Ref.No.SU/BOS/Science/271

To,

The Principal, All Concerned Affiliated Colleges/Institutions Shivaji University, Kolhapur.

Subject: Regarding revised syllabi of B.Sc. Part-II (Sem.III & IV) degree programme under the Faculty of Science and Technology as per NEP-2020 (2.0).

Sir/Madam,

With reference to the subject mentioned above, I am directed to inform you that the university authorities have accepted and granted approval to the syllabi, nature of question paper B.Sc. Part-II (Sem. III & IV) degree programme under the Faculty of Science and Technology as per NEP-2020 (2.0).

	B.Sc.Part-II (Sem	. III &	IV) as per NEP-2020 (2.0)
1.	Pollution	8.	Food Science (Entire)
2.	Biochemistry	9.	Biotechnology (Entire)
3.	Food Science and Quality Control	10.	Environmental Science (Entire)
4.	Computer Science (Optional)	11.	Information Technology (Entire)
5.	Biotechnology (Optional/Vocational)	12.	Food Science and Technology (Entire)
6.	Animation (Entire)	13.	Food Technology & Management (Entire)
7.	Computer Science (Entire)	14.	All Faculty UG Part II Environmental Studies (VEC)

This syllabus, nature of question and equivalence shall be implemented from the academic year 2025-2026 onwards. A soft copy containing the syllabus is attached herewith and it is also available on university website <u>www.unishivaji.ac.in NEP-2020@suk(Online Syllabus)</u>

The question papers on the pre-revised syllabi of above-mentioned course will be set for the examinations to be held in October /November 2025 & March/April 2026. These chances are available for repeater students, if any.

You are, therefore, requested to bring this to the notice of all students and teachers concerned.

Thanking you,

Yours faithfully, Dy Registrar Dr. S. M. Kubal

Encl: As above

for Information and necessary action

Shivaji University, Kolhapur

Revised Syllabus for Bachelor of Science Part – II: Biotechnology

1. TITLE: Biotechnology (OPTIONAL / VOCATIONAL)

2. YEAR OF IMPLEMENTATION:- Revised Syllabus will be implemented from June, 2025 onwards.

3. PREAMBLE:

This syllabus is framed to give sound knowledge with understanding of Biotechnology to undergraduate students at first year of three years of B.Sc. degree course.

Students learn Biotechnology as a separate subject from B.Sc. I. The goal of the syllabus is to make the study of Biotechnology popular, interesting and encouraging to the students for higher studies including research.

The new and updated syllabus is based on a basic and applied approach with vigor and depth. At the same time precaution is taken to make the syllabus comparable to the syllabi of other universities and the needs of industries and research.

The syllabus is prepared after discussion at length with number of faculty members of the subject and experts from industries and research fields.

The units of the syllabus are well defined, taking into consideration the level and capacity of students.

3. Program Learning Outcome (PO)

Student develop global competencies

PO1: Students develop global competencies in the area of basic and applied biological sciences. PO2: Enhancing the subject knowledge of students by using traditional and modern ICT based teaching methods and learning by doing.

PO3: To enrich students' knowledge and train them in various branches of Biotechnology such as genetics, molecular biology, biochemistry, immunology, fermentation technology, environmental biotechnology and tissue culture techniques.

PO4: To groom the students to meet futuristic challenges and national interests

4. Course outcomes (CO)

CO - 1 Explain the cellular transcription and translation

CO - 2 Summarize the concepts and applications of fermentation technology.

CO - 3 Infer bacterial growth curve, concepts of bacterial classification.

CO -4Summarize basic concepts of gene, DNA and chromosome and transfer of genetic material

5. GENERAL OBJECTIVES OF THE COURSE:

- 1) To impart knowledge of Science is the basic objective of education.
- 2) To develop scientific attitude is the major objective to make the students open minded, critical, curious.
- 3) To develop skill in practical work, experiments and laboratory materials and equipments along with the collection and interpretation of scientific data to contribute the science.
- 4) To understand scientific terms, concepts, facts, phenomenon and their relationships.
- 5) To make the students aware of natural resources and environment.
- 6) To provide practical experience to the students as a part of the course to develop scientific ability to work in the field of research and other fields of their own interest and to make them fit for society.
- 7) The students are expected to acquire knowledge of plant and related subjects so as to understand natural phenomenon, manipulation of nature and environment in the benefit of human beings.
- 8) To develop ability for the application of the acquired knowledge to improve agriculture and other related fields to make the country self reliant and sufficient.
- 9) To create the interest of the society in the subject and scientific hobbies, exhibitions and other similar activities.

6. DURATION

The course shall be a fulltime course.

7. MEDIUM OF INSTRUCTION:

The medium of instruction shall be in English.

8. ELIGIBILITY FOR ADMISSION:

As per guidelines given by Shivaji University, Kolhapur and by following rules and regulations given by Govt. of Maharashtra

9. PATTERN:-

Pattern of examination will be semester.

10. STRUCTURE OF THE COURSE - B. Sc. II Biotechnology (Optional/Vocational) SECOND YEAR (SEMESTER III / IV) (NUMBER OF PAPERS 4)

Sr. No.	Subjects/Papers	Theory	Internal	Total Marks
1.	Paper-V	40	10	50
2.	Paper-VI	40	10	50
3.	Paper-VII	40	10	50
4.	Paper-VIII	40	10	50
	Practical-III			50
	Practical-IV			50
	Total			300

11. Scheme of examination

• The semester examination will be conducted for both theory and practical at the end of each term.

• Theory paper will be of 40 marks each and 10 marks for internal evaluation conducted in the mid of the term. Two practical courses will be of 50 marks each.

• Question papers will be set in the view of the entire syllabus and preferably covering each unit of the syllabus.

• Standard of Passing As per rules and regulation of B.Sc. course.

12. Nature of Question Paper for B.Sc. Part – II (40 + 10 Pattern) according to Revised Structure as Per NEP - 2020 shall be as given below

Maximum Marks: 40 Duration: 1:30 hrs

Q. 1 Select the most correct alternative from the following

[8]

i) to viii) MCQ one mark each with four options

- A)
- B)
- C)
- D)

Q.2 Attempt any TWO of the following[16]A)B)C)Q. 3 Attempt any FOUR of the following[16]A)B)C)D)E)F)

----XXX----

13. Syllabus.

SEMESTER-III

Biotechnology (Optional/Vocational) Paper-V (Major-V): Biophysics and Enzyme technology

CREDITS: 2, LECTURE PERIOD: 2 PER WEEK LECTURE HOURS: 2 PER WEEK, MARKS: 40

Paper-V (Major-V): Biophysics and enzyme technology	Lectures 30
Objectives –	
• To explore biophysical techniques.	
• To understand how enzymes work	
• To learn biocatalyst applications.	
Credit -1	
2.1 Spectroscopy :	15
Principle, working and applications of -	
- Florescence spectroscopy	
- Infra red spectroscopy	
2.2 Immobilization of enzyme – Concept, Advantages, Disadvantages	
2.3 Methods of immobilization -	
1. Physical adsorption 2. Covalent bonding	
3. Cross-linking 4. Entrapment 5. Encapsulation	
2.4 Applications of immobilized enzyme.	
2.5 Biosensor-Types & applications	
Credit -2	
1.1 Enzyme- Definition	15
1.2 IUB Classification of Enzymes.	
1.3 Active site of enzyme, Mechanism of action of enzyme-	
- Lock and Key hypothesis	
- Induced- fit hypothesis.	
1.4 Factors affecting enzyme activity – Temperature, pH, Substrate	
concentration, inhibitors, enzyme concentration, Activators.	
1.5 Structure and function of Isozyme.	
1.6 Concept of activation energy	
1.7 Derivation of Km., Significance of Km and Vmax	
1.8 Allosteric enzymes – Definition, properties	
1.9 Regulation of enzyme activity-	
- Feed back or end product inhibition.	

Learning Outcomes -

Students should be able to

- Learn biophysical techniques
- Understand enzyme immobilization
- Know about Biosensors

References

- 1. Fundamentals of Biochemistry J.L. Jain
- 2. Biophysics Daniel
- 3. Biophysics Nath Upadhyay
- 4. Enzyme structure and function Dixon
- 5. Biotechnology R.C. Dubey
- 6. Enzymes Trevar Palmer
- 7. Biochemistry U. Satynarayanan
- 8. Principles and Techniques in Biochemistry and Molecular Biology- Willson & Walker
- 9. Bioinstrumentation- L.Veerakumari
- 10. Principles of Biochemistry-Albert L. Lehninger

Paper VI (Major VI): Gene Biotechnology

CREDITS: 2, LECTURE PERIOD: 2 PER WEEK LECTURE HOURS: 2 PER WEEK, MARKS: 40

Topic No.	Paper –VI (Major VI): : Gene Biotechnology	Lectures
-	Objectives –	30
	• To understand genetic principles	
	• To application in research and industry	
	• To ethical and safety considerations	
	Credit- I	
	Gene Concept - History	15
	1.2Units of gene – cistron	
	Recon	
	Muton	
	1.3 Spilt genes or (introns) – concept	
	RNA splicing	
	Genetic code and its properties	
	1.5 Overlapping genes	
	1.6 structural organisation of prokaryotic and eukaryotic gene.	
	1.7 Enzymes used in genetic engineering –i) Exonucleases	

ii) Endonucleases iii) Restriction endonucleases iv) S1 nuclease
v) Alkaline phosphatase vi) Reverse transcriptase vii) DNA polymerase
viii) DNA ligase
1.8 Tools of genetic engineering – Cloning vectors – introduction,
characteristics i) Plasmid (PBR 322)
ii) cosmid
iii) Bacteriophages (lambda phage)
iv)Plant vector(Ti)
v) Animal vector (Ri)
1.7 Operon model - lactose Operon
1.8 Gene Cloning in prokaryotes
Isolation of purification of DNA
Lysis of cell
Methods to purify DNA
Credit-II
2.2.1 Techniques in gene biotechnology-15
DNA fingerprinting (DNA profiling) - Introduction
Genetic markers - RFLP, RAPD, AFLP Uses of Minisatellites &
Microsatellites
2.2 Nucleic acid Blotting techniques
i)Southern Blotting
ii)Northern Blotting
iii)Western Blotting
2.3 PCR-Concept ,Real time PCR.
2.3 Gene targeting
2.4 Human gene therapy - Introduction
2.5 Types of gene therapy - (a) Somatic (b) Germ Line (c)
Enhancement (d) Eugenic genetic engineering

Students should be able to understand

- Fundamental concepts of genetics tools in Genetic Engineering.
- Basics of techniques used in Gene Biotechnology.

References:

- $1. \ \ Gene \ Biotechnology-S.N. \ Jogdand$
- 2. Gene Manipulation- Old and Primrose
- 3. Genetic Engineering Verma and Agarwal

- 4. Gene Biotechnology Narain and Naha
- 5. Genetic engineering Smita Rastogi, Neelam Pathak.
- 6. Text book of Biotechnology R.C. Dubey

OE - 3: Food Biotechnology I (Credit-02)

Course Objectives:

- This course is providing the students with basic knowledge about the applications of Biotechnology in the food industry and in food-related sectors.
- The fundamental of the production of fermented foods, and the new biotechnological strategies for obtaining and transforming food products.

Topic No.	OE - 3 : Food Biotechnology	Lectures 30
1.	Unit I: INTRODUCTION.	
	Food biotechnology: definition, history, current situation, social	
	perception. General aspects of food technology and food industry.	
	Quality attributes in food: sensory, nutritional and safetyproperties.	
	Food spoilage: physical, chemical and microbiological agents. Strategies	15
	for the control of spoilage agents.	
2.	Unit II: FOOD FERMENTATIONS.	
	Starter cultures: classification, applications, market trends, legal aspects.	
	Fermented dairy products: classification, characteristics, industrial	
	production, microorganisms involved and targets for starter	
	improvement. Cheese: types, improvement of starters. Products obtained	
	by alcoholic fermentation: alcoholic drinks, bread, doughs. Other foods	15
	obtained by fermentation: vinegar, foods from soy fermentation,	
	meatsubstitutes. Production of ingredient sand additives.	

Course Outcomes:

After successful completion of the course the students will be able to:

i. Understand the importance of methods of preparation of technical products.

ii. Understand the genetically modified food. .

Books:

- 1. Food Biotechnology."Introduction to Food Biotechnology" by Sinosh Skariyachan /Abhilash M.
- 2. Biotechnology in Food fermentation "Advances in food biotechnology" By Ravishankar Rai

VSC –I (Credit-2) Biofertilizer

Exp No.	Title (CREDIT -02)	CREDIT - 02
CREDIT I	Study of Soil Sampling Tools, Collection of Representative Soil Sample, Its Processing and Storage	
	Identification of Rocks	15
	Soil Texture Determination by Feel Method	10
	Determination of Bulk Density	
	Determination of Particle Density of Soil	
	Measurement of Soil Moisture Content by Gravimetric Method	
CREDIT II	Determination of soil Ph	
	Determination of Soil Electrical Conductivity (EC)	15
	Description of Soil Profile	
	Determination of Soil Organic Matter	

Learning Outcomes -

Students should be able to understand

- The concept of biofertilizers and develop the skills for handling microbial inoculants
- The growth and multiplication conditions of useful microbes and their role in mineral cycling and nutrition to plants

Books recommended for Practicals (References) –

- 1. Handbook of Microbial Biofertilizers M. K. Rai
- 2. Production Technology of Bioagents And Biofertilizers Mandal And Roy
- 3. Handbook of biofertilizer and biopesticide Deshmukh, Khobragade and Dixit
- 4. Biofertilizers: Agricultural Uses, Management and Environmental Effects -Dr. P. Reddypriya
- 5. Biofertilizers in Agriculture N.S. Subbarao

SEC I - Techniques in Nursery Development

Learning outcomes

Students after successful completion of the course will be able to

- 1. Understand different types of nurseries
- 2. Identify various facilities required to set up of a nursery
- 3. Understood expertise related to various practices in a nursery
- 4. Acquire skills to get an employment or to become an entrepreneur.

Topic No.	Techniques in Nursery Development	Lectures 30
1.	Unit I:	
	Introduction to Nursery	
	 Definition, objectives and importance. Basic requirements for a nursery layout and components of a good nursery. Types of nurseries. Bureau of Indian standards (BIS - 2008) related to nursery. Nursery inputs Tools, implements and containers. Nursery media. Electricity, equipment and machinery management. Types of nursery beds and their preparations. Precautions and maintenance of nursery beds. 	15
2.	Unit II:	
	Seeds and Propagules	
	Selection of seed and different sowing methods. Use of different plant parts for vegetative propagation to raise nursery. Different techniques of vegetative propagation. Grafting techniques Introduction to grafting, definition, types and tools for grafting. Steps involved in simple, splice graft, tongue graft, Whip graft, cleft graft and wedge graft. Grafting of horticultural & floricultural crops and applications.	15

Course Outcomes:

On successful completion of the course, student shall be able to

- 1. List out different types of nurseries and beds.
- 2. Identify the nursery tools, implements and containers.
- 3. Develop skill on potting media preparation and plant production.
- 4. Learn the technique of establishing cutting, layering, grafting etc

REFERENCES BOOKS:

Semester III Practical Course - Major P III (Credit-02)

Sr. No	Practical I Based on Major V and VI
1	Amylase assay by DNSA method (Major)
2	Effect of pH on amylase (Major)
3	Effect of temperature on amylase (Major)
4	Effect of inhibitor on amylase (HgCl2) (Minor)
5	Effect of activator on amylase (NaCl) (Minor)
6	Isolation of Chromosomal DNA from bacteria (Major)
7	Isolation of Plasmid (Major)
8	Restriction digestion (Major)
9	Separation of Plasmid DNA by Agarose Gel Electrophoresis (Minor)
10	Ligation (minor)
11	DNA sequencing by analysis of autoradiogram (Minor)

Course Outcomes:

Students should be able to understand

- Enzyme and study its kinetics.
- Use techniques of an enzyme assay to characterize enzyme

Books recommended for Practicals- References

- 1. Laboratory manual in Biochemistry- J. Jayraman.
- 2. Practical Biochemistry- David T. Plummer.

Nature of Practical Question paper		50M
Q.1	Experiment	20M
Q.2	Experiment	10M
Q.3	Spotting- A, B, C, D & E	10 M
Q.4	Journal	05M
Q.5	Viva	05M

Semester IV (Optional/Vocational)

Paper VII (Major VII): Molecular Biology CREDITS: 2, LECTURE PERIOD: 2 PER WEEK LECTURE HOURS: 2 PER WEEK, MARKS: 40

Paper-VII (Major VII) : Molecular Biology	
 Objectives – To understand molecular mechanisms To study DNA replication and repair To knowledge of molecular biology to research 	
Credit-I	
1.1Central dogma of life	
1.2 Structural organization of prokaryotic and eukaryotic gene	
1.3 DNA replication- Semi conservative model of replication (Meselson & Stahl Expt.)	
1.4 Prerequisites of replication- Enzymes involved in replication	
1.5 DNA replication in eukaryotes – Initiation, elongation and termination.	15
1.6 Mutation- Definition	15
Types – A. Gene mutation – i) Base pair ii) Missense iii) Nonsense iv) Frame shift	
B. Spontanious mutation – Defination and basic concept	
C. Induced mutation – i) Base analogues – 5 bromo-uracil,	
1.7 Mutagenes – i) Alkalyting agent ii) Acrydine dyes iii) Hydroxylamine	
1.8 A. DNA damage by UV	
B. DNA Repair -	
Photoreactivation	
Credit II	
2.1 Transcription	
Transcription in eukaryote - Initiation, elongation & termination	
2.2 Translation	
Translation in eukaryotes - Activation of amino acids, initiation, elongation and	
termination.	15
2.3 Insertion elements and transposons - Properties and uses.	
2.4 Modes of gene transfer in bacteria –	
a)Transformation	
b)Transduction	
c)Conjugation	

Learning Outcomes -

Students should be able to understand

- Gene Expression
- Basic concept of mutation.
- Modes of gene transfer in bacteria

Paper VIII : (Major VIII) Fermentation Technology

CREDITS: 2, LECTURE PERIOD: 2 PER WEEK LECTURE HOURS: 2 PER WEEK, MARKS: 40

Semester IV Paper –VIII :(Major VIII): Fermentation Technology	Lectures 30
Objectives –	
To understand fermentation principles	
• To learn fermentation equipments and design	
• To safety and regulatory considerations	
Credit I	
1.1 Basic design of fermenter	15
1.2 Construction material used for fermenter	
1.4 Types of fermenters - Tube tower fermenter, Bubble cap	
fermenter, Fluidized bed fermenter, Air lift fermenter	
1.5 Fermentation media	
1.6 Sterilization of fermentation media, equipment and air	
1.7 Screening of industrially important microorganisms	
1.7.1 Primary screening	
1.7.2 Secondary screening	
1.8 Strain improvement by	
i. Mutation	
ii. Genetic engineering	
iii. genetic recombination	
1.9 Preservation of industrially important microorganisms- Culture	
collection centers in India – NCIM	

Credit II	
2.1 Scaleup Bench studies, pilot studies, industrial scale	
2.2 Computer application in fermentation technology	
2.4 Types of fermentations	
2.4.1 Continuous fermentation	15
2.4.2 Batch fermentation	15
2.4.3 Solid state fermentation	
2.5 Downstream processing - Centrifugation, Distillation, Solvent	
extraction, Filtration, Ultrafiltration, precipitation, Ion exchange	
chromatography, gel filtration, affinity chromatography,	
2.6 Crystallization and drying Assays	
2.6.1 Physico-chemicalassays-	
Gravimetric, spectrophotometric, Chromatographic	
2.6.2 Microbiological assays – Diffusion assay.	

Learning Outcomes -

Students should be able to understand

- Describe the history and fundamental knowledge of food fermentation technology
- Basic concept of fermentation technology
- Overview of fermentor design and operation

References:

- 1. Comprehensive Biotechnology volume 3 Murray Moo-Young
- 2. Basic Biotechnology Colin Ratledge & BijonKritinsen, Cambridge university press, UK
- 3. Industrial Microbiology casida
- 4. Principles of Fermentation technology Whittekar
- 5. Industrial Microbiology Prescott & dunns
- 6. Industrial Microbiology A. H. Patel
- 7. Industrial Microbiology Pepler & Perlman

Topic No.	OE - 4 : Food Biotechnology	Lectures
CREDIT 1	 Production of Tempeh. Production of Yoghurt. Extraction and purification of Juice Microbial Analysis of foods Study of Genetically Modified Food. 	15
CREDIT 1I	 6. Determination of chemical constituents of foods 7.Determination of protein 8. Determination of carbohydrate 9.Good Manufacturing Practices for foods 10.Food Preservation Techniques 	15

OE - 4: Food Biotechnology II CREDIT - 02

Course Outcomes:

After successful completion of the course the students will be able to:

- 1. Factors influencing the development of microbes in food
- 2. Application of newer techniques in food processing.

Books:

- 1. Food Biotechnology. "Introduction to Food Biotechnology" by Sinosh Skariyachan /Abhilash M.
- 2. Biotechnology in Food fermentation "Advances in food biotechnology" By Ravishankar Rai

SEC II - Organic Farming

Learning outcomes

Students after successful completion of the course will be able to

1. Understand the soil profile and nutrients in soil

- 2. Appreciate the importance of organic manure and bio fertilizers
- 3. Produce vermi compost, farmyard manure from bio waste

4. Acquire skill on isolation and maintenance of bio fertilizers

Topic No.	Organic Farming	Lectures 30
1.	Unit I:	
	Soil	
	Definition, soil formation, composition and characteristics. Types of soils. Distribution of soil groups in India. Acidic, Alkaline and heavy metal contaminated soil. Methods of reclamation. Effects of chemical dependent farming on yield and soil health. Plant Nutrition Macro and micro nutrients, functions of nutrients in plant growth and development. Nutrient uptake and utilization by plant. Types of fertilizers. Organic, inorganic and bio fertilizers. Chemical fertilizer. Advantages & disadvantages of their use. Importance of organic and bio fertilizers.	15
2.	 Unit II: Organic Farming Definition, concept, benefits. Integrated farming system (combination of organic and inorganic). Mixed farming system. Concept of different cropping systems in relation to organic farming, Inter cropping, crop rotation. Organic farming process. Organic fertilizers, crop nutrients and effective microorganisms in Organic farming. Organic compost Definition, types of compost, farm yard compost, green leaf compost, animal husbandry, animal housing, animal feeding, animal health, breeding goals. Vermi compost: Introduction, vermi composting material, species of earthworms, small scale, large scale composting process. Vermi castings, harvesting, processing and drying. Nutrient content of vermi compost. Field application methods. 	15

Course Outcomes:

On successful completion of the practical course, student shall be able to

- 1. Learn about estimation of NPK levels in the soil
- 2. Demonstrate the collection and processing of raw material
- 3. Develop skill of vermi compost production
- 4. Learn the technique of establishing organic farms

References:

1. Principles of Organic Farming: by E Somasundaram, D Udhaya Nandhini, M Meyyappan ;2021

2. Organic farming in India:: by Arpita Mukherjee; 2017

3. Biofertizer and biocontrol agents for agriculture;; by AM Pirttilä · 2021

4. Trends in Organic Farming in India;; by S. S. Purohit, 2006

5. Biofertilizers for Sustainable Agriculture and Environment;; by Bhoopander Giri Ram Prasad, Qiang-Sheng Wu, Ajit Varma; 2019

Semester IV Practicals Course - Major P IV (Credit-02)

	Practical- II Based on paper VII and VIII
1	Effect of UV on growth of bacteria (Major)
2	Isolation of lac negative mutants of <i>E.coli</i> by visual detection method.(Major)
3	Sub-cellular fractionation of mitochondria, nucleus (Major)
4	Bioassay of penicillin
5	Screening of antibiotic producers
6	Immobilization of yeast (<i>Saccharomyce scerevisiae</i>) cells, production of ethanol by using immobilized yeast cells and determination of Alcohol content by specific gravity method
7	Screening of Amylase Producers from Soil, Production of bacterial amylase by submerged culture method & estimation of amylase by DNSA method
8	Isolation and identification of fungi Aspergillus, Penicillium

Course Outcomes:

Students should be able to understand

- Understanding the effects of UV on bacterial growth
- Isolation of mutants in E-coli

Books recommended for Practicals- References

- 1. Laboratory manual in Biochemistry- J. Jayraman.
- 2. Practical Biochemistry- David T. Plummer.

Practical Examination

(A) The practical Examination is of semester type.

(B) The practical examination will be conducted on two consecutive days for four hours per day per

batch of the practical examination.

(C) Each candidate must produce a certificate from the Head of the Department in her/his college, stating that he/she has completed in a satisfactory manner the practical course on lines laid down from time to time by Academic Council on the recommendations of Board of Studies and that the journal has been properly maintained. Every candidate must have recorded his/her observations in the laboratory journal and have written a report on each exercise performed. Every journal is to be checked and signed periodically by a member of teaching staff and certified by the Head of the Department at the end of the year. Candidates must produce their journals at the time of practical examinations.

Note: - At least 80% Practicals should be covered in practical examination.

Nature of Practical Question paper		50M
Q.1	Experiment	20M
Q.2	Experiment	10M
Q.3	Spotting- A, B, C, D.E	10M
Q.4	Journal	05M
Q.5	Viva	05M

List of minimum equipments-

- 1. Hot air oven -1
- 2. Incubator -1
- 3. Autoclave -1
- 4. Refrigerator 1
- 5. Medical microscopes 10 nos. for one batch
- 6. Chemical balance -2
- 7. pH meter -1
- 8. Cooling Centrifuge 1
- 9. Colorimeter 1
- 10. Distilled Water Plant 1
- 11. Laminar air flow cabinet -1
- 12. Colony counter -1
- 13. Water bath -1

14. Arrangements for gas supply and fitting of two burners per table.

- 15. One working table of 6' x $2\frac{1}{2}$ ' for two students.
- 16. One separate sterilization room attach to the laboratory (10' x 15')
- 17. At least one wash basin for a group of five students
- 18. One separate instrument room attached to lab (10' x 15')
- 19. One laboratory for one batch including working tables (6' x 2½') per two students for one batch.
- 20. Store room (10' x 15')
- 21. Electrophoresis assembly
- 22. UV transilluminator
- 23. Micropipettes (0.5-10 $\mu l,$ 2-20 $\mu l,$ 5-10 μl , 200-1000 μl)
