustion Engines Fundamentals", E. F. Obert, Harper and Row Publication, New York.
2. "Internal Combustion Engines", J. B. Heywood, McGrawHill.
3. "Internal Combustion Engines", Maleev, CBS Publication and Distributors.
4. "Internal Combustion Engines", J. Ganesan.

**Reference Books:**

1. "Internal Combustion Engines", Gills and Smith.
2. "Diesel and High Compression Gas Engines", J. M. Kates.
3. "Engg. Fundamentals of the I.C. Engines" W.W. Pulkrabek, Pearson Education.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final Year B.Tech(Mechanical Engineering) CBCS PATTERN Semester VIII**  
**MACHINE TOOL DESIGN (Elective III)**  
**SUBJECT CODE:PCE ME 412**

**Teaching Scheme:**  
Lectures:3Hrs. /Week  
Practical: 2Hrs./Week/Batch  
Credits:4

**Examination Scheme:**  
ESE: 70 Marks  
CIE: 30Marks  
Term Work: 25Marks

---

**Course Objectives:**

1. To understand core concepts of Machine Tool & ProductDesign.
2. To understand the basic approach for designing machine tool components and implement the appropriatemethod.
3. To compute the power requirements of various machinetools.
4. To learn to design quality based manufacturingsystem.
5. To learn to design a product using innovative concepts of 'ProductDesign'

**Course Outcomes:**

**At the end of this course the student will be able to -**

1. The student shall be able to apply the concepts of machine tool design.
2. The student shall be able to select the correct design approach & design the important components of machine tools.
3. The student shall be able to calculate the forces acting and the subsequent power requirements of machine tools.
4. The student shall be able to specifically design the critical components comprising a manufacturing system & emphasize on the quality of the system.
5. The student shall be able to analyse the various phases of the design cycle sequentially and envision the concept of "Scratch to Market" w. r. t a product.

**Unit-1**

**Introduction to Machine & Machine Tool**

**(06)**

Types, capabilities, features of construction like working & auxiliary motions in machine tools, parameters defining the working motions of a machine tool, machine tool drives, general requirements of machine tool design, methodology for machine tools design considering quality, quantity of production and economic aspects.

**Principle of Machine Tool Design** from the point of view of quality, production rate, strength, rigidity, assembly, ergonomics, aesthetics, maintenance and interchangeability

## **Unit-2**

### **a) Analysis of forces(2)**

Forces affecting machine tool elements, determination of motive power for different operating conditions, use of handbooks.

### **b) Design considerations and selection of standard components(3)**

Drive systems with pulleys, belts, ropes and chains; selection of oil seals, gaskets and electric motors from standard catalogues.

## **Unit-3**

### **Kinematics of Machine Tools(8)**

Classification of various driving systems, basic considerations in the design of drives, aims of speed & feed regulation, stepped regulation of speeds, design of gear box, laws of stepped regulations, selection of range ratio, G.P. ratio, break up of speed steps, structural diagram, Ray diagram & speed chart, design of feed box, machine tool drives using multiple speed motors, general recommendations for developing gearing diagram, determining the number of teeth on gears, stepless regulation of speed and feed rates.

## **Unit-4**

### **a) Design of Spindle & Spindle Support(3)**

Functions of spindle unit and requirements, materials and construction, spindle ends, spindle support, design calculations, mounting arrangements of spindle bearings, spindle bearing lubrication

### **b) Selection of Machine Tool Bearing (4)**

Journal, rolling and hydrostatic bearings, basic principles, assembly, mounting and maintenance, procedure for selection of bearings from manufacturer's catalogue based on load and life considerations

## **Unit-5**

### **a) Design of Machine Tool Structures(5)**

Functions of machine tool structures and their requirements, design criteria, materials, static and dynamic stiffness, profiles of machine tool structures, basic design procedure, design of beds, columns, housings, rams etc, Causes of vibrations in machine tools and methods of elimination.

### **b) Design of Guideways (5)**

Functions and types of guide ways, materials, design criteria and calculations of slide-ways based on wear and accuracy, design of anti-friction guide ways, hydrostatic and hydrodynamic lubrication of guide ways.

## **Unit-6**

### **Recent Trends of Machine Tool Design(5)**

Recent trends in machine tools, Design considerations for SPM, NC/CNC, Micro/Nano machining, Retrofitting, Autonomous machine tool, Installation, Calibration and Machine tool testing.

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**

**DESIGN OF AIRCRAFT SYSTEMS (Elective–III)**

**SUBJECT CODE: PCE ME 412**

**Teaching Scheme:**

Lectures: 3 Hrs/Week

Practical: 2 Hrs/Week

Credits: 4

**Examination Scheme:**

ESE: 70 Marks

CIE: 30 Marks

Term Work: 25 Marks

---

**Pre-requisites:** Analysis of Mechanical Elements, Machine Design, Theory of elasticity.

**Course Objectives:**

The course aims to:

1. Study the fundamentals of aircraft design and structural analysis.
2. Study structural analysis of various components like plates, shells, beams.
3. Know about airworthiness.
4. Study aircraft structural repair.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to

1. Understand the basics of aircraft systems and aircraft structures.
2. Know industry practices on design of aircraft structures and systems.
3. Understand the applicability of design aspects in aircraft design.
4. Relate the theoretical knowledge with the design of aircraft structures and systems.

**Unit 01**

**Fundamentals of Aircraft Design and Structural Analysis**

**(6)**

Introduction, Phases of Aircraft Design, Aircraft Conceptual Design Process, Conceptual Stage, Preliminary Design, Detailed Design, Design Methodologies Review of Hooke's Law, Principal stresses, Equilibrium and Compatibility, Determinate Structures, Conservation of Energy, Stress Transformation, Stress Strain Relations.

**Unit 02**

**Aircraft Structures and Loads**

**(7)**

Types of Structural members of Fuselage and wing section Ribs, Spars, Frames, Stringers, Longerons, Splices, Sectional Properties of structural members and their loads, Types of structural

Joints, Type of Loads on structural joints Aerodynamic Loads, Inertial Loads, Loads due to engine, Actuator Loads, Maneuver Loads, VN diagrams, Gust Loads, Ground Loads, Ground conditions, Miscellaneous Loads.

### **Unit 03**

#### **Structural Analysis of Aircraft Structures - I (7)**

**Theory of Beams-** Stress distribution diagram for cantilever and simply supported beam. Equation of Bending. Symmetric Beams in Pure Bending, Deflection of beams, Unsymmetrical Beams in Bending, Plastic Bending of beams, Shear Stresses due to Bending in Thin Walled Beams, Bending of Open Section Beams, Bending of Closed Section Beams, Shear Stresses due to Torsion in Thin Walled Beams.

### **Unit 04**

#### **Structural Analysis of Aircraft Structures - II (7)**

**Theory of Plates** -Analysis of plates for bending, stresses due to bending, Plate deflection under different end conditions, Strain energy due to bending of circular, rectangular plates, Plate buckling, Compression buckling, shear buckling, Buckling due to in plane bending moments, Analysis of stiffened panels in buckling, Rectangular plate buckling, Analysis of Stiffened panels in Post buckling, Post buckling under shear

### **Unit 05**

#### **Structural Analysis of Aircraft Structures - III (7)**

**Theory of Shells**-Analysis of Shell Panels for Buckling, Compression loading, Shear Loading/Shell Shear Factor, Circumferential Buckling Stress.

**Theory of Torsion**-Assumptions in theory of pure torsion, Torsion equation for solid and hollow circular shaft. Shafts of Non-Circular Sections, Torsion in Closed Section Beams, Torsion in Open Section Beams, Multi Cell Sections

### **Unit 06**

#### **Airworthiness and aircraft Structural Repair (6)**

Airworthiness Regulations, Regulatory bodies, Type Certification, General Repair, Airframe Requirements, Landing Requirements, Fatigue and Failsafe Requirements. Types of Structural damage, Nonconformance, Rework, Repair, Allowable Damage Limit, Repairable Damage Limit, Overview of ADL Analysis, Types of Repair, Repair Considerations and best practices

#### **Term Work:**

##### **Eight Assignments based on the Syllabus.**

Out of eight, two assignments should contain the following:

- Hands-on calculation on Exercises related to Fundamentals of Structural Analysis
- Hands-on Calculation on Exercises involving, plate theory, beam theory and shell theory, Panel buckling, Shear flow Exercises in Aircraft Structures.

#### **Industrial Visits**

With an intent to get some exposure on Aerospace and related industries, arrange

- Industry Visits to some of the Industries in Aerospace like HAL (Hindustan Aeronautics Limited), NAL (National Aerospace Limited), ISRO (Indian Space Research Organization) OR
- Visits to Aerospace Museums OR

- Building miniature Models of Aircraft /Gliders etc as a Hands on Exercises conducted as competitions

#### **Text Books:**

1. "Aircraft Design-A Conceptual Approach", Daniel P. Raymer, AIAA Education Series, 6th Edition.
2. "Airframe Structural Design", Michael Niu, Conmilit Press, 2nd Edition (1988).
3. "Airframe Stress Analysis and Sizing", Michael Niu, Conmilit Press, 3rd Edition (1999).

#### **Reference Books:**

1. "Mechanics of flight", A.C. Kermode, Pearson Education, 5th Edition.
2. "The Elements of Aircraft Preliminary Design", Roger D. Schaufele, Aries Publications (2000).
3. "Aircraft Structural Maintenance", Dale Hurst, Avotek publishers, 2nd Edition (2006).
4. "Aircraft Maintenance and Repair", Frank Delp, Michael J. Kroes and William A. Watkins, Glencoe and McGraw-Hill, 6th Edition (1993).
5. "Theory of Plates and Shells", S. S. Bhavikatti, New age International Publications, 3rd Edition (2017)

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**

**INDUSTRIAL AUTOMATION & ROBOTICS (Elective –IV)**

**SUBJECT CODE: PCE ME413**

**Teaching Scheme:**

Lectures : 03 Hrs. per week

Practical : 02 Hrs. per week

Credit :04

**Examination Scheme:**

ESE : 70Marks

CIE : 30Marks

TermWork : 25Marks

**Pre-requisites:**

1. Knowledge computer integrated manufacturing,FMS,

**Course Objectives:**

- 1 Introduce automation and basic elements of automated systems.
- 2 Get knowledge of advanced automated and levels of automations.
- 3 Introduce the industrial robotics and its applications.
- 4 Knowledge of programming associated with robo-control.

**Course Outcomes:** At the end of this course, student will be able to

- 1 Design techniques for the analysis and control of discrete event system
- 2 Applyknowledgeofautomationtoolsandotherequipment'sformanufacturingandassembly components
- 3 Operate in research and development centre for automation
- 4 Identify efficiencies and limitation and provide in depth evaluation of robotic system for

<b>Unit 1</b>	<b>Introduction to Automation</b>	[06]
	Automated manufacturing systems, Fixed/programmable/flexible, Automation, Need of automation, Basic elements of automated systems- Power, program and control. Low cost automation, Economic and social aspects of automation, Advanced automation functions, Levels of automation.	
<b>Unit 2</b>	<b>Industrial Control and Transfer Line</b>	[08]
	A. Industrial control systems in process and discrete manufacturing industries, Continuous and discrete control; Computer process control. B. Fundamentals of transferlines, Configurations, Transfer mechanisms, Storage buffers, Control, Applications	
<b>Unit 3</b>	<b>Assembly Automation</b>	[06]
	Assembly Automation: Types and configurations, Parts delivery at workstations, Various vibratory and non-vibratory devices for feeding and orientation, Product design for automated assembly.	
<b>Unit 4</b>	<b>Fundamentals of Industrial Robots</b>	[06]
	Specifications and Characteristics, Criteria for selection, Robotic Control Systems: Drives, Robot Motions, Actuators, Power transmission systems, Robot controllers, Dynamic properties of robots-stability, Control resolution, Spatial resolution, Accuracy, Repeatability, Compliance, Workcell control, Interlocks	
<b>Unit 5</b>	<b>Robotic End Effectors and Sensors</b>	[07]
	Transducers and sensors-Sensors in robotics and their classification, Touch (Tactile) sensors, Proximity and range sensors, Force and torque sensing, End Effectors-Types, grippers, Various process tools as end effectors; Robot End effectors interface, Active and passive compliance, Gripper selection and design,	

## **Unit 6     Robot Teaching**

[07]

Introduction, Various teaching method, Task programming, Survey of Robot level programming languages, A Robot programs a Pathinspace, Motion interpolation, WAIT, SIGNAL and DELAY commands, Branching, Robot language structure, Various textual robot, Languages such as VALII, Typical programming examples such as palletizing, Loading a machine etc., Application of Robot.

### **TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

Term Work:

1. A Case study on low cost automation
2. Study of part delivery system at work stations in automated assembly.
3. Study of robot end effectors and sensors
4. Two Programming exercises using various commands of VALII.
5. Demonstration of various robotic configurations.
6. One Industrial visit for Industrial automation and robotic application

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**

**CRYOGENICS (Elective- IV)**

**SUBJECT CODE: PCE ME413**

**TeachingScheme:**

Lectures:3Hrs/Week

Practical:2Hrs/Week/Batch

Credits:4

**ExaminationScheme:**

ESE: 70Marks

CIE: 30Marks

TermWork:25Marks

---

**Pre-Requisites:** Applied Thermodynamics, Refrigeration

**Course Objectives:**

The course aims to:

1. Enable the students to analyze and solve cryogenics related problems by applying principles of mathematics, science and engineering.
2. Prepare students to use modern tools, techniques and skills to fulfill industrial needs related to low temperature systems.
3. Effective communication skill to demonstrate cryogenics theories.
4. Develop skills in the analysis of cryogenics systems in research or design.
5. Develop a professional approach to life long learning in the cryogenics to include the awareness of social and environment issues associated with engineering practices.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to

1. Learn the concept of low temperature and its application.
2. Explain liquefaction systems and cryogenic heat exchangers.
3. Apply knowledge of mathematics, science, and engineering for the needs in Cryogenic.
4. Do the analysis the cryo-coolers
5. Design and analysis separation and distillation column.
6. Define and understand the cryogenic insulation and storage vessel.

**Unit1**

**[06]**

**Introduction:**

Cryogenics, Cryogenic Temperature scale, Historical Development of Cryogenics, Properties of cryogenic Fluids, Applications of cryogenics in different areas such as Space, Medical and Biological, Manufacturing processes.

**Behavior of Structural Materials at Cryogenic Temperature:**

Mechanical properties, Thermal properties.

## **Unit 2** [07]

### **Liquefaction of Cryogenic Gases:**

Ideal cycle, System performance parameters, Production of low temperature methods in Cryogenics (Joule Thomson effect, Adiabatic expansion), Liquefaction systems; Simple Linde-Hampson system, Pre-cooled Linde-Hampson system, Cascade system, Claude system, Comparison of above systems.

## **Unit 3** [07]

### **Liquefaction Systems for Neon, Hydrogen, Helium and Heat Exchanger:**

Maximum Inversion temperature, Limitations of Linde -Hampson System for liquefaction of Neon, Hydrogen and Helium, Precooled Linde-Hampson system for Neon and Hydrogen, Claude system for Hydrogen, Collins Helium Liquefaction system, Heat exchanger used in liquefaction systems

## **Unit 4** [06]

### **Cryogenic Refrigeration Systems:**

Ideal refrigeration systems, Philips refrigerator, Vuilleumier refrigerator, Solvay refrigerator, Gifford-McMohan refrigerator, Pulse tube refrigerator.

## **Unit 5** [07]

### **Gas Separation and Purification:**

Thermodynamic Ideal separation system, Temperature composition diagram, Principles of Gas separation, Principles of Rectifiers column, Air Separation Systems (Linde Single Column system, Linde double column system).

## **Unit 6** [07]

**Insulation:** Cryogenic fluid storage, Vacuum insulation, Fibrous materials, Solid foams, Gas filled powder, Comparison.

**Vacuum Technology:** Importance, Pump down time, Flow regimes, Components of vacuum systems, Mechanical Vacuum pumps, and Ion pumps

### **Term Work:**

Any six experiments/ tutorial based on above syllabus

### **Text Books:**

1. "Cryogenic Systems", Barron F. Randall, Oxford University Press, New York.
2. "Cryogenic Engineering", Thomas M. Flynn, Marcel Dekker Inc, New York.
3. "Cryogenic Process Engineering", Klaus D. Timmerhaus, Thomas M. Flynn, Plenum Publishing Corporation (1989).
4. "Applied Cryogenic Engineering", Vance, R. W, and Duke, I. S., W. M., John Wiley (1962).
5. "Introduction to Cryogenics" B. S. Gawali, Mahalaxumi Publication.

## Reference Books:

1. "Experimental Techniques in low Temperature Physics", Guy, K White, Clarendon Press, Oxford, (1987).
2. "Cryogenic Research and Applications", Marshall Sitting and Stephen Kidd, D. Van Nostrand, Inc USA, (1963).
3. "Cryo-Cooler: Fundamentals Part-I", G. Walker, Plenum Press, New York.
4. "Cryo-Cooler: Fundamentals Part-II", G. Walker, Plenum Press New York.
5. "International Journal of Cryogenics", Elsevier Publication.
6. "Advanced Cryogenic Engineering", Proceedings of Cryogenic Engineering Conference, Vol. 1-145, Plenum Press, New York (1968).

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**

**Enterprise Resource Planning (Elective-IV)**

**SUBJECT CODE: PCE ME 413**

**Teaching Scheme:**

Lectures : 03 Hrs. per week

Practical : 02 Hrs. per week

Credit : 04

**Examination Scheme:**

ESE : 70Marks

CIE : 30Marks

TermWork : 25Marks

**Pre-requisites:**

**Course Objectives:**

- 1 Know the basics, evolution , importance of ERP
- 2 Correlate ERP and related technology
- 3 Understand manufacturing perspectives of ERP
- 4 Know business modules of ERP
- 5 Understand the key implementation issues and some popular products in ERP
- 6 Understand implementation of ERP package

**Course Outcomes:** At the end of this course, student will be able to

- 1 Understand the structure of an ERP system and know how process chains in materials management, production, controlling and sales are implemented in an ERP system  
Implementation and customize an ERP system using the appropriate modeling methods, that are Entity Relationship Modeling (ERM) and Event-Driven Process
- 2 Chains (EPC)
- 3 Understand the customization of an ERP system and customize essential parts of materials management, production, controlling and sales in SAP ECC
- 4 Understand software design issues in state-of-the-art business software and realize the importance of project management in an ERP implementation project
- 5 Understand what to expect, and not to expect, from a consultant implementing an ERP system
- 6 Understand the importance of IT governance in long-term relationships with a software vendor, such as SAP

**Unit 1      Introduction to ERP**

**[07]**

Introduction, Evolution, Reasons for the growth of ERP market, Advantages, Benefits of ERP-Reduction of lead time, On time shipment, Reduction in cycle time, Improved resource utilization, Better customer satisfaction, Input supplier performance, Increased flexibility.

**Unit 2      ERP and Related Technologies**

**[08]**

Business Process Reengineering(BPR),Management Information System(MIS), Supply Chain Management (SCM), Decision Support System (DSS), Executive InformationSystem(EIS),Customerrelationshipmanagement(CRM)

**Unit 3      ERP- A Manufacturing Perspective**

**[05]**

CAD/CAM,MRP,MRP II,Distribution Requirement Planning (DRP),Product DataManagement (PDM).

**Unit 4      ERP Modules**

**[07]**

Introduction and study of Business modules like Finance, Mfg. and Production, Plant maintenance, Quality and Material Management, Sales and Distribution.

**Unit 5      ERP Implementation Life Cycle**

**[07]**

Introduction, Pre-evaluation Screening, Package evaluation, Project planning, Gap Analysis, Reengineering, Configuration, Team training, Testing, End user training and Post-implementation phases, Enterprises application integration.

## **Unit 6      ERP Market and Case Studies**

**[06]**

Brief account of ERP market, various ERP packages like SAPAG, Oracle, People Soft, etc. Indian scenario for ERP implementation, Case studies based on implementation of ERP for various areas in mfg., Marketing and other businesses, E-commerce, cloud based ERP system.

### **TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

1. Six assignments on each of above units.
2. Detailed study of implementation of ERP and its benefits for any suitable industry/organization

### **TEXT BOOKS:**

- 1 “Enterprise Resource Planning”, Alexis Leon, Tata McGrawHill Publication, ISBN 0-07-463712-6.
- 2 “Enterprise Resource Planning”, Bret Wagner, Delmar Learning, International Edition, ISBN 10: 1439081085, ISBN-13: 978-1439081082.
- 3 “Enterprises Resource Planning”, Venkateshwara, Scitech Publication.
- 4 “Entrepreneurship”, Chris Boulton, Patric Turner, Willey India.
- 5 “Management Information System”, S. Sadagopan, PHI, New Delhi, 2nd Edition.

### **REFERENCE BOOKS:**

- 1 “Modern ERP: Select, Implement and Use”, Marianne Bradford, Hand M Books, ISBN: 978-0-557-01291-6.
- 2 “Enterprises Resource Planning”, E.F. Monk, B.J. Wagner, Cengage Learning.
- 3 “Enterprises Resource Planning”, A. R Singla, Cengage Learning.
- 4 “Enterprises Resource Planning-Concepts and Practices”, Vinod Kumar Garg and Venkitakrishnan N. K., PHI, New Delhi.

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**

**MICRO-ELECTRO-MECHANICAL SYSTEMS (MEMS) (Elective IV)**

**SUBJECT CODE: PCE ME413**

**Teaching Scheme:**

**Lectures : 03 Hrs. per week**

**Practical : 02 Hrs. per week**

**Credits :04**

**Examination Scheme:**

**ESE : 70Marks**

**CIE : 30Marks**

**TermWork : 25Marks**

**Practical/Oral: --**

**Pre-requisites: Fluid Mechanics Course Objectives:**

The course aims to

- 1** Understand the concepts and context of MEMS
- 2** Understand various MEMS fabrication technologies  
Understand MEMS-specific design issues, constraints and dynamics and modeling of
- 3** Microsystems
- 4** Understand applications of micro sensors and micro actuators
- 5** Getting access to fabrication and testing in academia and industry

**Course Outcomes:** At the end of this course, student will be able to

- 1** Gain a fundamental understanding of standard micro fabrication techniques and the issues surrounding them
- 2** Know the major classes, components, and applications of MEMS devices/systems and to Demonstrate an understanding of the fundamental principles behind the operation of these
- 3** devices/systems
- 4** Understand the unique requirements, environments, and applications of MEMS

- 5 Apply knowledge of micro fabrication techniques and applications to the design
- 6 Manufacturing of an MEMS device or a micro system

<b>Unit 1</b>	<b>Introduction</b>	<b>[06]</b>
	Introduction to Micromachining and MEMS, IC Fabrication, Essential technical background for lithography-based micromachining, Glimpses of Microsystems, Scaling effects, Distributed and lumped modeling approaches used in MEMS analysis and simulations.	
<b>Unit 2</b>	<b>Micro sensors and Micro actuators</b>	<b>[08]</b>
	Micro-sensors: Chemical sensors, Optical sensors, Pressure sensors, Thermal sensors – Thermopiles, Thermistors, Micro machined thermocouple probes, MEMS magnetic sensor, Microactuators: Capacitance, Piezo mechanics, Piezo-actuators as grippers, Micro grippers, Micro motors, Micro valves, Micro pumps, Micro accelerometers, Shape memory alloy based optical switch, Thermally activated MEMS relay, Micro spring thermal actuator.	
<b>Unit 3</b>	<b>Micro fabrication Processes</b>	<b>[06]</b>
	Structure of silicon, Silicon wafer processing, Thin-film deposition, Lithography, Wet etching and Dry etching, Process integration, Bulk micromachining and Surface micromachining, Wafer-bonding, LIGA and other moulding techniques, Soft lithography. Thick-film processing, Low temperature co-fired ceramic processing.	
<b>Unit 4</b>	<b>Mechanics of Solids</b>	<b>[08]</b>
	Stresses and deformation: Bars and beams, Micro device suspensions: Lumped modeling, Residual stress and stress gradients, Poisson effect, Anticlastic curvature, Examples of micromechanical structures, Thermal loading: Bimorph effect, Dealing with large displacements, In-plane and 3D elasticity equations, Vibrations of bars and beams.	
<b>Unit 5</b>	<b>Thermal, Fluid Flow in MEMS</b>	<b>[06]</b>
	Thermal sensors and actuators and their analysis, Micro fluidics, Flow through micro channels, Miniature heat exchangers. Heat conduction in multilayered thin films, conduction in solids in sub micrometer scale.	
<b>Unit 6</b>	<b>Electronics and Packaging</b>	<b>[06]</b>
	Semiconductor devices: Basics, Control and Microsystems, Vibration control of a beam, Integration of Microsystems and microelectronics, Packaging, Testing and reliability of Microsystems: Why and how?	

### **TERM WORK /LIST OF EXPERIMENTS/ LIST OF ASSIGNMENTS:**

**Complete any 7 Assignments from below.**

1. Case study of MEMS Sensors (Pressure sensor/ Accelerometer/Gyroscope).
2. Case-study of MEMS Actuators (Micro-pump/RF switch).
3. Case-study of System on chip e.g., Drug delivery system.
4. Visit to Micro fabrication facility.
5. Visit to MEMS characterization and testing facility.
6. Lumped modeling of MEMS sensors/actuators in MATLAB Simulink.
7. Introductory modeling of MEMS in multiphysics software e.g. ANSYS COVENTOR.
8. Study of Electrostatic Applications in MEMS like Electrostatic actuation (parallel plate), Electrostatic actuation (comb drive), Electrostatic sensing, Piezoelectric actuation, Piezoelectric sensing.
9. Study of:-
  - i. Gyroscopic effect, Frequency response, Damping, Quality factor, Basic micro-flows for damping calculation.
  - ii. Op-Amp and Op-Amp circuits, Signal conditioning for micro system devices.

### **REFERENCE BOOKS:**

- 1 “MEMS and MICROSYSTEMS: Design and Manufacture”, Hsu, Tai-Ran, TMH, ISBN:0-07-048709-X, (2003).

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**

**ADVANCED REFRIGERATION(Elective IV)**

**SUBJECT CODE: PCE ME413**

**Teaching Scheme:**

Lectures: 3Hrs/Week

Practical: 2Hrs/Week

Credits:4

**Examination Scheme:**

ESE: 70Marks

CIE: 30Marks

Term Work: 25Marks

---

**Pre-requisites:** Applied Thermodynamics, Refrigeration and Air Conditioning

**Course Objectives**

1. Understand the various methods of Refrigeration.
2. Explain thermal analysis of vapour compression system.
3. Understand the environmental aspect of refrigerants and alternate refrigerants

**Course Outcomes**

1. Aware about market trends in the field of RAC and availability of various components in the market.
2. Update their knowledge in the subject and will bridge the gap between academics and industry.
3. Improve utility of the students to RAC industry and will improve employment opportunity for the students.

**Unit 01**

**Multistage Systems**

**[06]**

Multi-evaporator system; Multi expansion system; Cascade systems; Study of P-h; T-s; h-s and T-h charts for various refrigeration cycles, Heat Pump

**Unit 02**

**[06]**

**Vapour Absorption Refrigeration**

Standard cycle and actual cycle, Thermodynamic analysis, Li-Br-water, NH<sub>3</sub>-water systems, three fluid absorption systems, half effect, Single effect, Single-double effect, Double effect and triple effect system

**Unit03****[08]****Modern Refrigerants & Non-Conventional Refrigeration System**

Refrigerant recycling, Reclaim and charging, Alternative refrigerants, Refrigerant-lubricant mixture behavior, Synthetic Lubricants, Blending of refrigerants, Secondary refrigerants, Thermoelectric refrigeration, Thermo-acoustic refrigeration, Adsorption refrigeration, Steam jet refrigeration, Vortex tube refrigeration, and Magnetic refrigeration.

**Unit04****[05]****Refrigeration Equipment's & Motor Selection**

Study and Selection of Reciprocating, Screw, Scroll and Centrifugal Compressor based on applications, Selection of Single phase, Three phase, Starters, Constant speed and Variable speed Drive.

**Unit05****[10]****Evaporators, Condenser, Control and Instrumentation**

Design and Selection, Types, Thermal design, Effect of lubricants accumulation, Draining of lubricants, Selection and capacity control, Design and selection, Types, Thermal design, Purging, Selection and capacity Control, Selection of expansion devices, Design of refrigerant piping, Refrigeration system controls and safety devices, Solenoid valves, Suction and evaporator pressure regulators, Refrigeration system controller, High pressure receiver, Thermal design of low pressure receiver, Accumulator, Filters, Driers, Oil separators, Relief valves, Safety valves, High and low pressure cut out, Thermostats, Water regulators, System controller.

**Unit06****[05]****Industrial refrigeration applications**

Selection and design of various components for various Industrial refrigeration applications: Cold storage, ice plant, Process applications - Textile, Pharmaceuticals, Chemical, Transport, Food preservation, Dairy etc. Application and selection softwares of refrigeration system.

**Term Work**

1. Study and trial on cascade refrigeration system.
2. Study and trial on multi evaporator system.
3. Study and Trial on multi compressor system.
4. Study and trial on nonconventional refrigeration system.
5. Component selection case study.
6. Industrial visit and report.
7. Case study on design of commercial refrigeration system.
8. Case study of coldroom.

**Text Books**

1. "Principles of refrigeration", R.J. Dossat, Pearson Education Asia Pearson Education, 4<sup>th</sup> Edition.
2. "Refrigeration and Air-Conditioning", C.P. Arora, McGraw-Hill, 2<sup>nd</sup> Edition.
3. "Refrigeration and Air-conditioning", Stoecker and Jones.
4. "Refrigeration", Manohar Prasad.

## Reference Books

1. "Refrigeration and Air-conditioning", Jordan andPriester.
2. "Refrigeration and Air-conditioning", A.R. Trott,Butterworths.
3. "Thermal Environmental Engineering", J.L. Threlkeld, Prentice Hall ofIndia.
4. "Industrial Refrigeration Handbook", W.F. Stoecker,McGraw-Hill.

6. "Industrial Refrigeration: Principles, Design and Applications", P.C. Koelet,Mcmillan.
7. "ASHRAE Handbook", (i) Fundamentals (ii) System iii)Applications.
8. "ISHRAEHandbooks"
9. "ARISTandards"
10. "Refrigeration Handbook", Wang, McGraw Hill,Int.

**SHIVAJI UNIVERSITY, KOLHAPUR,**

**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**

**Tribology (Elective IV)**

**SUBJECT CODE: PCE ME413**

**Teaching Scheme:**

Lectures: 3Hrs/ Week

Practical: 2Hrs/Week

Credits: 4

**Examination Scheme:**

ESE: 70Marks

CIE: 30 Marks

Term Work: 25Marks

---

**Pre-requisites:** Physics, Chemistry, Mathematics, Fluid Mechanics, Theory of Machines, Machine Design.

**Course Objectives:**

1. Make student aware about Importance, scope and application of this subject
2. Introduce the concepts of wear friction and lubrication and its application in design of tribological systems.

**Course Outcomes:**

1. Awareness about the field of Tribology
2. Understand basis of friction, wear processes and lubrication
3. Aware about tribological issues in the design of machine components such as journal bearing, thrust bearing, and roller element bearing
4. Familiarize with antifriction and anti-wear components of the material and the lubricants used therein
5. Design the tribological system from strength point of view

**Unit 01**

**Introduction to Tribology**

**(6)**

Introduction Definition of tribology, Friction, wear and lubrication, Importance of the tribological studies. Properties of oils and equation of flow: Viscosity, Newton's Law of Viscosity, Hagen-Poiseuille Law, Flow between parallel stationary planes, viscosity measuring apparatus. Lubrication principles, Classification properties and applications of lubricants. Regimes of lubrication,

**Unit 02**

**(5)**

**Friction and Wear**

**Friction:** Introduction, laws of friction, Kinds of friction, Causes of friction, Friction measurement, Theories of friction, Effect of surface preparation.

**Wear:** Types of wear, various factors affecting wear, Measurement of wear, wear between solids and liquids, Theories of wear.

### **Unit03**

**(9)**

#### **Hydrodynamic Lubrication**

Friction forces and power loss in lightly loaded bearing, Petroff's law, Tower's experiments, mechanism of pressure development in an oil film, Reynold's investigation and Reynold's equation in 2D. Numerical problems.

**Introduction to idealized journal bearing,** Load carrying capacity, Condition for equilibrium, Sommerfeld's numbers and significance of it; Partial bearings, End leakages in journal bearing, Numerical problems.

### **Unit04**

**(6)**

#### **Slider / Pad Bearing With a Fixed and Pivoted Shoe**

Pressure distribution, Load carrying capacity, Coefficient of friction, Frictional resistance and loss of Power in a pivoted shoe bearing, Numerical examples.

### **Unit05**

**(7)**

#### **Hydrostatic Lubrication:**

Introduction to hydrostatic lubrication, Hydrostatic step bearings, Load carrying capacity and oil flow through the Hydrostatic step bearing. Numerical Examples.

### **Unit 06**

#### **Bearing Materials:**

**(7)**

Commonly used bearings materials, Properties of typical bearing materials. Advantages and disadvantages of bearing materials.

**Introduction to Surface engineering:** Concept and scope of surface engineering. Surface modification – transformation hardening, surface melting, thermo chemical processes. Surface Coating – plating, fusion processes, vapor phase processes. Selection of coating for wear and corrosion resistance

### **TERM WORK :**

**(Any 5 out of 1 to 7)**

1. Journal Bearing Apparatus
2. Tilting pad and thrust Bearing Apparatus
3. Study of lubrication systems.
4. Friction in Journal Bearings.
5. Four Ball Tester
6. Coefficient of friction using pin on disc type friction monitor
7. Industrial visit to study techniques of coating – case study.
8. Assignments based on topics in the syllabus. (Minimum 5)

**TEXT BOOKS:**

1. "Introduction to Tribology Bearings", Mujumdar B. C., S. Chand Company Pvt. Ltd(2008).
2. "Engineering Tribology" PrasantaSahoo, PHI,Eastern EconomyEdition.
3. "Fundamentals of Tribology", Basu S K., Sengupta A N., AhujaB.B., PHI(2006).
4. "Tribology in Industries", Srivastava S., S Chand andCompany.
5. "Lubrication of Bearings – Theoretical Principles and Design", Redzimoskay E I., Oxford Press Company(2000)
6. "Tribology", Prof R B Patil, ISBN978-81-8492-812-9.

**REFERENCE BOOKS:**

1. " Engineering Tribology", G. W. Stachowiak and A. W. Batchelor, Butterworth-Heinemann (1992)
2. " Friction and Wear of Materials", Ernest Rabinowicz, John Wiley & Sons(1995)

4. "Handbook of tribology: materials, coatings and surface treatments ", B.Bhushan, B.K.Gupta ,McGraw-Hill (1997)

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**

**PRECISION ENGINEERING (Elective IV)**

**SUBJECT CODE: PCE ME413**

---

**Teaching Scheme:**

Lectures: 3Hrs/Week

Practical: 2Hrs/Week

Credits: 4

**Examination Scheme:**

ESE: 70Marks

CIE: 30 Marks

Term Work: 25Marks

**Course objectives:**

The course aims to:

1. Study the basics of precision engineering and different manufacturing technique in precision engineering
2. Get acquainted with various techniques of precision engineering like nano technology etc.
3. Understand importance of accuracy, influence of static stiffness, vibration accuracy etc.

**Course Outcomes:**

Upon successful completion of this course, the student will be able to

1. Specify what is meant by a precision engineering and list the basic components of an precision engineering
2. Explain how precision engineering can be specified.
3. Outline the Major issues of planning for the creation of precision engineering.
4. State points that arise from precision engineering quantitative analysis

**Unit 1 Accuracy and Alignment Tests**

**[08]**

General concept of accuracy – Spindle rotation accuracy – Test methods- Displacement accuracy – Clamping errors - Setting errors -Location of rectangular prism, Cylinder-Basic type of tests – Measuring instruments used for testing machine tools - Alignment tests-Straightness, Flatness, Parallelism, Squareness, Circularity, Cylindricity.

**Geometric Dimensioning and Tolerancing**

Tolerance Zone Conversion-Surfaces, Features, Features of Size, Datum Features- Datum Oddly Configured and Curved Surfaces as Datum Features, Equalizing Datums - Datum Feature of Representation Form Controls, Orientation Controls-Logical Approach to Tolerancing.

**Unit 2 Precision Machining [06]**

Introduction - Top down and bottom up approach - Development of Nanotechnology – Precision and micromachining -Diamond turning of parts to nanometer accuracy- Stereo microlithography Machining of micro-sized components-Mirror grinding of ceramics-Ultra precision block gauges.

**Unit 3 Nano Measuring Systems [06]**

In - process measurement of position of processing point - Post process and online measurement of dimensional features - Mechanical measuring systems - Optical measuring systems – Electron beam measuring systems – Pattern recognition and inspection systems.

**Unit 4 Lithography**

**[06]**

Nano Lithography – Photolithography - Electron beam lithography – Ion Beam lithography - Optical lithography - LIGA process- Dip pen lithography-Deep UV lithography, Nanocoatings.

**Unit 5 Reliability Engineering****[06]**

Introduction to reliability, System reliability, Quantification of reliability: MTBF, MTTF, Analytical treatment based on series, Parallel and combination systems, Failure modes, FMECA, calculation of Risk Priority Number (RPN).

**Unit 6 Tolerance Analysis[08]**

Process Capability, Mean, Variance, Skewness, Kurtosis, Process Capability Metrics, Cp, Cpk, Cost aspects. Feature Tolerances, Geometric Tolerances. Surface Finish: Review of relationship between attainable tolerance grades and different machining process. Cumulative effect of Tolerances sure fit law, normal law and truncated normal law, tolerance stacking.

**Term Work:**

1. Various alignment test for sample component to check parallelism, circularity, straightness, flatness, surface finish and tolerance.
2. Understanding of fits with some practical hand on based on sample components and brief write up based on above.
3. Visit to suitable set up/industry/Research and Development Laboratory where nanotechnology is used.
4. Numericals based on system reliability for series, parallel and combination (Min. Two problems on each type)
5. Numericals on tolerance analysis for any sample component.
6. Assignment on tolerance stacking.

**Text Books:**

1. "Precision Engineering in Manufacturing", Murthy.R.L, New Age International, Delhi.
2. "Nanotechnology", Norio Taniguchi, Oxford University Press, Cambridge, (1996).
3. "Precision Engineering", Venkantesh V.C., Inzman S., Tata McGraw Hill, New Delhi, (2007).

**Reference Books:**

1. "Precision Motion Control Design and Implementation", Lee Tong Hong, Springer Verlag, U.K., (2001).
2. "Precision Machining of Advanced Materials", Liangchi Zhang, Trans Tech Publications Ltd., Switzerland, (2001).
3. "Principles of Precision Engineering", Hiromu Nakazawa, Oxford Uni. Press, (1994).
4. "Geometric Dimensioning and Tolerancing", James D. Meadows, Marcel Dekker Inc. (1995).
5. "Engineering Design – A systematic Approach", Matousek, Blackie and Sons Ltd. London.

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**  
**online Certificate Course\*\*\*\***

**SUBJECT CODE: PCE ME414\*\*\***

**TeachingScheme:**

Credit: 2

**ExaminationScheme:**

Term Work: 25 Marks

**Course Objective –**

To teach use of Moodle/Swayam/MOOC/NPTEL.etc. as a learning platform designed to provide educators, administrators and learners with a single robust, secure and integrated system to create personalized learning environment.

**Course outcome –**

On successful completion of the course

Student should be able to Students will be able to choose course of their choice from

Moodle/Swayam/MOOC/NPTEL. etc. and to be acquaintance with recent advance developments in Mechanical Engineering beyond syllabus.

**The Student should register the online course with Moodle/Swayam/MOOC/NPTEL. etc. of his interest in Recent Advances in Mechanical Engineering at a Start of his/her final year (i.e. at Semester VII.) and Same is intimated to Head of Department. For Term Works Student has to Submit Completion Certificate of Course to the Department till end of Semester VIII. Term Work will be given at the end of Semester VIII.**

The Student may choose **courses likes \*\*\***

- 1. Design of Mechatronic Systems**\_IIT Bombay
- 2. Mechanics and Control of Robotic Manipulators**\_IIT Palakkad
- 3. Automation in Production Systems and Management,** IIT Kharagpur
- 4. Toyota Production System,** IIT Roorkee
- 5. Fundamentals of Artificial Intelligence,** IIT Guwahati
- 6. Introduction to Airplane performance,** IIT Kanpur

\*\*\* (These are Sample Courses given student has choice to select his own area)

**SHIVAJI UNIVERSITY, KOLHAPUR,**  
**Final year B. Tech. (Mechanical Engineering) CBCS PATTERN Semester VIII**  
**PROJECT PHASE-II**  
**SUBJECT CODE: PWME 415**

---

**Teaching Scheme:**

Practical: 6Hrs/Week/Batch  
Credit: 3  
Oral Exam: 25 Marks

**Examination Scheme:**

Term Work: 50 Marks

**Course Objectives:**

The course aims to:

1. Embed the skill in group of students to work independently on a topic/ problem/ experimentation selected by them and encourage them to think independently on their own to bring out the conclusion under the given circumstances of the curriculum period in the budget provided with the guidance of the faculty.
2. Encourage creative thinking process to help them to get confidence by planning and carrying out the work plan of the project and to successfully complete the same, through observations, discussions and decision making process.

**Course Outcome:**

Upon successful completion of this course, the student will be able to

1. Improve the professional competency and research aptitude in relevant area.
2. Develop the work practice in students to apply theoretical and practical tools/techniques to solve real life problems related to industry and current research.

**Project Phase II Load:**

A batch of maximum three groups of four to five students per group, shall work under one Faculty member of department. The group of one student is strictly not allowed. Same groups of Seventh Semester shall work under same faculty member of department.

**Project Phase II Definition:**

Project phase-II is a continuation of project phase-I started in the seventh semester. Before the end of the eighth semester, there will be two reviews, one at start of the eighth semester and other towards the end. In the first review, progress of the project work done is to be assessed. In the second review, the complete assessment (quality, quantum and authenticity) of the thesis is to be evaluated. Both the reviews should be conducted by guide and Evaluation committee. This would be a pre-qualifying exercise for the students for getting approval for the submission of the thesis. The final evaluation of the project will be external evaluation.

**Project Phase II Term Work:**

The term work under project submitted by students shall include

1. Work Diary: Work Diary maintained by group and countersigned by the guide weekly. The contents of work diary shall reflect the efforts taken by project group for
  - a. Brief report preferably on journals/ research or conference papers/ books or literature surveyed to select and bring up the project.
  - c. Brief report of feasibility studies carried to implement the conclusion.
  - d. Rough Sketches/ Design Calculations/ Testing reports/ Experimentation results.

**Project Report:**

Project report should be of 50 to 60 pages (typed on A4 size sheets). For standardization of the project reports the following format should be strictly followed.

1. Page Size: Trimmed A4
2. Top Margin: 1.00 Inch
3. Bottom Margin: 1.32 Inches
4. Left Margin: 1.5 Inches
5. Right Margin: 1.0 Inch
6. Para Text: Times New Roman 12 Point Font
7. Line Spacing: 1.5 Lines
8. Page Numbers: Right Aligned at Footer. Font 12 Point Times New Roman
9. Headings: Times New Roman, 14 Point Boldface
10. Certificate: All students should attach standard format of Certificate as described by the department. Certificate should be awarded to batch and not to individual student. Certificate should have signatures of Guide, Head of Department and Principal/Director
11. Index of Report:
  - i) Title Sheet
  - ii) Certificate
  - iii) Acknowledgement
  - iv) Table of Contents.
  - v) List of Figures
  - vi) List of Tables
1. Introduction
2. Literature Survey/Theory
3. Design/ Fabrication/ Production/ Actual work carried out for the same and Experimentation.
4. Observation Results
5. Discussion on Result and Conclusion
12. References: References should have the following format  
**For Books:** "Title of Book", Authors, Publisher, Edition  
**For Papers:** "Title of Paper, Authors, Journal/Conference Details, Year
13. The Project report shall be signed by the each student in the group, approved by the guide and endorsed by the Head of the Department
14. Presentation: The group has to make a presentation in front of the faculty of department at the end of semester.

**Important Notes:**

- Project group should continue maintaining a diary for project and should write (a) Books referred (b) Company visited (c) Person contacted (d) Computer work done (e) Paper referred (f) Creative thinking.
- The Diary along with Project Report shall be assessed at the time of oral examination
- One copy of the report should be submitted to Institute/ Department, One copy to Guide and one copy should remain with each student of the project group.
