

Branch: Computer Science & Engineering

Class: BE

Semester-VIII

Subject: Grid Technology (Pre-Revised)

Sample MCQs:

1. The cluster is usually connected to the outside world through only a _____.
 - A. Multimode
 - B. Double node
 - C. Single node
 - D. Triple node

Correct Answer: C

2. The _____ is also another resource that is used in the activities of the virtual organizations.
 - A. Nodes
 - B. Servers
 - C. Clusters
 - D. Bandwidth

Correct Answer: B

3. The _____ layer defines core protocols required for grid-specific network transactions.
 - A. Fabric layer
 - B. Connectivity layer
 - C. Application layer
 - D. Collective layer

Correct Answer: B

4. The _____ layer defines protocols that provide system oriented capabilities for wide scale deployment.
 - A. Resource layer
 - B. Application layer
 - C. Collective layer
 - D. Fabric layer

Correct Answer: C

5. GSS is an _____ standard that provides functions for authentication, delegation and message protection.

- A. IETF
- B. GSS
- C. GSI
- D. API

Correct Answer: A
