

## Multiple Choice Questions Question Bank

SHIVAJI UNIVERSITY, KOLHAPUR  
Post Graduate Diploma In Computer Application-(Sem-II) Examination, March-2020  
Paper- 2.1: Office Automation Tools  
Subject Code – 66506

---

**Question:** Select the correct option to complete the given sentences.

- \_\_\_\_\_ are advanced features that can speed up editing or formatting you may perform often in a word document.  
A) Comment                      B) Track changes                      C) Ribbon                      **D) Macros**
- From the following \_\_\_\_\_ option is used to move data from one part of the document to another.  
A) Cut and Delete                      **B) Cut and Paste**                      C) Copy and Paste                      D) Copy and Undo
- \_\_\_\_\_ is a set of unified design elements that provides a look for your document by using color, fonts and graphics.  
**A) Theme**                      B) Format painter                      C) Line spacing                      D) Highlight
- \_\_\_\_\_ shortcut key is used to align the selected text at right.  
A) Ctrl + L                      **B) Ctrl + R**                      C) Ctrl + J                      D) Ctrl + U
- In MS-Excel you can use the formula palette to \_\_\_\_\_  
A) Format cells containing numbers                      B) Enter assumptions data  
**C) Create and edit formula containing functions**                      D) Copy a range of cells
- In MS-Excel \_\_\_\_\_ type of chart is useful for comparing values over categories.  
A) Pie Chart                      **B) Column Chart**                      C) Line Chart                      D) Dot Graph
- The PowerPoint view that displays only text (title and bullets) is \_\_\_\_\_  
**A) Outline view**                      B) Notes page view                      C) Slide sorter                      D) Slide show
- \_\_\_\_\_ controls all the main slide control tasks for your presentation.  
A) Task Bar                      B) Control Panel                      **C) Task Pane**                      D) Status Bar
- In MS Access \_\_\_\_\_ field type will be selected if you need to enter long text in that field.  
A) Text                      **B) Memo**                      C) Currency                      D) Hyperlink
- In MS Access, \_\_\_\_\_ is used to store the data.  
A) Report                      B) Form                      **C) Table**                      D) Query

Paper- 2.2: Web Designing with PHP and MySQL

Subject Code – 66507

---

**Question:** Select the correct option to complete the given sentences.

1. In MySQL the maximum length of the char columns is \_\_\_\_\_.  
A) 65, 535 Bytes      B) 256 Bytes      **C) 255 Bytes**      D) 250 Bytes
2. MySQL support different character sets, \_\_\_\_\_ command is used to display all character sets in MySQL.  
A) SHOW;  
**B) SHOW CHARACTER SET;**  
C) CHARACTER SET;      D) DISPLAY CHARACTERSET ;
3. The "father" Of MySQL Is \_\_\_\_\_.  
A) Bill Joy    B) Stephanie Wall      C) Bill Gates      **D) Michael Widenius**
4. The main MySQL program that does all the data handling is called \_\_\_\_\_.  
A) Mysql      B) Mysql.exe      C) Httpd      **D) Mysqld**
5. PHP is an example of \_\_\_\_\_ scripting language.  
**A) Server-side**      B) Client-side      C) Browser-side      D) In-side
6. \_\_\_\_\_ is known as the father of PHP.  
A) Drek Kolkevi    B) Willam Makepiece      **C) Rasmus Lerdorf**      D) List Barely
7. From the following \_\_\_\_\_ method sends input to a script via a URL.  
**A) Get**      B) Post      C) Both A and B      D) None of these
8. PHP's numerically indexed array begin with position \_\_\_\_\_.  
A) 1      B) 2      **C) 0**      D) -1
9. In PHP, from the following \_\_\_\_\_ symbol is a newline character.  
A) \r      **B) \n**      C) /n      D) /r
10. From the following looping statements \_\_\_\_\_ is/are supported by PHP.  
A) for loop      B) while loop      C) foreach loop      **D) All of these**

---

**Question:** Select the correct option to complete the given sentences.

1. Visual Studio .NET provides \_\_\_\_\_ features.  
A) debugging    B) application deployment    C) syntax checking    **D) All of these**
2. \_\_\_\_\_ access modifier specifies that one or more declared programming elements are accessible from within the assembly that contains their declaration, not only by the component that declares them.  
A) ByRef    B) ByVal    C) Default    **D) Friend**
3. \_\_\_\_\_ symbol creates an access key in the text of a menu item.  
A) @    **B) &**    C) \$    D) #
4. In VB.NET \_\_\_\_\_ method loads the form into memory and displays it on screen.  
A) Load    **B) Show**    C) Display    D) Add
5. The \_\_\_\_\_ object is a stored query definition, which is a precompiled SQL statement.  
A) QueryFed    B) QueryDif    C) QueryFix    **D) QueryDef**
6. MDI stands for \_\_\_\_\_  
**A) Multiple Document Interface.**    B) Multiple Design Interface.  
C) Manipulated Document Interface.    D) Menu Design Interface.
7. \_\_\_\_\_ statement enables us to trap runtime error.  
A) Error    **B) On Error**    C) On runtime Error    D) On Exception
8. \_\_\_\_\_ block of VB.NET identifies a block of code for which particular exceptions will be activated  
**A) Try**    B) Catch    C) Finally    D) Throw
9. \_\_\_\_\_ collection class of VB.NET represents a first-in, first out collection of object.  
**A) Queue**    B) BitArray    C) SortedList    D) Stack
10. In VB.NET, data is handled through \_\_\_\_\_, which facilitates development of web applications.  
A) DAO    B) RDO    C) ADO    **D) ADO.NET**

**Question:** Select the correct option to complete the given sentences.

1. \_\_\_\_\_ error occurs while the program is running and cannot be detected by the PL/SQL compiler.  
A) Syntax error      **B) Runtime error**      C) Both A and B      D) None of these
2. \_\_\_\_\_ statements execute a sequence of statements multiple times.  
**A) LOOP**      B) EXIT      C) Both A and B      D) None of these
3. From the following statements \_\_\_\_\_ are used to control a cursor variable.  
A) OPEN-FOR      B) FETCH      C) CLOSE      **D) All of these**
4. What is the maximum number of triggers that can apply to a single table?  
A) 14      B) 10      **C) 12**      D) 16
5. What is the maximum number of ELSE clauses that can be included in an IF clause that is not nested?  
**A) 1**      B) 0      C) 15      D) Any number
6. \_\_\_\_\_ provides a way for your program to select multiple rows of data from the database and then process each row individually.  
A) PL/SQL Process      B) PL/SQL Trigger  
C) PL/SQL Select      **D) PL/SQL Cursors**
7. From the following \_\_\_\_\_ is the purpose of triggers.  
A) Enforcing referential integrity      B) Synchronous replication of tables  
C) Preventing invalid transactions      **D) All of these**
8. An explicit cursors are declare in \_\_\_\_\_ section of PL-SQL block.  
A) Exception      B) Begin      **C) Declare**      D) Exit
9. \_\_\_\_\_ statements can be used to terminate a PL/SQL loop.  
A) GOTO      **B) EXIT WHEN**      C) CONTINUE WHEN      D) KILL
10. In the SQL Cursor, \_\_\_\_\_ attribute is TRUE when a cursor has some remaining rows to fetch, and FALSE when a cursor has no rows left to fetch.  
A) %ROWCOUNT      **B) %FOUND**      C) %NOTFOUND      D) %ISOPEN
