List of Proposed Electives for final Year B. Tech

ELECTIVE-I, ELECTIVE-II and ELECTIVE-III Subjects

| Elective-1 (CS415) |
|---|
| 1. Project Management |
| 2. Cyber Laws |
| 3. Internet of Things |
| Elective-2 (CS424) |
| 1. Big Data Technology |
| 2. Data Mining and Warehousing |
| 3. Service Oriented Architecture |
| Elective-3 Open Elective (CS425) |
| 1. Industrial Management |
| 2. Real Time Operating System |
| 3. Optimization Techniques |

Detailed Evaluation and Examination Scheme

1. Out of total 100 theory marks, 50 marks are assigned for Continuous Internal Evaluation (CIE). In CIE, obtaining minimum 20 marks is essential. It is similar to term work, the completion of which is mandatory to become eligible to appear for the Semester End Examination (SEE). Failing to complete the term in a particular course i.e. not obtaining 20 marks in CIE out of 50 shall be treated as term not granted in that course and it is on the part of the course teacher to officially inform the particular case through the respective Program Coordinator and the Director to the University Examination Section. The section will take a kind note of the same and it will not issue the hall ticket of the particular students for the SEE in the particular course/s.
2. CIE (50 marks) includes :
 - Internal Test - I, of 20 marks in 5th week on 1st & 2nd unit
 - Internal Test - II, of 20 marks in 10th week on 3rd & 4th unit
 - Activities for the students: 10 marks. It is at the course owners' discretion to get the assignments of varied nature completed by the students. However, the course teacher will plan to cover those course objectives that suit course learning outcomes and program outcomes that may not be covered in the internal tests.
3. For the Semester End Examination (SEE), 100 marks (3 hours) paper will be set and finally it will be converted to 50 marks. The students must secure minimum 40 % i.e. 20 marks in SEE as the University examination passing head.
4. Final theory marks (out of 100) will be the addition of CIE (out of 50 marks) and SEE (out of 50 marks).
5. Internal Practical/Oral Evaluation (IPE/IOE) will be on the basis of Internal Oral/ Practical/Tutorials/Seminar in which students must secure minimum 40% i.e. 20 marks. It is similar to the term work the completion of which is mandatory to be eligible to appear for the Semester End Examination (SEE).
6. External Practical/Oral Evaluation (EPE/EOE) will be conducted under the supervision by some external course expert. The minimum score 40% i.e. 20 marks is required to be secured as the University's passing head in EPE/EOE.

7. *Semester End Examination duration will be 4 hrs.
8. Equivalence for the Course: As elaborated at the end of this whole curriculum document.

Academic Autonomy:

1. Flexibility in deciding Structure and Contents of Curriculum with reasonable frequency for changes in the same.
2. Continuous Assessment of Students performance with newly adopted - Credit System based on award of grade.
3. Credits are simply a means of attaching relative values to courses of different components. These are a currency of learning and in general regarded as a measure of the time typically required to achieve a given curricular outcome.
4. All courses (Courses) under each Program/Discipline are unitized.

Credit system:

Education at the Institute is organized around the semester-based credit system of study. The prominent features of the credit system are a process of continuous evaluation of a student's performance/progress and flexibility to allow him/her to progress at an optimum pace suited to his/her ability or convenience. Each course by every student needs to fulfill minimum requirements of credits for continuation.

A student's performance/progress is measured by the number of credits that he/she has earned, i.e. completed satisfactorily. Based on the course credits and grades obtained by the student, grade point average is calculated. A minimum grade point average is required to be maintained for satisfactory progress and continuation in the Program. Also a minimum number of earned credits and a minimum grade point average should be acquired in order to qualify for the degree. All Programs are defined by the total credit requirement and a pattern of credit distribution over courses of different categories.

Course credits assignment:

Each course, except a few special courses, has a certain number of credits assigned to it depending upon its lecture, tutorial and laboratory contact hours in a week. This weightage

is also indicative of the academic expectation that includes in-class contact and self-study outside of class hours.

Lectures and Tutorials: One lecture or tutorial hour per week per semester is assigned one credit.

Practical/Laboratory: One laboratory hour per week per semester is assigned half credit.

Example: Course: Digital System and Microprocessor: 5 credits (4-0-2)

The credits indicated for this course are computed as follows:

4 hours/week lectures = 4 credits

0 hours/week tutorial = 0 credit

2 hours/week practical = $2 \times 0.5 = 1$ credit

The contact hours in this case of 5 credits course is 6 hours per week. (4h Lectures + 0 h Tutorial + 2 h Practical = 6 hours per week.)

For each lecture or tutorial credit, the self study component is 1 hour/week and 2 hours/week. In the above example, the student is expected to devote $3 + 1 = 4$ hours per week on self study for this course, in addition to class contact of 5 hours per week.

Earning credits:

At the end of every course, a letter grade is awarded in each course for which a student had registered. On obtaining a pass grade, the student accumulates the course credits as earned credits. A student's performance is measured by the number of credits that he/she has earned and by the weighted grade point average.

The credit system enables continuous evaluation of a student's performance and allows the students to progress at an optimum pace suited to individual ability and convenience.

Features of Credit System at Shivaji University, Kolhapur:

Every course is allotted credits based on its academic importance/weightage.

1. All Courses may not have same credits.
2. There will be 23 to 28 Credits / Semester.

3. Absolute Grading System with 7 Passing Grades viz. AA, AB, BB, BC, CC, CD, DD and FF for failure.
4. Getting FF grade in 4 heads in one academic year, he/she is considered as failed.
5. Continuous Evaluation: Unit Test I i.e. T₁ [20 marks], and Unit Test II i.e. T₂ [20 marks]. Activities will be for 10 marks and the course owner/in charge will have discretion to decide the nature of activities.
6. Standardization of courses: Each course is unitized in 6 numbers. Unit Test I on units I and II while Unit Test II on units III & IV, SEE will be based on all the units of the course curriculum.
7. Unit Test I & Unit Test II will be supervised and evaluated by internal course teachers while SEE will be evaluated mostly by external and internal teachers as joint examiner ships.
8. Any request for re-test will not be entertained after internal test.
9. For both the semesters' failure courses, re-examination will be only after the even Semester End Examination. No re-examination will be conducted for odd semester courses in even semester or vice-versa.

Attendance rule:

All students must attend every lecture, tutorial and practical class. However, to account for late registration, sickness or other such conditions, the attendance requirement will be a minimum of 75 % of the classes actually held. A student with less than 75 % attendance in a course during the semester, in lectures, tutorials and practical taken together (as applicable), will be awarded the 'F' grade in that course irrespective of his/her performance in the tests.

Taking into account the consolidated attendance record for the whole semester, the course in charge in consultation with the Program Coordinator will award 'XX' grade to the student who is deficient in attendance. For the purpose of attendance calculation, every scheduled practical class will be counted as one unit irrespective of the number of contact hours.

Attendance record will be maintained based upon roll calls (or any equivalent operation) in every scheduled lecture, tutorial and practical class. The course owner will

maintain and consolidate attendance record for the course (lectures, tutorials and practical together, as applicable).

Evaluation system:

1. Semester Grade Point Average (SGPA) =

$$\frac{\sum (\text{course credits in passed courses} \times \text{earned grade points})}{\sum (\text{Course credits in registered courses})}$$

2. Cumulative Grade Point Average (CGPA) =

$$\frac{\sum (\text{course credits in passed courses} \times \text{earned grade points}) \text{ of all Semesters}}{\sum (\text{Course credits in registered courses}) \text{ of all Semesters}}$$

3. At the end of B. Tech Program, student will be placed in any one of the divisions as detailed below:

Ist Division with distinction: CGPA ≥ 8.25 and above

Ist Division : CGPA ≥ 6.75 and < 8.25

IInd Division : CGPA ≥ 6.25 and < 6.75

As per AICTE Handbook (2011-12), gradation is as follows:

| Grade Points | Equivalent Percentage Range |
|--------------|-----------------------------|
| 6.25 | 55 |
| 6.75 | 60 |
| 7.25 | 65 |
| 7.75 | 70 |
| 8.25 | 75 |

Conversion of CGPA to corresponding equivalent percentage marks for CGPA > 5.0 may be obtained using the following equation:

$$\text{Equivalent Percentage marks} = (\text{Respective CGPA} \times 10) - 7.5$$

An example of these calculations is given below:

Typical academic performance calculations - I semester

| Course no. | Course credits | Grade awarded | Earned credits | Grade points | Points Secured |
|------------|----------------|---------------|----------------|--------------|-------------------------|
| Col 1 | Col 2 | Col 3 | Col 4 | Col 5 | Col 6 (Col 4* Col 5) |
| MALXXX | 5 | CC | 5 | 6 | 30 |
| CSLXXX | 4 | CD | 4 | 5 | 20 |
| PHLXXX | 4 | AA | 4 | 10 | 40 |
| PHPXXX | 2 | BB | 2 | 8 | 16 |
| MELXXX | 4 | FF | 0 | 0 | 0 |
| TTNXXX | 2 | AB | 2 | 9 | 18 |
| Total | 21 | | 17 | 38 | 124 |

1. Semester Grade Point Average (SGPA) =

$$\frac{(124)}{(21)} = 5.90$$

2. Cumulative Grade Point Average (CGPA) =

Cumulative points earned in all passed courses = 124 (past semesters) + 124 (this sem.) = 248
Cumulative earned credits = 23 (past semesters) + 21 (this sem.) = 44

$$\frac{\sum (124 + 124)}{\sum (23 + 21)} = 5.63$$

Chart for marks range and its corresponding grade and grade points

| Marks Range | Grade Points | Grade | Description of Performance |
|-------------|--------------|-------|----------------------------|
| 91-100 | 10 | AA | Outstanding |
| 86-90 | 09 | AB | Excellent |
| 76-85 | 08 | BB | Very Good |
| 66-75 | 07 | BC | Good |
| 56-65 | 06 | CC | Fair |
| 46-55 | 05 | CD | Average |
| 40-45 | 04 | DD | Poor |
| Below 40 | 00 | FF | Fail |
| -- | -- | \$ | Passed in first attempt |

| | | | |
|----|----|---|---|
| -- | -- | PP | Passed (Audit Course) |
| -- | -- | NP | Not Passed (Audit Course) |
| -- | -- | ** 2 nd *** 3 rd **** 4 th | One grade punishment for 2 nd , 3 rd , 4 th , ... attempt, |

Audit Courses:

Additional courses shall be included as audit courses from the third semester onwards. While the performance of the student in audited courses shall be included in the Grade Card, these grades do not contribute to SGPA or CGPA of the concerned student.

Award of Degree:

Following rules prevail for the award of degree:

1. A Student has registered and passed all the prescribed courses under the general institutional and departmental requirements.
2. A student has obtained $CGPA \geq 4.5$.
3. A student has paid all the institute dues and satisfied all the requirements prescribed.
4. A student has no case of indiscipline pending against him/her.
5. Institute authorities shall recommend the award of B.Tech degree to a student who is declared to be eligible and qualified for above norms.

CGPA Improvement Policy for award of degree:

An opportunity shall be given to a student who has earned all the credits required by the respective program with CGPA greater than or equal to 4.00 but less than 4.50, to improve his/her grade by allowing him/her to appear for 100% examinations of maximum two theory courses of seventh and eighth semester. However, CGPA shall be limited to 4.5 even though the performance of a student as calculated through modified CGPA becomes greater than 4.5.

Equivalence of Final Year B. Tech (Computer Science and Technology) Semester VII and VIII

The above detailed syllabus is a revised version of the Final Year B. Tech (**Computer Science and Technology**) course being conducted by the Shivaji University at the Technology Department of the University. This syllabus is to be implemented from June 2019-2020, (Academic year 2019-2020-20). The prime feature of this revision is the transformation of the existing curriculum into the Outcome based curriculum as specified in NBA rules and regulations.

The Equivalence for the subjects of **Computer Science and Technology** at Final Year B Tech Semester VII and VIII pre-revised course under the faculty of Engineering and Technology is as follows.

Final Year B Tech Semester VII (Computer Science and Technology)

| Sr. No | Final Year B. Tech (Computer Science and Technology) Semester VII Pre-revised syllabus | Final Year B. Tech (Computer Science and Technology) Semester VII Revised syllabus(For Credit System) | Remark |
|--------|---|--|----------------------------------|
| 1 | Advanced Computer Architecture | Advanced Computer Architecture | No change in the subject content |
| 2 | Advanced Database Management System | Advanced Database Management System | No change in the subject content |
| 3 | Distributed Systems | Distributed Systems | No change in the subject content |
| 4 | Network Engineering | Network Engineering | No change in the subject content |
| 5 | Elective-I Project Management | Elective-I Project Management | No change in the subject content |
| 6 | Elective-I Cyber Laws | Elective-I Cyber Laws | No change in the subject content |
| 7 | Elective-I Modern Information Retrieval | Elective-I Internet of Things | |
| 11 | Web Technology Lab-1 | Web Technology Lab-1 | No change in the subject content |
| 12 | Network Engineering Lab | Network Engineering Lab | No change in the subject content |
| 13 | Major Project Phase-I | Major Project Phase-I | No change in the subject content |
| 14 | Audit Course VI Professional Ethics | Professional Ethics | No change in the subject content |

Final Year B Tech Semester VIII (Computer Science and Technology)

| Sr. No | Final Year B. Tech (Computer Science and Technology) Semester VIII Pre-revised syllabus | Final Year B. Tech (Computer Science and Technology) Semester VIII Revised syllabus(For Credit System) | Remarks |
|---------------|--|---|----------------------------------|
| 1. | Mobile Technology | Mobile Technology | No change in the subject content |
| 2. | Information Security | Information Security | No change in the subject content |
| 3. | Soft Computing | Soft Computing | No change in the subject content |
| 4. | Elective-2 Grid Computing | Elective-2 Big Data Technology | |
| 5. | Elective-2 Data Mining and Warehousing | Elective-2 Data Mining and Warehousing | No change in the subject content |
| 6. | Elective-2 Service Oriented Architecture | Elective-2 Service Oriented Architecture | No change in the subject content |
| 7. | Web Technology Lab-2 | Web Technology Lab-2 | No change in the subject content |
| 8. | Soft Computing Lab | Soft Computing Lab | No change in the subject content |
| 9. | Major Project Phase-II | Major Project Phase-II | No change in the subject content |
| 10. | Elective-3 Industrial Management | Elective-3 Industrial Management | No change in the subject content |
| 11. | Elective-3 Real Time Operating System | Elective-3 Real Time Operating System | No change in the subject content |
| 12. | Elective-3 Optimization Techniques | Elective-3 Optimization Techniques | No change in the subject content |
| 13. | Audit Course VII Constitution of India | Constitution of India | No change in the subject content |

Audit course have not been assigned any credits. The students will be evaluated for these courses by the concerned course in charge. There will be grade conferred to the student. The grade will be based on conversion of marks obtained out of 50. (Obtaining passing grade is essential). Please refer to chart in the detail examination scheme. The chart shows the marks range and the respective grade.

Computer Science and Technology
Program Educational Objectives (PEOs), Program Outcomes (POs) and Program
Specific Outcomes (PSOs) of the Program:

| Program Educational Objectives (PEOs): | |
|---|--|
| PEO1 | To create graduates with sound learning of basics of Computer Science and Technology who can contribute towards propelling Science and Technology . |
| PEO2 | To create graduates with adequate abilities in Computer Science and Technology who can progress towards becoming developers, researchers and designers to fulfill the necessities of Computer Industries. |
| PEO3 | To develop among students capacity to figure, formulate ,analyse and solve real life problems confronted in Software Enterprises. |
| PEO4 | Graduate will exhibit professionalism, ethical attitude, communication ability, collaboration in their profession and adapt to current trends by engaging in life long learning. |
| Program Outcomes (POs) | |
| PO1 | Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. |
| PO2 | Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. |
| PO3 | Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations. |
| PO4 | Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. |
| PO5 | Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations. |
| PO6 | Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice. |
| PO7 | Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. |
| PO8 | Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice. |
| PO9 | Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings. |
| PO10 | Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. |
| PO11 | Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments. |

| | |
|--|--|
| PO12 | Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. |
| Program Specific Outcomes(PSOs) | |
| PSO1 | Provide effective and efficient knowledge of technology and free open source software (FOSS)through IIT Bombay Spoken Tutorial Project |
| PSO2 | To create the awareness of foreign language among students to meet global needs and look for oppetunities in multinational companies. |
| PSO3 | Provide platform to students to develop a new and innovative project which will improve local industry needs . |

| <p>Architecture</p> <ol style="list-style-type: none"> Justify need if high performance provided by Parallel Computer Architecture Comprehend and differentiate various computer architectures. Interpret performance of different pipelined processors and multiprocessing configurations Describe and Apply concept of distributed memory architecture and parallel program network properties Understand concept of programmability issues, parallel programming models and Use of the programming environment like pthreads, openMp and MPI. | |
|---|-------|
| Curriculum Content | Hours |
| <p>Unit 1</p> <p>Architecture Development tracks towards parallel processing, Super Scalar and VLIW architecture, Vector processing concepts, pipelined vector processors, Compound Vector Processing, Multivector processor: Cray Y-MP design. SIMD Computers, Performance Metrics and Measures</p> | 4 |
| <p>Unit 2</p> <p>Multithreaded architectures–principles of multithreading, Latency hiding techniques, Scalable coherent multiprocessor model with distributed shared memory, Systolic arrays and their applications, Associative memory processors, Concepts of Dataflow computing, Dataflow and Hybrid architectures</p> | 8 |
| <p>Unit 3</p> <p>Loosely coupled and tightly coupled architectures, Cluster computing as an application of loosely coupled architecture. Examples – CM* and Hadoop , Advanced Processor Technology, Memory Hierarchy Technology, Virtual Memory Technology</p> | 6 |
| <p>Unit 4</p> <p>Types and levels of parallelism, Operating systems for parallel processing, Models of parallel operating systems-Master-slave configuration, Separate supervisor configuration, Floating supervisor control, Data and Resource Dependences, Data dependency analysis-Bernstein's condition</p> | 4 |
| <p>Unit 5</p> <p>Conditions of parallelism, Program Partitioning and Scheduling, Grain Sizes and Latency, Grain Packing and Scheduling, Static Multiprocessor Scheduling, Program flow mechanisms, System Interconnect Architectures-Network Properties and Routing, Static Connection Networks, Dynamic Connection Networks.</p> | 6 |
| <p>Unit 6</p> <p>Parallel Programming Models-Shared-Variable Model, Message-Passing Model,</p> | 8 |

| | | | |
|--|---|--|--|
| Data-Parallel Model, Object Oriented Model, Functional and Logic Models, Study of Open MP, Parallel Languages and role of Compilers-Language Features for Parallelism, Parallel Language Constructs, Optimizing Compilers for Parallelism, Code Optimization and Scheduling- Scalar Optimization with Basic Blocks, Local and Global Optimizations, Vectorization and Parallelization, Code Generation and Scheduling, Trace Scheduling Compilation, Recent architecture case study. | | | |
| <i>Text Books</i> | : | 1. Kai Hwang, Advanced computer architecture (MGH). | |
| <i>Reference Books</i> | : | 1. Kai Hwang and Briggs, Computer Architecture and Parallel Processing – (MGH). 2. Hadoop Internet for Open MP. | |

| | | | | | | | | |

| <i>Class & Semester</i> | : | Final. Year B.Tech (Computer Science &Technology) Part I, SemVII | | | | | | |
| | | | | | | | | |
| <i>Course Title</i> | : | Advanced Database Management System | | | | <i>Course Code:</i> | : | CS 412 |
| <i>Teaching Scheme (Hours)</i> | : | 3 hours/weeks=3x 13 weeks= 39hrs minimum | | | | <i>Total Credits</i> | : | 03+ 01 =4 |
| | | Tutorial= 1hr/week | | | | | | |
| <i>Evaluation Scheme (Marks)</i> | : | CIE = 50 SEE = 50 | IPE IOE EPE/EOE | : | = 100 | <i>Duration of SEE</i> | : | 3hrs |
| <i>Revision:</i> | : | Third | | | | <i>Month</i> | : | <i>June 2019</i> |

| | | |
|--|---|-----------|
| <i>Pre-requisites</i> | : | |
| Basic understanding of C++ programming language ,Database Engineering and SQL | | |
| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Core |
| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> Student is evaluated during the Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| <i>Course Objectives:</i> <ol style="list-style-type: none"> 1. To understand the different types of database system architectures. 2. To Design and implement advanced object oriented database queries using Structured Query Language. 3 To study and design distributed database with its applications 3. To Understand and study parallel database principles. 4. To administer a database by recommending and implementing procedures including database tuning, backup, query processing, query optimization and recovery. 5. To learn advanced querying with Decision support system and information retrieval. | | |

| Course Outcomes: | |
|--|-------|
| Students will be able to | |
| <ol style="list-style-type: none"> 1. Explain and evaluate the fundamental theories for advanced database architectures and query operators. 2. Design and implement parallel database systems with evaluating different methods of storing, managing of parallel database. 3. Assess and apply database functions of distributed database. 4. Evaluate different database designs and architecture. 5. Administer and analyze database with query optimization techniques and develop Web interface with database. 6. Understand advanced querying and decision support system. | |
| Curriculum Content | Hours |
| Unit-1 | |
| Database Systems architectures Centralized & C/S architectures, server systems, distributed systems, networks types. | 4 |
| Object-Relational Databases Nested relations, complex types, inheritances, reference types, querying with complex types, functions and procedures, OO versus Object-Relational. | 5 |
| Unit-2 | |
| Distributed Databases Homogeneous & heterogeneous databases, distributed data storage, distributed transactions, commit protocols, concurrency control in distributed databases, availability, distributed query processing, heterogeneous distributed databases, directory systems. | 6 |
| Unit-3 | |
| Parallel Database Integrated, I/O parallelism, inter-query parallelism, intra-query parallelism, intra-operation parallelism, inter-operation parallelism, design of parallel systems. | 5 |
| Unit-4 | |
| Application development & Administration Web interfaces to databases, performance tuning, performance benchmarks, standardization, E-commerce, Legacy systems | 7 |
| Unit-5 | |
| Advanced Querying & Information Retrieval Decision support systems, data analysis and OLAP, Data mining, data-warehousing, Information Retrieval systems. | 7 |

| | | |
|---|---|---|
| Unit-6 Advanced transaction processing Transaction-processing monitors, transactional workflows, main-memory databases, real-time transaction systems, long-duration transactions, transaction management in multi-databases. | | 5 |
| <i>Text Books</i> | : | |
| | | 1. Silberschatz, Korth, Sudarshan – 4th Edition Database system concepts – (MGH). 2. Raghu Ramkrishnan Database Management System – (MGH). |
| <i>Reference Books</i> | : | |

| <i>Revision:</i> | : | Third | | | | <i>Month</i> | : | June 2019 |

| | | |
|--|---|---|
| <i>Pre-requisites</i> | : | |
| The prerequisite for this course is basic knowledge of Operating System-I and Operating System-II. | | |
| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Core (Process, Synchronization, Distributed file system, Fault tolerance) |
| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> | | |
| Student is evaluated during Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| <i>Course Objectives:</i> | | |
| <ol style="list-style-type: none">1. To learn the fundamentals of Distributed Operating Systems2. To get knowledge in naming, synchronization, consistency and replication, fault tolerance, security, and distributed file systems.3. To learn the principles, architectures, algorithms used in distributed systems.4. To focus on performance and flexibility issues related to systems design | | |

| <p>decisions.</p> <p>5. To expose students to current literature in distributed systems.</p> | |
|---|-------|
| <p>Course Outcomes:</p> <p>Students will be able to</p> <ol style="list-style-type: none"> 1. Demonstrate knowledge of the core architectural aspects of distributed Systems. 2. Demonstrate distributed systems using various interposes communication techniques, such as remote procedure call, remote method invocation. 3. Summarize key mechanisms and models for distributed systems including logical clocks, election algorithms, distributed mutual exclusion, consistency and replication. 4. Describe the various design issues in distributed system e.g. system performance and reliability, distributed file system etc. 5. Use and apply important methods in distributed systems to support scalability and fault tolerance. 6. To compare state-of-the-art distributed systems, such as Google File System. | |
| Curriculum Content | Hours |
| <p>Unit 1 Introduction Definition, Goals, Types of distributed systems: Distributed Computing System, Distributed Information System, Architecture: Architectural, Styles, System Architecture</p> | 6 |
| <p>Unit 2 Processes and Communication Virtualization, Servers, Code Migration, Software Agents, Remote Procedure Call, Message Oriented Transient Communication</p> | 6 |
| <p>Unit 3 Synchronization Distributed Shared Memory: General architecture, Design and Implementation Issues, Consistency Models, Implementing Sequential Consistency Model, Replacement Strategy, Thrashing, Heterogeneous DSM, Physical Clock Synchronization, Logical Clock, Mutual exclusion, Election Algorithms</p> | 8 |
| <p>Unit 4 Distributed File Systems Architecture, Processes, Communication, Naming, Synchronization, Consistency Replication</p> | 6 |
| <p>Unit 5 Fault Tolerance Introduction, Process Resilience, Distributed Commit, Recovery.</p> | 6 |

| | | |
|---|---|---|
| Unit 6 Distributed Operating Systems Amoeba: Design goals, architecture, process management, file management. Mach: Design goals, architecture, process management, memory management | | 5 |
| <i>Text Books</i> | : | |
| | | 1. A. S. Tanenbaum (2 nd Edition) Distributed Systems Principles and Paradigms-, Pearson Education 2. P. K. Sinha (PHI) Distributed Operating Systems (For Distributed shared memory and distributed operating systems) |
| <i>Reference Books</i> | : | |
| 1. George Coulouris, Jean Dollimore, Tim Kindberg (Pearson Education) Distributed Systems Concepts & Design | | |

| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Core |
| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> Student is evaluated during the Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| <i>Course Objectives:</i> <ol style="list-style-type: none"> 1. To introduce various networking components and Microsoft windows operating system and concept and trends. 2. To understand overall system architecture of windows operating system with its key system components. 3. To introduce windows security system components and design issues of it. 4. To introduce I/O system components of windows network operating system. 5. To introduce windows networking architecture. | | |

Course Outcomes:

Students will be able to

1. To identify the various networking devices like switches, hub, routers, and gateways with their functioning and understand Microsoft windows O.S. Concept and terms.
2. To learn overall system architecture of windows with its key components.
3. To learn security system components and analyze design issues of Window security system.
4. To understand and analyze I/O system components of Windows Network operating system.
5. To identify various programming models and protocol support for implementing windows network applications.

| Curriculum Content | Hours |
|---|-------|
| Unit: 1 Introduction to concepts and tools of Windows OperatingSystem: Introduction to Networking Components, Architectures, Windows Flavors of Network Operating Systems, Foundation Concepts And Terms, Windows API, Services, Functions, Routines, Processes, Threads, Jobs, Virtual Memory, Kernel Mode Vs. User Mode, Terminal Services And Multiple Sessions, Objects And Handles, Registry.. | 3 |
| Unit:2 System Architecture: Requirements and Design Goals, Operating System Model, Architecture Overview, Key System Components. | 5 |
| Unit:3 Security: Security Ratings, Security System Components, Protecting Objects, Account Rights and Privileges, Security Auditing. | 6 |
| Unit:4 I / O system Device Drivers, Types of Device Drivers, Structure of a Driver, Types of I/O, The Plug and Play (pnp) Manager, Installation. Storage terminology, disk drivers, volume management, windows file system formats, File system driver architecture. | 7 |
| Unit:5 Windows networking architecture: Windows networking architecture, the OSI reference model, windows networking Components, networking APIs, windows sockets, Winsock kernel (wks.), remote procedure Call, web access APIs, named pipes and mail slots , NetBIOS, other networking apis. | 6 |

| | | |
|--|----------|--|
| Unit:6 | | 9 |
| Linux: - Introduction, Boot and system configuration services, Network Tools, selinux policy Rules and configuration files, Linux services and protocols – FTP, SMTP, Telnet, IP Sec. And VPN (Virtual Private Network), managing services, Super user control, and system run levels, performance Analysis tools, GRUB and RAID. | | |
| <i>Text Books</i> | : | |

| <div><div></div><div><div>1. To understand what is Internet of things</div><div>2. To describe smart objects and IoT Architecture.</div><div>3. To Compare different Application protocols for IoT</div><div>4. To understand data analytics and security in IoT</div></div></div> | | |

Course Outcomes:

Students will be able to

1. Describe key technologies in Internet of Things.
2. Compare and contrast the deployment of smart objects and the technologies to connect them.
3. Compare the role of IoT protocols for efficient network communication.
4. Summarize the need for Data Analytics and Security in IoT
5. Describe different sensor technologies for sensing real world entities and identify the applications of IoT in Industry.
6. To understand IoT platforms such as Raspberry-Pi and Arduino

| Curriculum Content | Hours |
|---|-------|
| UNIT 1 FUNDAMENTALS OF IoT What is IoT, Genesis of IoT, IoT and Digitization, IoT Impact, Convergence of IT and IoT, IoT Challenges, IoT Network Architecture and Design, Drivers Behind New Network Architectures, Comparing IoT Architectures, A Simplified IoT Architecture, The Core IoT Functional Stack, IoT Data Management and Compute Stack. | 6 |
| Unit 2 Smart Objects Smart Objects: The “Things” in IoT, Sensors, Actuators, and Smart Objects, Sensor Networks, Connecting Smart Objects, Communications Criteria, IoT Access Technologies. | 6 |
| Unit 3 Network & Communication aspects IP as the IoT Network Layer, The Business Case for IP, The need for Optimization, Optimizing IP for IoT, Profiles and Compliances, Application Protocols for IoT, The Transport Layer, IoT Application Transport Methods. | 7 |
| Unit 4 Data and Analytics for IoT Data and Analytics for IoT, An Introduction to Data Analytics for IoT, Machine Learning, Big Data Analytics Tools and Technology, Edge Streaming Analytics, Network Analytics | 6 |
| Unit 5 IOT Security Securing IoT, A Brief History of OT Security, Common Challenges in OT Security, How IT and OT Security Practices and Systems Vary, Formal Risk Analysis Structures: OCTAVE and FAIR, The Phased Application of Security in an Operational Environment | 6 |

| | | |
|--|---|---|
| Unit 6 IoT Platforms IoT Physical Devices and Endpoints - Arduino UNO: Introduction to Arduino, Arduino UNO, Installing the Software, Fundamentals of Arduino Programming, RaspberryPi: Introduction to RaspberryPi, About theRaspberryPi Board: Hardware Layout, Operating Systems on RaspberryPi, Configuring RaspberryPi, Programming RaspberryPi with Python | | 7 |

| Knowledge of Computer Network and Socket Programming. | | |
| <i>Type of Course</i> | : | Practical |
| <i>Course Domain</i> | : | Core |
| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> | | |
| Student is evaluated during Internal Oral Examination and External Oral Examination. | | |
| <i>Course Objectives:</i> | | |
| <ol style="list-style-type: none">1. To understand the Networking Devices like hub switch, router and study of NIC.2. To understand and learn socket programming.3. To gain overall knowledge about installation of different operating system.4. To understand common services needed for network functionality, maintenance, and troubleshooting such as DNS, DHCP and FTP.5. Study of IIS Sever and Netsim. | | |

Course Outcomes:

1. Analyze and resolve networking problems through the application of systematic approaches and diagnostics tools.
2. Students will be able to understand and implementation of socket programming.
3. To gain over all knowledge about installation of different operating system.
4. Student will understand the different networking services.
5. Analyze the IIS server, NIC and Simulation of Netsim.

Practical covered

:

It should consist of the following –

I) Minimum 8-10 network programming assignments on different network services and protocols using socket programming, Named pipes, Mailslots, NetBIOS, RPC, etc.

II) Installing, configuring, managing and troubleshooting any one or more network operating systems and services – Win 2008 / 2003, Linux / Unix, Mac, etc and use their services like – FTP, Telnet, DHCP, HTTP, Clustering, Terminal services, Remote Desktop Enabling, DNS, Active Directory Services, User management , etc.

| <i>Course Objectives:</i> <ol style="list-style-type: none"> 1. Understanding the Configuration of XML application. 2. Creating XML applications using standard .net controls. 3. To create a JDBC application. 4. Understanding Configuration of Tomcat Server and Deployment servlet. 5. Understand the fundamentals of developing modular application by using JSP | | |

| <p>Course Outcomes:</p> <p>Students will be able to</p> <ol style="list-style-type: none"> 1. Apply technical knowledge and perform specific technical skills 2. Design web applications using XML 3. Use design XML controls. 4. Create database driven applications using Apache server 5. Handle database using jsp applications | |
|--|-------|
| Curriculum Content | Hours |
| <p>Unit-1</p> <p>Introduction to XML</p> <p>What is XML, XML verses HTML, XML terminology, XML standards, XML syntax checking, The idea of markup, XML Structure, Organizing information in XML, Creating Well-formed XML, XML Namespaces. DTD- Introduction to DTD, Document Type Declaration, Element Type Declaration, Attribute Declaration, Conditional Section, Limitations of DTD Parsing XML: Introduction to Parser, Parsing approaches, JAXP, JAXP and SAX, JAXP and DOM.</p> | 5 |
| <p>Unit-2</p> <p>Extensible Stylesheet Language (XSL), XML Schema</p> <p>Introduction to XSL, overview, XPATH, XSLT– templates, creating elements and attributes, looping and sorting, conditional processing, defining variables.</p> <p>XML Schema: Introduction, basic and complex schema, specifying frequency, element contents, content model reuse, anonymous types, mixed content, grouping of data, mandating all elements, choices, sequences, simple types- numeric, time, xml, string, binary data types, deriving types- facets,attribute.</p> | 4 |
| <p>Unit-3</p> <p>Introduction to Servlet</p> <p>History of web applications, support for web application, power of servlet, a Servlet's job, basic servlet code, configuration of apache tomcat server, setup Development Environment, Compiling and Deploying Servlet, Web Application -directory structure, Deployment descriptor, Assigning custom URLs to servlet.</p> <p>Structure of Servlet</p> <p>HTTP basic, The servlet API, Page Generation, The Servlet Life Cycle – The Service method, doGet and doPost methods, Init method, destroy method, The Single Thread Model interfaces.</p> | 5 |

| | |
|--|---|
| <p>Unit-4</p> <p>Retrieving Information</p> <p>Servlet Init Parameters and Parameter Names, Information about server, Context Init Parameters, The Client Information – information about client machine, Restricting Access, Information about user, The Request – Request Parameter, path information, Serving files, Serving Resources, Request Headers, Handling Post Request.</p> <p>Creating Response in Servlet</p> <p>The Structure of response, sending normal response,using persistent connection, response buffering, controlling response buffer, status codes,setting status code, HTTP headers, setting HTTP headers, Redirecting request, client pull, configuring error pages, logging, Exceptions.</p> <p>Unit-5</p> <p>Java Server Pages: Need for JSP, Benefits of JSP, Advantages of JSP over other technologies, Installation of JSP pages, Creating Template Text, Invoking Java Code From JSP, Limiting the JAVA code in JSP, Using JSP Expression, Example of JSP Expression, Comparing Servlet to JSP, Writing Scriptlets, Scriptlet examples, Scriptlet for conditional execution, Using Declaration, Declaration Example, Using Predefined Variables, JSP page Directive – import, contentType, pageEncoding, session, buffer, autoFlush, errorPage</p> <p>Unit-6</p> <p>Web Services: Introduction to Web Services,Comparison of Web Services with traditional technologies, Buzzwords in Web Services, Java Web Services, RESTful Web Services.</p> | <p>6</p> <p>4</p> <p>2</p> |
|--|---|

Lab: It should consist of 10-12 experiments based on the following topics.

- 1.Create different types of XML documents.
- 2.Search information from XML document using SAX parser.
- 3.Navigating the Document Object Model tree for given XML Document.
- 4.Editing, Updating XML document using DOM.
- 5.Write XSLT styles-sheet to convert XML document to HTML.
- 6.XML Validation using Xschema.
7. Remote Procedure call using XML.
8. Storing XML contents to database.
9. Installation, Configuration of Tomcat Server and Deployment of servlet based application.
10. Write a servlet to store form data to database – use Type 4 JDBC driver and Database connectivity support from server.
- 11.Session Management using Servlet.
12. Write a JSP application to display database contents.

13. Write an JSP application to search particular information in database
14. Session Management using JSP.

To Conduct project planning activities that accurately forecast project costs, timelines, and quality. 3. To Participate effectively as a member of a development team and undertaken leadership roles when appropriate 4. To Conduct project closure activities and obtain formal project acceptance. | | |

Course Outcomes:

Students will be able to

1. Conduct a survey of several available literatures in the preferred field of study.
Apply knowledge of computer science for real world problem
2. Formulate and propose a plan for creating a solution for the identified problem and apply Software Development Lifecycle effectively.
3. Report and present the findings of the study conducted in the preferred domain
4. Develop good communication skills and team work
5. Demonstrate a strong working knowledge of ethics and professional responsibility

Curriculum Content

The project work is to be carried out in two semesters of Final Year B.Tech. The project should be undertaken preferably by group of 4-5 students who will jointly work and implement the project in the two semesters.

In Semester VII, The group will select a project with the approval of the Guide (teaching faculty) and submit the name of the project with a synopsis of the proposed work of not more than 02 to 08 pages before second week of August in the academic year. The group is expected to complete detailed system design, analysis, data flow design, procurement of hardware and/or software, implementation of a few modules of the proposed work at the end of semester –VII as a part of the term work submission in the form of a joint report.

The term work assessment will be done jointly by teachers appointed by Head of the Department.

The oral examination will be conducted by an internal and external examiner as appointed by the University.

Note:

1. Project work should be continually evaluated based on the contributions of the group members, originality of the work, innovations brought in, research and developmental efforts, depth and applicability, etc.
2. Two mid-term evaluations should be done, which includes presentations and demos of the work done.
3. Care should be taken to avoid copying and outsourcing of the project work.

| | | Viva voce | 25 | Grand Total | 100 | | | |
| <i>Revision:</i> | : | Third | | | | <i>Month</i> | : | <i>June 2019</i> |

| | | |
|-----------------------|---|--------------|
| <i>Pre-requisites</i> | : | |
| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Audit Course |
| <i>Skills Imbided</i> | : | Cognitive |

Course Assessment Methods:

The students will be given five assignments each for 10 marks. At the end of the course, there will be a written test of 25 marks and a viva voce of 25 marks. There will be assessment for a total of 100 marks. Based on the marks obtained, they will be awarded with a grade similar to other credit courses. Though it is an audit course, obtaining passing grade is essential.

Course Objectives:

1. To provide basic knowledge about engineering Ethics, Variety of moral issues and Moral dilemmas, Professional Ideals and Virtues
2. To provide basic familiarity about Engineers as responsible Experimenters, Research Ethics, Codes of Ethics, Industrial Standards, Exposure to Safety and Risk, Risk Benefit Analysis
3. To have an idea about the Collegiality and Loyalty, Collective Bargaining, Confidentiality, Occupational Crime, Professional, Employee, Intellectual Property Rights.
4. To have an adequate knowledge about MNC's, Business, Environmental, Computer Ethics, Honesty, Moral Leadership, sample Code of Conduct.

Course Outcomes:

Students will be able to

1. To improve verbal and non verbal communication.
2. To learn recent trends and technologies in area of computer science and information technology.
3. To recognize problems after doing research literature survey using various resources
4. To prepare concise, comprehend and conclude selective topic in area of computer science and information technology Effective outcomes.

| Curriculum Content | Hours |
|---|--------------|
| Unit 1 Engineering Ethics – Moral Issues, Ethical theories and their uses | 3 |
| Unit 2 Engineering as Experimentation – Code of Ethics | 3 |
| Unit 3 Engineer's Responsibility for Safety | 3 |
| Unit 4 Responsibilities in Rights | 3 |
| Unit 5 Global issues of engineering ethics | 3 |
| Unit 6 Introduction to Entrepreneurship awareness and Development: Functions -why men become economic innovators –Various Assistance Programmes for Small Scale and large Scale Industries through agencies, like IDBI, IFC, ICICI, NSIC, SFC, SIDCO and DIC. | 3 |

| <i>Pre-requisites</i> | : | |
| Knowledge of Data Communication and Computer Network. | | |
| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Core |
| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> Student is evaluated during the Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| <i>Course Objectives:</i> <ol style="list-style-type: none"> 1. To introduce the fundamental aspects of wireless transmissions. 2. To understand medium access technology 3. To understand GSM and DECT system. 4. To learn wireless local area network technologies. 5. To learn mobile network layer and transport layer. | | |

Course Outcomes:

Students will be able to

1. To learn basics facts about signal, antenna and signal propagation, and different Data transmission techniques.
2. To learn medium access control algorithms and compare SDMA, FDMA, CDMA mechanisms.
3. To identify the architecture, services and protocol of GSM and DECT system.
4. To identify architectures and data transmission technologies used in IEEE 802.11, HIPERLAN, Bluetooth, WATM.
5. To identify the design issues of network layer and transport layer with its approaches for wireless communication.

| Curriculum Content | Hours |
|---|-------|
| Unit: 1 Introduction to wireless communication: Need and Applications of wireless communication, Wireless Data Technologies, Market for mobile communication, Mobile and wireless devices | 3 |
| Unit: 2 Wireless transmission: Frequencies for radio transmission, signals, antennas, signal propagation, Multiplexing, Modulation, Spread spectrum and Cellular systems. | 5 |
| Unit: 3 Medium Access Control: Specialized MAC, SDMA, FDMA, TDMA and CDMA. | 6 |
| Unit: 4 Telecommunication Systems : GSM, DECT systems – Architecture and protocols, Tetra frame structure, UMTS basic architecture and UTRA modes. Wireless LAN : Introduction, Infrared v/s Radio transmission, Infrastructure and ad-hoc networks, IEEE 802.11, HIPERLAN, Blue To | 6 |
| Unit: 5 Wireless ATM : WATM services, Reference model, functions, radio access layer, handover, Location management, Addressing, Mobile QoS, Access point control protocol. | 6 |

| | | |
|--|---|--|
| Unit: 6 Mobile Network Layer : Mobile IP, DHCP. Transport Layer: Traditional TCP, Indirect TCP, Snooping TCP, Mobile TCP, Fast and selective retransmission & recovery. control, and system run levels, performance Analysis tools, GRUB and RAID. | | 7 |

| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> Student is evaluated during the Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| <i>Course Objectives:</i> <ol style="list-style-type: none"> 1. To understand basics of Cryptography and Network Security 2. To learn about how to maintain the Confidentiality, Integrity and Availability of a data. 3. To study and analyze different encryption algorithms 4. To understand the various key distribution and management schemes. 5. To understand various protocols for network security to protect against the threats in the networks. | | |

Course Outcomes:

Students will be able to

1. Understand the need of information security to Industry and Society.
2. Explain the concepts related to applied cryptography, including plaintext, cipher text, symmetric cryptography, asymmetric cryptography
3. Evaluate Encryption, Key Exchange, Authentication and Hash Algorithms
4. Demonstrate the understanding of common network vulnerabilities and attacks, defence mechanisms against network attacks, and cryptographic protection mechanisms.
5. Summarize the Basic concepts of system level security, intrusion detection and its solutions to overcome the attacks.

| Curriculum Content | Hours |
|---|-------|
| Unit-1 Introduction Overview - Cryptography and modern cryptography, Need of security, Services, Mechanism and Attacks, The OSI security Architecture, A model for Network security, Classical Encryption techniques – Symmetric Cipher model, Substitution techniques, Transposition techniques. | 4 |
| Unit-2 Symmetric Key Cryptography: Block Cipher and Data Encryption Standard - Simplified DES, Block cipher principles, The Data Encryption Standard, The strength of DES, Differential and Linear Cryptanalysis, Block Cipher Design Principles, Block cipher modes of operations, Introduction to AES | 5 |
| Unit-3 Number Theory and Asymmetric Key Cryptography: Prime Number, relatively prime numbers, Modular Arithmetic, Fermat's and Euler's Theorem, The Chinese Remainder Theorem, Discrete logarithms, Public Key Cryptography and RSA - Principles of Public Key Cryptosystems, The RSA Algorithm, Key Management, Diffie-Hellman Key Exchange, | 9 |
| Unit-4 Authentication and Digital Signature Authentication requirements, Authentication Functions, Hash Functions, MD5 algorithm, Digital Signatures, Digital Signature Standard, Authentication Applications - Kerberos, X.509 Authentication Service, | 6 |
| Unit-5 Network Security Electronic Mail Security- Pretty Good Privacy- Notation, operational description, S/MIME- overview, functionality, IP Security – IP Security Overview, IP Security | 8 |

| | | |
|--|---|---|
| Architecture, WEB Security - Web Security Considerations, Secure Electronic Transaction overview. | | 6 |
| Unit-VI System Security Intruders - Intruders, Intruder detection, Password Management, Malicious Software - Viruses and Related Threats, Virus Countermeasures, Firewall - Firewall Design principles, Trusted systems. | | |
| <i>Text Books</i> | : | |
| | | 1. Williams Stallings “Cryptography and Network security Principles and Practices” (Pearson Education). |

|---|---|---|
| <i>Pre-requisites</i> | : | |
| The prerequisite for this course is Programming in C++ or Java languages, Linear algebra and calculus. | | |
| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Core (ANN, Fuzzy Logic and Genetic Algorithm) |
| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> Student is evaluated during Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| <i>Course Objectives:</i> <ol style="list-style-type: none"> 1. To conceptualize the working of human brain using ANN. 2. To become familiar with neural networks that can learn from available examples and generalize to form appropriate rules for inference systems. 3. To introduce the ideas of fuzzy sets, fuzzy logic and use of heuristics based | | |

| <p>on human experience.</p> <p>4. To provide the mathematical background for carrying out the optimization and familiarizing genetic algorithm for seeking global optimum in self-learning situation.</p> | |
|---|-------|
| <p>Course Outcomes:</p> <p>Students will be able to</p> <ol style="list-style-type: none"> 1. Understand different soft computing techniques like Genetic Algorithms, Fuzzy Logic, Neural Networks and their combination. 2. Design and implement computing systems by using appropriate Artificial Neural Network and tools. 3. Apply neural networks to pattern classification 4. Apply the concepts of Fuzzy Logic, Various fuzzy systems and their functions to real time systems. 5. Analyze the genetic algorithms and their applications to solve engineering optimization problems 6. Apply soft computing techniques to solve engineering or real life problems. | |
| Curriculum Content | Hours |
| <p>Unit:1 Introduction: Artificial Neural Network, Advantages of Neural Network, Fuzzy Logic, Genetic Algorithms, Hybrid Systems: Neuro Fuzzy Hybrid System, Neuro Genetic Hybrid System, Fuzzy Genetic Hybrid System.</p> | 4 |
| <p>Unit:2 Artificial Neural Networks: Fundamental Concept, Evolution Of Neural Networks, Basic Models of Artificial Neural Network, Terminologies of ANNs, McCulloch-Pitts Neuron, Linear Separability, Hebb Network.</p> | 7 |
| <p>Unit:3 Supervised Learning Network: Perceptron Networks, Adaptive Linear Neuron (Adaline), Multiple Adaptive Linear Neuron, Back Propagation Network, Radial Basis Function Network.</p> | 7 |
| <p>Unit:4 Introduction to Fuzzy Sets: Introduction, Classical Sets, Fuzzy Sets, Fuzzy relations, Membership Function, Defuzzification, Fuzzy Arithmetic and Fuzzy Measures, Fuzzy Rule base and Approximate Reasoning, Fuzzy Decision Making, Fuzzy Logic Control System.</p> | 7 |
| <p>Unit:5 Genetic Algorithms: Introduction, Basic Operators and Terminologies in GA, Traditional Algorithm vs Genetic Algorithms, Simple GA, General Genetic Algorithm, The Schema Theorem, Classification of Genetic Algorithm, Holland Classifier System, Genetic Programming, Applications of GA.</p> | 7 |

| | | |
|--|---|---|
| Unit:6 Applications of Soft Computing: GA Based Internet Search Technique; Soft Computing Based Hybrid Fuzzy Controllers. | | 4 |

| <i>Pre-requisites</i> | : | |
| Basic understanding Database Engineering, Advanced Database Management System and SQL | | |
| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Elective |
| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> | | |
| Student is evaluated during the Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| <i>Course Objectives:</i> | | |
| <ol style="list-style-type: none"> 1. To discuss the concepts of database technology for the need of data mining and its applications. 2. To evaluate different models used for OLAP and data pre-processing. Apply pre-processing statistical methods for any given large amount of raw data. 3. To evaluate the performance of different data mining methods and tools 4. To study various developing areas in data mining as web mining, text mining, spatial mining, temporal mining and Identifying business applications of data mining. 5. To develop and apply critical thinking, problem-solving, and decision-making skills. | | |

6. To interpret the contribution of data warehousing and data mining to the decision support level of organizations.

Course Outcomes:

Students will be able to

1. Discuss the role of data warehousing and enterprise intelligence in industry.
2. Compare and contrast the dominant data mining algorithms.
3. Evaluate and select appropriate data-mining algorithms and apply, and interpret, report the output appropriately.
4. Design and implement of a data-mining application using sample, realistic data sets and modern tools.
5. Evaluate and implement a wide range of emerging and newly-adopted methodologies and Technologies to facilitate the knowledge discovery.

| Curriculum Content | Hours |
|---|-------|
| Unit:1 Machine Learning and Data Mining-Data Flood, Data Mining and Knowledge Discovery, Data Mining Tasks Data Preparation for Knowledge Discovery, Data understanding, Data cleaning, Data transformation, False "predictors", Feature reduction, Randomization, Learning with unbalanced data. | 5 |
| Unit:2 Knowledge Representation -Decision tables, Decision trees, Decision rules, Rules involving relations, Instance-based representation ,Classification -Statistical Based Algorithms, Decision Trees Based Algorithms, Neural Networks Based Algorithms, Rules, Regression, Instance-based (Nearest neighbor), Case study | 7 |
| Unit:3 Clustering: Introduction, Clustering Methods, Ways of scaling clustering algorithms, Case study | 5 |
| Unit:4 Associations: Transactions, Frequent itemsets, Association rules, Applications. | 6 |
| Unit:5 Data warehousing, OLAP and Data mining, web warehousing, Schema integration and data cleaning, De-duplication, Data marts: Multidimensional databases (OLAP) | 8 |
| Advanced topics ETL, Integrating OLAP and mining, Online aggregation, Recap, future and visions. | |

| | | |
|---|---|---|
| Unit:6 | | 8 |
| Advanced Topics: Mining Multimedia Databases, Text Mining, Web Mining, Spatial Mining, Temporal Mining Applications and Trends in Data Mining- Data Mining Applications, Data Mining System Products and Research Prototypes, Additional Themes on Data Mining, Social impacts of Data Mining, Trends in Data Mining. | | |
| <i>Text Books</i> | : | |

| <i>Teaching Scheme (Hours)</i> | : | 3 hours/weeks=3x 13 weeks= 39hrs minimum | | | <i>Total Credits</i> | : | 03 | |
| | | | | | | | | |
| <i>Evaluation Scheme (Marks)</i> | : | CIE = 50 | IPE | : | = 100 | <i>Duration of SEE</i> | : | 3hrs |
| | | SEE = 50 | IOE | : | | | | |
| | | | EPE/EOE | : | | | | |
| <i>Revision:</i> | : | Third | | | <i>Month</i> | : | June 2019 | |

| | | |
|--|---|-----------|
| <i>Pre-requisites</i> | : | |
| Basic understanding of software engineering, project management practices | | |
| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Elective |
| <i>Skills Imbibed</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> | | |
| Student is evaluated during the Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| <i>Course Objectives:</i> | | |
| <ol style="list-style-type: none"> 1. To engaged in lifelong learning through participation in continuing or graduate education. 2. Effectively manage business operations and project management teams 3. Continue to develop holistically, including the personal and professional skills necessary to adapt to our changing societal, technological, and global environments | | |

Course Outcomes:

Students will be able to

1. Apply and improve a component, process, or integrated system of people, materials, information, Equipment, and energy to meet desired needs within realistic constraints.
2. Use the available resources to achieve the desired goal in a more efficient and effective way.
3. Identify the comparison between selected theories of management.
4. Perform the Management Functions & functions in the Marketing Mix.
5. Use basic Business Application Software & assess ethical issues in Business situations.

| Curriculum Content | Hours |
|---|-------|
| Unit 1 Business Environment Introduction, factor affecting business, external environment, business ethics, social responsibility of business. Management: Definition, nature, level, management environment. | 3 |
| Unit 2 Functions of Management Planning: Need, Nature, Types, Steps, Decision making, Forecasting methods. Organizing: Importance, process, principles, types: Functional product matrix network, organizational culture. | 5 |
| Unit 3 Staffing: Nature and purpose, recruitment policies and selection procedure. Induction and performance appraisal. Directing: a) Business Communication: Importance, process, types, barriers and remedies, key communication skills. b) Motivation: Components, Applications of motivation, Participative management. c) Leadership: Meaning, leadership style, working with teams. Controlling: Requirement of controlling, basic process, control technique, Budgetary control. | 9 |
| Unit 4 Introduction to functional areas as Marketing Management: Concept, Objectives, market segmentation, marketing mix, market research, Advertising: need, objective advantages and types. Financial Management: Sources of finance, capital types, financial institution, financial statements balance sheet, Profit & Loss A/C (contents only). Production Management: Selection of site, plant layout, objectives principles, merit and demerit of each type, function of P.P.C., maintenance management. Human Resource Management: Functions of H.R.M., Industrial relation, training and development, wage administration and incentives plans. | 11 |

| | | |
|---|---|--|
| Unit 5 Materials Management Scope, function, purchasing objectives, 5-R principles, purchasing policies and procedure, vendor development, Inventory management. EOQ, ABC and related analysis. | | 5 |
| Unit 6 Entrepreneurship Development Program: Concept of entrepreneur, Qualities required, factors promoting entrepreneurship, Reasons for entrepreneurship failure, Entrepreneurship development. S.S.I.: Definition of SSI, Procedure to start SS unit. Institution offering assistance to SSI, problems of SSI. Legal Aspects: Factory act, consumer protection act, industrial safety act, cyber law. Intellectual property right: patent need advantage, procedure. | | 6 |

| <i>Revision:</i> | : | Third | | | | <i>Month</i> | : | June 2019 |

| | | |
|---|---|-----------|
| <i>Pre-requisites</i> | : | |
| The prerequisite for this course is basic knowledge of digital logic and computer hardware basics. | | |
| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Core |
| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> Student is evaluated during Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| <i>Course Objectives:</i> <ol style="list-style-type: none"> 1. To understand basic real time operating system concepts. 2. To study software engineering process for real time system design. 3. To understand different performance measures for real time operating system. 4. To understand different features of commercial real time operating system. | | |

| <p>5. To study the working of real time operating system and real time database.</p> <p>6. Design the concepts needed to build an embedded system using RTOS.</p> | |
|---|-------|
| <p>Course Outcomes:</p> <p>Students will be able to</p> <ol style="list-style-type: none"> 1. Understand the concepts of real-time system and modelling. 2. Design architecture, present mathematical model of system. 3. Recognize the characteristics of real time system. 4. Analyze task scheduling, resources management, real time operating system and fault tolerance application of real time system. 5. Estimate usage of various methods, programs, operating systems and other components for real time environment 6. Demonstrate usability of POSIX interface for adapting task scheduling, task synchronization and communication. | |
| Curriculum Content | Hours |
| <p>Unit:1</p> <p>Basic Real- Time Concepts & Hardware Consideration: Terminology, Real time design Issues, Example, Real –Time Systems, Brief History, basic Architecture, H/W Interfacing, CPU, Memory & I/O.</p> | 6 |
| <p>Unit:2</p> <p>Real Time specification and design Techniques: Natural Languages, Mathematical specification, flowcharts, structure charts, Pseudo code and programming design languages, finite state Automata , Data flow diagram petrinets, Warnier –Orr Notation, State charts Sanity in using graphical Techniques.</p> | 7 |
| <p>Unit:3</p> <p>Real Time Kernels:Pseudo kernels, Interrupt –Driven system, Preemptive Priority System, Hybrid System, Task control block model, Process Scheduling ,RR scheduling, Cyclic Executives, Fixed Priority &Dynamic Priority scheduling.</p> | 4 |
| <p>Unit:4</p> <p>Inter-task communication and Synchronization: Buffering data, mailboxes, critical Regions, Semaphores, Event Flags And Signals, Deadlock.</p> | 4 |
| <p>Unit :5</p> <p>Real-Time Memory Management: Process Stack Management, Run time ring buffer, Maximum stack size, Multiple-stack Arrangement, Memory management</p> | 6 |

| | | |
|--|---|---|
| in task-control Block Model, Swapping, Overlays, Block Or Page Management, Replacement Algorithm, Memory Locking, Working Set, Real Time Garbage Collection, Contiguous File System, Selecting Real-Time Kernels. | | 9 |
| Unit 6 : | | |
| System Performance Analysis And Optimization : Response-time calculation, interrupt Latency, Time-Loading And Its Measurement, Scheduling Is Np-Complete, Reducing Response Times And Time-Loading, Analysis Of memory Requirements, Reducing Memory loading, I/O Performance. Real Time Applications: Real Time Systems On Complex Systems, Real Time Data Bases, Real time image processing, Real time process control. | | |
| Text Books | : | |
| | | 1. “Real Time Systems Design & Analysis” – An Engineer’s Handbook Second Edition - [PHI] P.A. LAPLANTE (FOR CHAPTER NO. 2,4,6,7,8) 2. “Real Time Systems Design And Analysis” –, Third Edition (Wiley Publication) Phillip A. Laplante (for chapter no. 1,3,5) |
| Reference Books | : | |
| 1. Real Time Systems – [McGraw Hill] C. M. Krishna, K. G. Shin 2. Real-Time Systems And Their Programming Languages - (New York : Addison-Wesley) , Burns, Alan And Andy Wellings 3. The design of real-time applications (newyork: john wiley & sons), m. Blackman 4. Embedded And Real Time System-Concepts, Design & Programming (Black Book), Dr. K.V.K.K. Prasad | | |

|---|---|-----------|
| Pre-requisites | : | |
| The prerequisite for this course is basic knowledge of Fundamentals of Computing and Programming | | |
| Type of Course | : | Theory |
| Course Domain | : | Core |
| Skills Imbided | : | Cognitive |
| Course Assessment Methods: | | |
| Student is evaluated during Continuous Internal Evaluation (Internal Test I & Internal Test II) and Semester End Examination. | | |
| Course Objectives: | | |
| 1. To understand basic knowledge of mathematics, science, and engineering with optimization. | | |

| <ol style="list-style-type: none"> To able to identify, formulate, and solve engineering problems. To understand the theory of optimization methods and algorithms developed for solving various types of optimization problems To develop and promote research interest in applying optimization techniques in problems of Engineering and Technology To apply the mathematical results and numerical techniques of optimization theory to concrete Engineering problems. | |
|--|-------|
| <p>Course Outcomes:</p> <p>Students will be able to</p> <ol style="list-style-type: none"> Estimate to model engineering minima/maxima problems as optimization problems. Demonstrate the use Matlab to implement optimization algorithms. Understand importance of optimization of industrial process management Apply basic concepts of mathematics to formulate an optimization problem Analyze and appreciate variety of performance measures for various optimization problems Apply knowledge of mathematics, science, and engineering | |
| Curriculum Content | Hours |
| <p>Unit 1 Optimization problem statement, classification of optimization problems. Classical Optimization Theory : Unconstrained Optimization, Constrained optimization with Equality and Inequality, method of lagrange multipliers, Kuhn- Tucker conditions.</p> | 7 |
| <p>Unit 2 Linear programming: Construction of LP model, Simplex method, Big M and two phase methods, Special Cases, Duality And Sensitivity Analysis, Economic Interpretation of Duality.</p> | 6 |
| <p>Unit 3 Non-Linear Programming: Unconstrained Optimization Techniques, Classification Of Methods, Dichotomous Optimization Method, Steepes Ascent, Newton Method, Constrained Optimization, Separable And Quadratic Programming.</p> | 7 |
| <p>Unit 4 Dynamic Programming: Multistage Decision Process, Recursive Relationships, Principle of optimality, Computational procedure in DP, DP applications, Problem of dimensionality.</p> | 6 |
| <p>Unit 5 Genetic algorithm : Introduction, representation of decision variables , objective Function and constraints, GA operators. Introduction to simulated annealing, neural network based Optimization and optimization of fuzzy</p> | 8 |

| | | |

| | |

Course Outcomes:

Students will be able to

1. Understand different soft computing techniques like Genetic Algorithms, Fuzzy Logic, Neural Networks and their combination.
2. Design and implement computing systems by using appropriate Artificial Neural Network and tools.
3. Apply neural networks to pattern classification
4. Apply the concepts of Fuzzy Logic, Various fuzzy systems and their functions to real time systems.
5. Analyze the genetic algorithms and their applications to solve engineering optimization problems
6. Apply soft computing techniques to solve engineering or real life problems.

Practical covered

:

1. Write a program to implement logical XOR
2. Write a program to implement logical AND using McCulloch Pitts neuron model
3. Write a program to implement logical XOR using McCulloch Pitts neuron model
4. Write a program to implement logical AND using Perceptron network
5. Write a program to implement Adaline network
6. Write a program to implement Madaline network for XOR function
7. Write a program to implement Back propagation network
8. Write a program to implement the various primitive operations of classical sets
9. Write a program to implement various primitive operations on fuzzy sets with Dynamic Components.
10. Write a program to maximize $f(x_1+x_2)=4x_1+3x_2$ using genetic algorithm
11. Write a program to minimize $f(x)=x^2$ using genetic algorithm

| | | |
|---|---|------------------|
| <i>Pre-requisites</i> | : | |
| The prerequisite for this course is basic knowledge of Computer Systems. | | |
| <i>Type of Course</i> | : | Practicle |
| <i>Course Domain</i> | : | Web Technologies |
| <i>Skills Imbided</i> | : | |
| <i>Course Assessment Methods:</i> Student is evaluated during Internal Practical Examination and External Practical Examination. | | |
| <i>Course Objectives:</i> <ol style="list-style-type: none"> 1. Understanding the Configuration of an asp.net application. 2. Creating ASP.Net applications using standard .net controls and To create a data driven web application. 3. Evaluating the data sources and managing them. 4. To create and Maintain session and controls related information for user used | | |

| <p>in multi-user web applications</p> <p>5. Understand the fundamentals of developing modular application by using MVC</p> | |
|---|-------|
| <p>Course Outcomes:</p> <p>Students will be able to</p> <ol style="list-style-type: none"> 1. Upon completion of this course, the student will be able apply technical knowledge and perform specific technical skills, including: 2. Successful students will able to design web applications using ASP.NET 3. Successful students will be able to use ASP.NET controls in web applications. 4. Successful students will be able to create database driven ASP.NET web applications and web services 5. Successful students will be able to handle database using MVC in ASP.NET web applications | |
| Curriculum Content | Hours |
| <p>Unit-1 Introduction to ASP.NET</p> <p>The Evolution of Web Development, Important facts about Web Development, ASP.NET Architecture, The Code Model, Web Project. Web Forms: Page Processing, Web Form Processing Stages, The Page as ControlContainer, The Page Class. Redirecting User to Another Page, Master Pages.</p> | 4 |
| <p>Unit-2 ASP.NET</p> <p>Server Controls: Types of Server Controls, HTML Server Controls, Web Controls, List Controls, Input Validation Controls, Rich Controls</p> <p>State Management: ASP.NET State Management, View State, Transferring Information between pages, Cookies, Session State, Application State</p> <p>ASP.NET Application: Anatomy of ASP.NET application, global.asax Application file, ASP.NET Configuration, ASP.NET State Management, Web Configuration File and Global.asax, ,Authentication & Authorization.</p> | 6 |
| <p>Unit-3 ADO.NET Fundamentals:</p> <p>ADO.NET Architecture, The Connection Class, The Command and Data Reader Classes, Data Binding : Basic Data binding, Data source Control, The Sql Data Source.</p> | 4 |
| <p>Unit-4 Introduction to MVC</p> <p>MVC Architecture, Understand the MVC design pattern and how it's applied in ASP.NET MVC, Understanding Model, Understanding View, Understanding Controller, Key benefits of ASP.NET MVC, Advantages of MVC based Web Application</p> | 4 |

| | |
|--|----------|
| Unit-5 File Handling, Crystal Report and E-mail handling File I/O and streams , Working with directories and files, Read and write file Crystal reports, Overview to crystal reports, Creating crystal reports with wizards, Integrating with web applications, Customizing the report viewer, Adding a database or table to a report, Handling mail, Protocols , Sending mails with and without attachment | 6 |
| Unit-6 Web Services ASP.NET Web Services, Introduction to XML WebServices, Creating WebService, Setting the WebService attribute, Test and run your web | 2 |

Lab:

It should consist of 12-15 experiments based on the following topics.

1. Accepting and validating user entered data using ASP.NET.
2. Create a Web Application which detect capabilities of Browser and handle Page and Application level error.
3. Accepting and validating book catalog information using validating controls.
4. Create a Web Application which implement authentication and authorization features (Membership class).
5. Display database contents from SQL server or Oracle database using SQL Command class from ASP.NET.
6. Display parameterized data using SqlDataReader and GridView in ASP.NET.
7. Accessing and Displaying Database access using DataSet and Data View in ASP.NET.
8. Create a setup web application for deployment of ASP.NET application.
9. Develop sample form with validation code using for Login Form using web forms.
10. Develop file up-loader form to upload a file in ASP.net
11. Develop sample application for session management in ASP.net.
12. Develop sample application with database connectivity using MVC.
13. Create a form to send mail with attachment in ASP.net.
14. Create and use web service
15. Create and use XML web service

| <i>Revision:</i> | : | Third | | | | <i>Month</i> | : | June 2019 |

| | | |
|--|---|-----------|
| <i>Pre-requisites</i> | : | |
| Knowledge of Advanced Programming | | |
| <i>Type of Course</i> | : | Practical |
| <i>Course Domain</i> | : | Core |
| <i>Skills Imbided</i> | : | Cognitive |
| <i>Course Assessment Methods:</i> Student is evaluated during the Internal practical evaluation and External practical evaluation. | | |
| <i>Course Objectives:</i> <ol style="list-style-type: none"> 1. Implement processes for successful resource, communication, and risk and change management. 2. Demonstrate a strong working knowledge of ethics and professional responsibility. 3. Demonstrate effective organizational leadership and change skills for managing projects, project teams, and stakeholders. 4. Demonstrate effective project execution and control techniques that result in successful projects. | | |

Course Outcomes:

Students will be able to

1. Implement proposed solution with the help of modern tools and analyze the solution.
2. Apply Project management and time management Skills Effectively.
3. Report and present the findings of the study conducted in the preferred domain.
4. Develop good communication skills and team work.
5. Demonstrate a strong working knowledge of ethics and professional responsibility.

Curriculum Content

The group will continue to work on the project selected during the semester VII and submit the completed project work to the department at the end of semester VIII as mentioned below-

1. The workable project.
2. The project report in the bound journal complete in all respect with the following: -
 - i) Problem specifications.
 - ii) System definition – requirement analysis.
 - iii) System design – dataflow diagrams, database design
 - iv) System implementation – algorithm, code documentation
 - v) Test results and test report.
 - vi) In case of object oriented approach – appropriate process be followed.

Oral examination will be conducted by internal and external examiners as appointed by the University.

Note:

1. Project work should be continually evaluated based on the contributions of the group members, originality of the work, innovations brought in, research and developmental efforts, depth and applicability, etc.
2. Two mid-term evaluations should be done, which includes presentations and demos of the work done.
3. Care should be taken to avoid copying and outsourcing of the project work.

| | | |
|---|---|--------------|
| <i>Pre-requisites</i> | : | |
| <i>Type of Course</i> | : | Theory |
| <i>Course Domain</i> | : | Audit Course |
| <i>Skills Imbided</i> | : | Cognitive |
| Course Assessment Methods: <p>The students will be given five assignments each for 10 marks. At the end of the course, there will be a written test of 25 marks and a viva voce of 25 marks. There will be assessment for a total of 100 marks. Based on the marks obtained, they will be awarded with a grade similar to other credit courses. Though it is an audit course, obtaining passing grade is essential.</p> | | |
| Course Objectives: <p><i>Students will be able to</i></p> <ol style="list-style-type: none"> 1. Understand the need for a constitution. 2. Explain the role of constitution in a democratic society. 3. List the key features of the constitution. 4. Appreciate the fundamental rights of the citizens of India. | | |
| Course Outcomes: <p><i>Students will be able to</i></p> <ol style="list-style-type: none"> 1. To understand the philosophy of Indian constitutions 2. To identify the causes, impact of British colonial rule. | | |

| <p>3. To appreciate the various phases of Indian national movement.</p> <p>4. To create value in young youth regarding the patriotism.</p> <p>5. To understand the various Government of India acts their provision and reforms.</p> <p>6. To know the salient features in making of Indian constitution.</p> | | |
|---|---|---|
| Curriculum Content | | Hours |
| Unit 1 Preamble to the constitution of India. Fundamental rights under Part – III – details of Exercise of rights, Limitations & Important cases. | | 4 |
| Unit 2 Relevance of Directive principles of State Policy under Part – IV. Fundamental duties & their significance. | | 3 |
| Unit 3 Union Executive – President, Prime Minister, Parliament & the Supreme Court of India. | | 3 |
| Unit 4 State executive – Governors, Chief Minister, State Legislator and High Courts. | | 3 |
| Unit 5 Constitutional Provisions for Scheduled Castes & Tribes, Women & Children & Backward classes. Emergency Provisions. | | 4 |
| Unit 6 Electoral process, Amendment procedure, 42nd, 44th, 74th, 76th, 86th and 91st Constitutional amendments. | | 3 |
