То,

The Principal,	The Head/Co-ordinator/Director
All Concerned Affiliated Colleges/Institutions	All Concerned Department (Science)
Shivaji University, Kolhapur	Shivaji University, Kolhapur.

Subject: Regarding syllabi of B.Sc. Part-III (Sem. V & VI) as per NEP-2020 (1.0) degree programme under the Faculty of Science and Technology.

Sir/Madam,

With reference to the subject mentioned above, I am directed to inform you that the university authorities have accepted and granted approval to the revised syllabi, nature of question paper and equivalence of B.Sc. Part-III (Sem. V & VI) as per NEP-2020 (1.0) degree programme under the Faculty of Science and Technology.

B.ScIII (Sem. V & VI) as per NEP-2020 (1.0)						
1.	Mathematics	12.	Computer Science (Opt)			
2.	Statistics	13.	Computer Science (Entire)			
3.	Physics	14.	Information Technology (Entire)			
4.	Microbiology	15.	Food Science and Technology (Entire)			
5.	Industrial Microbiology	16.	Food Science			
6.	Electronics	17.	Food Science and Quality Control (Entire)			
7.	Chemistry	18.	Food Technology & Management (Entire)			
8.	Sugar Technology (Entire)	19.	Biochemistry			
9.	Geology	20.	Biotechnology (Optional/Vocational)			
10.	Zoology	21.	Biotechnology (Entire)			
11.	Botany	22.	Environmental Science (Entire)			

This syllabus, nature of question and equivalence shall be implemented from the academic year 2024-2025 onwards. A soft copy containing the syllabus is attached herewith and it is also available on university website <u>www.unishivaji.ac.in NEP-2020(Online Syllabus)</u>

The question papers on the pre-revised syllabi of above-mentioned course will be set for the examinations to be held in October /November 2024 & March/April 2025. These chances are available for repeater students, if any.

You are, therefore, requested to bring this to the notice of all students and teachers concerned.

Thanking you,

by Registrar r. S. M. Kubal

Shivaji University, Kolhapur Syllabus For Bachelor of Science Part–III: Biotechnology (Entire) Choice Based Credit System with Multiple Entry and Multiple Exit Options

as per CBCS-NEP-2020

(Revised Syllabus will be implemented from June, 2024 onwards.)

1. Preamble :

This syllabus is so designed to give a sound basis to the undergraduate students of B.Sc. Biotechnology (Entire).

It is known that Biotechnology is no doubt a youngest branch of life science but it is a very important interdisciplinary subject, where in subjects of Plant science, Animal science, Microbiology, Physics, Chemistry and other sciences are blended in such a way that the students are prepared with basic knowledge of Molecular biology, Biochemistry, Biophysics, Genetic engineering, Bioinformatics, Environmental sciences, Plant and Animal cell culture etc. and their technological applications.

Such students having multidisciplinary knowledge are in tremendous demand in industries, education and fundamental research, as trainee workforce. The career opportunities of these students are very wide in different sectors dealing with life sciences.

2. Duration: Four Year Full Time Course with 8 semesters.

3. Eligibility:

- 12th Science pass
- 4. Medium of Instruction: English

5. Programme Structure

Choice Based Credit System (CBCS) with Multiple Entry and Multiple Exit (MEME) Options as per NEP-2020 To be implemented from the Academic Year 2024-25 Third Year Bachelor of Science Biotechnology (Entire) (Level-5) Programme Structure (NEP-2020 PATTERN)

R. B.Sc. 3:(A) (i) Structure of B.Sc. Programme (Semester V & VI)

6. Program Outcomes (POs)

- Domain Specific knowledge: Apply the knowledge of Chemistry, Biochemistry, Microbiology, Plant science, Animal science, Cell biology, Genetics, Immunology, Molecular biology, Metabolic pathways, Enzymology, Plant and Animal Biotechnology, Ecology, Environmental Biotechnology, rDNA Technology, Industrial biotechnology, Medical Biotechnology, Bioinformatics, Nanotechnology, Biostatistics and Computer science to provide the solution to the Scientific and Technological and Social problems as well.
- 2. **Problem analysis:** Identification and formulation of the problems. Data analysis and Interpretation of the results with basic principles.
- 3. **Design/Development of solutions:** Design solutions for Scientific and Technological and Social problems of various disciplines that significantly realize domestic, agricultural, medical, pharmaceutical, industrial, societal, environmental considerations.
- 4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.
- Modern Tool Usage: Making use of sophisticated tools, Sophisticated Instruments, Modern methodology, Microscopy, Chromatography, Spectroscopy, Electrophoresis, Thermal Cycler, Gel documentation, DNA Sequencer, Nanotechnology.
- 6. **The Science and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, industrial, agricultural issues.
- 7. Environment and sustainability: Application of the knowledge to ensure environmental sustainability
- 8. Ethics: Apply ethical principles in scientific Practices
- 9. **Individual and team work:** Function effectively as an Individual and as a Member or Leader in diverse teams, and in multidisciplinary settings.
- 10. **Communication:** Communicate effectively on Scientific and Technological and problems with society at large. This includes ability to comprehend and write effective reports and design documentation, make effective presentations and give and receive clear instructions to realize outreach to the society.
- 11. **Life-long learning:** Recognize the need of study and ability to engage in independent and lifelong learning in the broadest context of scientific change.
- 12. **Project management and finance:** Demonstrate knowledge and understanding of the Scientific, Technological and management principles and apply these to the project work, as a member or leader in a team.

Program Specific Outcomes (PSOs)

- Professional Skills: An ability to understand the basic concepts of various branches of Biotechnology like Agricultural Biotechnology, Food Biotechnology, Industrial Biotechnology, Medical Biotechnology, Pharmaceutical Biotechnology, Environmental Biotechnology, Microbial Biotechnology, Fermentation Biotechnology, Genetic Engineering, Bioinformatics, Nanotechnology, Plant- Animal Tissue culture, Immunology and to develop skills of respective disciplines.
- **Problem-Solving Skills:** An ability to solve Scientific and Technological and Social problems using latest technology and to arrive at cost effective and appropriate solutions.
- Successful Career and Entrepreneurship: An understanding of social awareness along with ethical responsibility to have a successful career and to sustain zeal for real-world applications using optimal resources as an Entrepreneur.

7. Syllabus

DSC BT E 1 Basics in Genetic Engineeri	ring
--	------

Topic No.		Lectures 30
	Credit I	
1	Enzymes in r-DNA technology Introduction and Scope, Enzymes and its applications, Restriction enzymes- types (I, II, III), nomenclature, recognition sequences, cleavage patterns, modification of cut ends (linkers and adaptors), application – RFLP, Restriction mapping. Alkaline phosphatases, DNA ligases T4 and <i>E.</i> <i>coli</i> Ligases, Methylase, Reverse Transcriptases, Polymerases- Klenow enzymes, T4 DNA polymerases, Taq DNA polymerases, Polynucleotide kinase.	15
	Cloning Vectors: Introduction, Properties of good vectors, Cloning & expression vectors, Types- E.coli vector- plasmid – pBR 322 and pUC18 Bacteriophage vectors – λ phage vector, M 13 Vectors (λ replacement e. g. EMBL 3, EM BL 4 and λ insertional e.g λ gt 10 and λ gt 11) Cosmid vector, Phagemid vector e.g pBlue script II KS/SK, Yeast vector- YAC and BAC, Animal vectors – Retroviral, Plant vector – Ti plasmid,Ri plasmid, shuttle vector- e.g pJBD 219, Ta clonig vector (introductiory), Selection of recombinant vector.	
	Credit II	
2.	 Nucleic Acid Hybridisation : Nucleic Acid and plasmid purification. Probe Preparation ,Methods of labelling probes. Radio labelling – Nick translati on, End labeling, Primer extension, Non Radiolabelling – Biotin, dioxygenin, fluorescent dyes, Applications of probes. DNA Sequencing and blotting technique Maxam Gilbert method , Sanger Coulson method, Automated DNA sequencing, Southern Blotting, Northern Blotting, Western blotting , Dot blotting. 	15

DSC BT E 2 Industrial Biotechnology

Topic No.		Lectures 30
	Credit I	
1	Introduction to Industrial Biotechnology Concept and range of fermentation technology, Types of fermentations (Batch, continuous, dual, multiple), Concept of solid state & submerged fermentation. Microbial metabolic products-Primary & Secondary products. Basic design of fermenter Components of fermenter and their functions, Fermentation economics Types of fermenter- Stirred tank fermenter, Airlift fermenter, Tower fermenter, Tubular fermenter, Bubble cap fermenter. Microbial Screening, Scale up and strain improvement Primary and secondary screening, Primary screening of antibiotics,organic acids and amines, enzymes, vitamins and amino acidproducers, volatile component degraders,organisms using specific carbon and nitrogen sources. Secondary screening of antibiotic producers, Scale up of fermentations, Strain improvement- conceptand methods -mutation, genetic recombination. Maintenance and preservation of industrially important cultures. Microbiological assay.	15
	Credit II	
2	 Fermentation Media Composition of typical fermentation media, Criteria for typical fermentation medium, Types of fermentation media,General role of media components- water, carbon source, nitrogen source, minerals, precursors, growth factors, buffers, antifoams, oxidation-reduction potentials, inducers, inhibitors. Optimization of media-Plackett and Burmann design , Factors affecting fermentation process . Downstream Process and Product Recovery Downstream Processes in fermentation and bioprocess technology Solid and liquid separation, Flocculation and Flotation, filtration and centrifugation, Cell disruption by solid and liquid shear, ultrasonication, enzyme action and mechanical disruption. Product recovery and purification- principle, Precipitation, Crystallization, Liquid-Liquid extraction, Distillation (Fractional and Steam), evaporation, Chromatographic separation (Principles), Adsorption and concentration, Membrane filtration, drying and packing. 	15

DSC BT E 3 Application of Biotechnology in Agriculture

Topic No.		Lectures 30
	Credit I	
1	Methods for crop Improvement Introduction and Acclimatization, Breeding for self and cross pollinated plants and vegetatively reproducing plants, selection (clonal pure line and mass), Hybridization and Mutation breeding. Plant tissue culture techniques for crop improvement -Somaclonal variations, Haploids, Micropropagation, Somatic embryogenesis.	15
	 Somatic hybridization- Definition, protoplast, fusion technique, selection of hybrids, symmetric and asymmetric hybrids, cybrid production. Artificial Seed- Definition, Techniques, factors affecting, applications limitations 	
	Germplasm Conservation- Introduction, <i>In-situ</i> conservation, <i>Ex-situ</i> conservation, cryopreservation, Techniques of Cryopreservation, applications, limitations.	
	Credit II	
2	Transgenic Plants Herbicide resistant – Glyphosate resistance, Pho sphinothricin resistance, Fungal and Bacterial disease resistance approaches- PR proteins, Chitinase, Glucanase, RIPs protein, Virus resistance –Virus coat proteins, Movement proteins ,Trasmission proteins ,Satellite RNAs, Antisense RNAs, Ribozymes, Insect resistance approaches – Bt protein (Bt Cotton, Bt-Brijal), Non Bt protein, Transgenic plant with improved nutrition - Golden Rice, Molecular farming. GM Foods, ethical & socio-economic, legal and environmental issues. Forms of protection -IPR and IPP- Patents, copyright, trademark ,trade secret and PBR Biofertilizers – Definition ,Principle , Mass production and field application – <i>Rhizobium,Azotobacter,Azospirillum,Acetobacter,Azolla,</i> <i>Cyanobacteria</i> , PSB, VAM. Biopesticide – Definition, production and applications of Bacterial, fungal, viral and Plant origin Biopesticides	15

DSC BT E 4 Nanobiotechnology

Topic No		Lectures
110.	Crodit I	30
1	Introduction and Fundamentals of nanobiotechnology	15
-	Concepts, historical perspective: Nanoscale materials: Definition and	10
	properties, Basic concept of Carbon dots and Quantum dots.	
	Concepts of Nanoparticles: Basic structure of Nanoparticles- Kinetics	
	in nano-structured Materials- Zero dimensional, size and shape of	
	nanoparticles; one-dimensional and two-dimensional nanostructures;	
	clusters of metals and semiconductors, bionano-particles.	
	Synthesis and characterization of different nanomaterials: Synthesis	
	of nanomaterials from plant, microbial and animal cell sources.	
	Characterization of nanomaterials using Optical Microscopy, Scanning	
	Electron Microscopy, Transmission Electron Microscopy, Atomic Force	
	Microscopy, Scanning Tunneling Microscopy, Optical Absorption and	
	NMP	
	NUIN. Biopancomposites: Nano-particles and Microorganisms: Microbial	
	Synthesis of Nano- materials: Biological methods for synthesis of nano-	
	emulsions using bacteria fungi and Actinomycetes. Plant-based	
	nanoparticle synthesis.	
	Credit II	
2	Applications of Nanobiotechnology	15
	Applications of Nanomedicine: Nanotechnology in diagnostic	-
	applications, materials used in Diagnostics and Therapeutics.	
	Nanomaterials for catalysis, development and characterization of	
	nanobiocatalysts, application of nano-scaffolds in synthesis, applications	
	of nano-biocatalysis in the production of drugs and drug intermediates.	
	Nano-films: Thin films; Colloidal nanostructures; Self-assembly,	
	Nanovesicles; Nanospheres; nanocapsules and their characterization.	
	Nanoparticles for drug delivery: Strategies for cellular internalization	
	and long circulation, strategies for enhanced permeation through various anatomical barriers.	
	Nanoparticles for diagnostics and imaging: Concepts of smart stimuli	
	responsive nanoparticles, implications in cancer therapy, nanodevices	
	for biosensor development.	
	Applications in Agriculture: Biogenic nanomaterials and their role in	
	soil, water quality and plant protection; Smart nanoscale systems for	
	targeted delivery of fertilizers, pesticides (nanocides);	
	Nanoremediation.

1	Microbial Cultures and Production			
	Concept of pure and mixed culture., Microbial growth kinetics			
	basic concept (Batch, Continuous and Fed Batch). Microbial			
	Production of - Enzymes (amylase -koji fermentat ion),			
	Antibiotics (Penicillin), Vitamins (B 12), Amino acids (Lysine),			
	Organic acid (Citric acid). Edible mushroom, Single Cell Protein-			
	(Spirulina).			
	Fermented Foods and Beverages			
	Dairy Products – Cheese, Dahi, Yoghurt, Indian Foods – I dli,			
	Bakery Products – Bread, Fermented Pickles – Sau erkraut,			
	Beverages – Beer, Wine (Red table and white table).			
	Credit II			
2	Food Spoilage, preservation & toxicity	15		
	Types of spoilage- Physical, Chemical and Biological (auto and			
	microbial), Preservation methods- High and Low temperatures,			
	Controlled atmosphere and Anerobiosis, Radiations and Asepsis.			
	Chemical preservatives (Salt, sugar, organic acids, SO_{2} , NO_{2}).			
	Food Toxicity – Mycotoxin (Aflatoxin), Exotoxin (
	Staphylococcal), Neurotoxin (Botulinum), Food borne illness-			
	Singenosis, Amoediosis, Asperginosis.			
	Dringiple Disk analysis and Regulations Multidiscipling			
	perspectives of GM foods and impact Public health principles			
	Characteristics of food supply for public health Food Safety			
	Capacity to supply nutritional adequacy Sustainability Capacity			
	for Consumer choice. Accessibly and affordability to all.

1.	Calculation of molecular size of digested DNA	01	Minor
2.	Construction of restriction map of plasmid DNA		Minor
3.	Western blotting technique	01	Major
4.	Southern blotting technique	01	Major
5.	DNA Amplification by PCR	01	Minor
6	cDNA cloning by Reverse Transcription PCR	01	Major
7.	Ligation of DNA	01	Minor
8.	Expression of gene in E. Coli (GST)	01	Major
	Techniques in Bioinformatics		
9.	Introduction to PUBMED Central database using the		
	ENTREZ search engine.	01	Minor
10.	Getting the amino acid and gene sequences by exploring		
	and querying the protein and nucleic acid Sequence		Minor
	database.		
11.	Similarity search for nucleotide and protein using the	01	Major
	BLASTn, BLASTp and interpretation of the results.	01	Majoi
12.	Protein and nucleic acid pair-wise sequence alignmentby		
	using ClustalW and Construction of Phylogenetic Tree	01	Major
	using ClustalW.		
13.	Analysis of Secondary and tertiary structure of protein	01	Minor
	using visualizing software like Pymol or Rasmol.	01	IVIIIIOI
14.	Calculation of PI/MW of protein and Prediction of the		
	secondary structure of protein using ExPasy web tool (GOR		Major
	method).		
15.	Molecular Docking of protein and ligand by Argus lab.	01	Major
16	Energy calculation of the biomolecules using molecular	01	Minor
	mechanics and quantum mechanics. (Argus lab)	01	IVIIIIOI
	Compulsory visit to molecular biology laboratory		

DSC BT P 11 Techniques in Genetic Engineering and Bioinformatics

Sr.	Practicals	15 P	
No.		01	
1	Primary screening of amylase producers by Replica	01	Major
	Plate technique		
2	Screening and isolation of antibiotic producing	01	Major
	organism from soil (Crowded plate/ Giant colony		
	method).		
3	Production and partial purification of enzyme	01	Major
	(Amylase/ Invertase)		
4	Study of Immobilization of enzyme (Amylase/	01	Minor
	Invertase).		
5	Production of alcohol/ wine and estimation by	01	Minor
	colorimetric method		
6	Production of sauerkraut.	01	Minor
7	Mushroom Cultivation.	01	Minor
8	Production, Recovery and estimation of Citric Acid	01	Minor
9	Production, Recovery and estimation (Bioassay) a of	01	Major
	Primary metabolite (Growth factor)		
10	Production, Recovery (Filtration, Solvent extraction)	01	Major
	and estimation (Bioassay) a of Secondary metabolite		
	(Antibiotic)		
11	Isolation and identification (Genus level) of spoilage	01	Major
	causing microorganisms from spoiled foods.		
12	Isolation and identification of starter organisms from	01	Major
	Idli batter/ Dahi		
13	Analysis of Milk - a) Estimation of lactic acid.	02	Major
	b) Estimation of total fat.		
	c) MBRT		
14	Preparation of fermented food (Bread/ Idli)	01	Minor

DSC BT P 12 Techniques in Industrial Biotechnology

r.	Practicals	15 P	
No.			
1	Isolation of <i>Azotobacter</i>	01	Major
2	Isolation of <i>Rhizobium</i> from root nodules	01	Major
3	Isolation of PSB from soil.	01	Major
4	Production of Biofertilizer- Azotobacter /PSB	01	Major
5	Isolation of <i>Trichoderma</i>	01	Minor
6	Isolation of <i>Bacillus thuringenisis</i>	01	Minor
7	Production of Biopesticide – Trichoderma	01	Minor
8	Production of Biopesticide – Bacillus thuringenisis	01	Minor
9	Production of Artificial seed	01	Minor
8	Antibiotic sensitivity test using paper disc method	01	Minor
9	Determination of Minimum inhibitory Concentration	01	Minor
	(MIC) of antibacterial compound.		
10	Agrobacterium mediated transformation in plants	01	Minor
11	Isolation of Blood genomic DNA	01	Minor
12	RAPD analysis demonstration experiment.	01	Major
12	RFLP analysis demonstration experiment.	01	Major
13	Immunoglobulin G Purication.	01	Minor
14	Study of Protoplast fusion and regeneration	01	Minor
15	DPPH assay for antioxidant plant extract.	01	Minor
	Industrial Visit- Wine Industry/ Food Processing Industry/Fermentation unit.		

DSC BT P 13 Techniques in Agricultural and Health Biotechnology

DSC BT P 14 Project

Guidelines -

- 1. Projects can be performed in pair or individually.
- 2. Selection of the Project topic and allotment of project supervisor.
- 3. Preparation of Project Execution Plan : Time and Resource Allocation
- 4. Separate practical session should be organized for preparation of following topics-

a) Selection of problem, preparation of synopsis. b) Introduction. c) Review of literature

- d) Materials and Methodology e) Result and discussion f) Bibliography.
- 5. Guidance by the Project Supervisor, for the self-study of relevant course topics and concepts by the student.
- 6. Self-study and reference work of relevant topics and concepts by the student.
- 7. The Project Work must involve practical work(wet lab.) related to selected discipline
- 8. Students are expected to work on "Project Work" for about 10 periods per week.
- 9. The project work must be allotted individually.
- 10. The student invests his energy, time and resources in a project. The project therefore should, if possible, have important bearing on some practical aspect. This will help student to justify his efforts on project.
- 11. It is the joint responsibility of student and project supervisor to maintain daily register book of his/her project work and has to be produced at the time of examination if asked.
- 12. Submission Process: Student should prepare 2 copies of the Project Report. At the beginning, the respective Project Supervisor must approve both copies positively before university examination. Then respective Head or Coordinator approves both copies of the Project Report.
- 13. The student has to submit one of these approved copies of project report, duly signed by the project Supervisor and Principal, before practical examination. The report will be assessed by both Internal examiner (The project supervisor), who will assign the marks out 20 and the external examiner (appointed by university), who will assign marks out of 30, Thus the total will be out of 50 marks.
- 14. Theory, practical and project report shall form separate heads of passing.

8. Examination Pattern

Practical Examination:

A) The practical examination will be scheduled as given below; practical examination should be conducted for minimum 5 hours on each day. For practical examination of DSC BT P11 Techniques in Genetic Engineering and Bioinformatics and DSC BT P14 Project separate examiners should be appointed and conducted in 2 consecutive days for each, while for DSC BT P12 Techniques in Industrial Biotechnology and DSC BT P13 Techniques in Agricultural and Health Biotechnology examination will be conducted in 3 consecutive days.

B) Each candidate must produce a certificate from the Head of the Department in his/her college stating that he/she has completed in a satisfactory manner the practical course on the guidelines laid down from time to time by Academic Council on the recommendation of Board of studies and has been recorded his/her observations in the laboratory journal and written a report on each exercise performed. Every journal is to be checked and signed periodically by a member teaching staff and certified by the Head of the Department at the end of staff and certified by the Head of the Department at the end of staff and certified by the time of practical examination. Candidates have to visit the Biotechnological institutes and satisfactorily complete project work and entrepreneurship as per the syllabus. The report of the same should be duly certified by the Head of the Department and submit the respective reports at the time of examination.

9. Scheme of Teaching- As per University/BOS guidelines

Nature of Theory Question Paper

<u>Nature of Ouestion Paper for B.Sc. Biotechnology (Entire) Part – III (40 + 10 Pattern) according</u> to Revised Structureas Per NEP – 2020 to be implemented from academic year 2024-25

Maximum Marks: 40 Duration: 2 hrs

Q. 1 Select the most correct alternate from the following	[8]
i) to viii) MCQ one mark each with four options	
A)	
B)	
C)	
D)	
Q.2 Attempt any TWO of the following	[16]
A)	
B)	
C)	
Q. 3 Attempt any FOUR of the following	[16]
a)	
b)	
c)	
d)	
e)	
f)
