Date: 09 / 01/2023

SU/BOS/Science/ 144

To The, Head of Department, Shivaji University, Kolhapur.

Subject: Regarding syllabi of M. Sc. Part- I Medical Information Management degree programme under the Faculty of Science and Technology as per National Education Policy 2020.

Sir/Madam,

With reference to the subject mentioned above, I am directed to inform you that the university authorities have accepted and granted approval to the syllabi and Nature of question paper of M. Sc. Part- I Medical Information Management under the Faculty of Science and Technology as per National Education Policy 2020.

Sr.No.	Ad-hoc Board	Programme/ Course
1	Biotechnology & Biochemistry	Medical Information Management

This syllabi and nature of question paper shall be implemented from the Academic Year **2022-2023** onwards. A soft copy containing the syllabus is attached herewith and it is also available on university website www.unishivaji.ac.in (students Online Syllabus)

You are, therefore, requested to bring this to the notice of all students and teachers concerned.

Thanking you,

Yours faithfully

Dy Registrar

Syllabus M. Sc. Medical Information Management (New CBCS) Department of Biochemistry SHIVAJI UNIVERSITY, KOLHAPUR

In collaboration with

Hochschule Hannover – University of Applied Sciences and Arts, Germany

.....

Preamble:

In the recent years in this age of Internet and information technology, we have more information at our fingertips than ever before. Organizing this entire data and combating information overload is becoming more and more important. It is thus necessary for institutes like university to evolve a system, which is most accurate and more student friendly. Keeping this view in mind we have decided to start a master programme in Medical Information Management in collaboration with Hochschule Hannover – University of Applied Sciences and Arts, Germany. After completion of this two year M.Sc. course students can be accommodated in any national/multinational drug designing pharmaceutical company, academia as well as in Clinical Research Organizations (CROs).

Advances in biosciences, clinical medicine and medical technologies have enabled increasing personalized health care. The digitization of healthcare information facilitates new connections, insights and transparency. These developments will include medical information management in educational course format in the coming years and decades. Demographic change is leading to an increasing number of chronically ill and multimorbid patients. This would lead to an increasing need for information management. The years of delays in the introduction a nationwide telematics infrastructure and an electronic health card, as well as the delays in establishing a cross-sectoral quality assurance of health care show problem areas of modern medical information management. The advances in various interdisciplinary areas of bioscience,

clinical medicine and medical technology indicate an increasing need for clinical trials to progress and to make patients accessible. The value of clinical trials is not just to contribute to the development of new therapies but to take proper care of patients. For many participants it means a new drug/option they will be treated with as part of a study.

Clinical research includes planning, implementation, evaluation and publication of clinical trials. In this context, special knowledge is necessary about legal requirements at national and international level as well as all other related issues such as collaboration with institutions of higher education, centers of excellence and authorities, aspects of security of subjects / patients in clinical trials, patient information, insurance and ethical issues. For reimbursement of medicinal products, pharmacoeconomic data are required, that collection and analysis needs special training. Relevant aspects of benefit for patients such as adequate surrogate parameters and quality of life data require specific recording tools as well as rating benefits that are becoming increasingly important for clinical research and require specialized trained staff.

Medical Information Management course would be useful to train our students in rapidly developing and emerging areas of biosciences, clinical medicine, health sciences, health policy, IPR related activities, drug discovery and designing. These experts are continuously required in various clinical and pharmaceutical industries.

Intake capacity: 20 students per year

Eligibility: A candidate possessing B.Sc. degree with minimum 50% marks in Science (Chemistry/ Physics/ Nanoscience and Technology/ Statistics/ Mathematics/ Biochemistry/ Biotechnology/ Microbiology /Bioinformatics/ Botany/ Zoology / Computer Science/ Life Sciences) who have passed the entrance examination conducted by the Shivaji University, Kolhapur shall be held eligible for admission to M.Sc. in Medical Information Management course. Students from other Universities with above mentioned degrees and who have passed the entrance examination conducted by the University are also eligible.

Student/Faculty Exchange: Students and faculty exchange will be done as per MoU, which will be signed between Shivaji University, Kolhapur, Maharashtra, and Hochschule Hannover – University of Applied Sciences and Arts, Germany.

• **Program Structure:** Two year duration; Twelve Theory Papers and six informatics practical along with one research project (Master Thesis).

University	Sept – Jan.	Feb July	Sept – Jan	March-July

Germany				Sem III (Project)	
				(Student Exchange)	

- Exam Pattern: CBCS, Semester Pattern (80 External/20 Internal evaluations).
- This course is as per NEP-2020 CBCS pattern

Semester I 600 Marks

CC 101 : Information Technology in Health Sciences

CC-102 : Introduction to Biological Sciences

CC-103 : Medical informaticsCC-104 : German Language A1CCPR-105 : Laboratory Course I

AEC-106 : Mandatory Non-CGPA compulsory Ability Enhancement Course

Semester II 600 Marks

CC-201 : Research Methods and Statistics

CC-202 : Clinical Data and Quality and Management

CC-203 : Clinical Quality ManagementCC-204 : Clinical Data Management-I

CCPR-205 : Laboratory Course II (Key Competencies)

SEC-206 : Mandatory Non-CGPA compulsory Skill Enhancement Course

Choice Based Credit System with Multiple Entry and Multiple Exit Option (NEP-2020)

- *Practical Examination will be internal/external as per department choice
 \$ Question no. 1 of each question paper will be subjective (short answer question/objective questions)
- 3.# Duration of Practical Examination will be 5 days (1 inspection day and 4 Practical days)

• Student contact hours per week: 32 Hours (Min.)	• Total Marks for M.ScI : 1200
• Theory and Practical Lectures : 60 Minutes Each	• Total Credits for M.ScI (Semester I & II) : 48
CC-Core Course	Practical Examination is annual.
CCPR-Core Course Practical	• Examination for CCPR-105 shall be based on Semester I Practicals.
AEC-Mandatory Non-CGPA compulsory Ability Enhancement Course	• Examination for CCPR-205 shall be based on Semester II Practicals.
SEC- Mandatory Non-CGPA compulsory Skill Enhancement Course	*Duration of Practical Examination as per respective BOS guidelines
	Separate passing is mandatory for Theory, Internal and Practical
	Examination

• Requirement for Entry at Level 8:

A candidate possessing B.Sc. degree with minimum 50% marks in Science (Chemistry/ Physics/ Nanoscience and Technology/ Statistics/ Mathematics/ Biochemistry/ Biotechnology/ Microbiology /Bioinformatics/ Botany/ Zoology / Computer Science/ Life Sciences) who have passed the entrance examination conducted by the Shivaji University, Kolhapur shall be held eligible for admission to M.Sc. in Medical Information Management course. Students from other Universities with above mentioned degrees and who have passed the entrance examination conducted by the University are also eligible.

• Exit Option at Level 8: Students can exit after Level 8 with Post Graduate Diploma in Medical Information Management if he/she completes the courses equivalent to minimum of 48 credits.

SEMESTER I			
CC 101: In	nformation Technology in Health Sciences	60 Hrs	
Credit I	INTRODUCTION TO COMPUTERS	15 Hrs	
	Introduction, electronic components of the CPU, Microprocessor chip,		
	motherboard. Computer as a digital calculator, principle of digital computers,		
	structure of the digital computers: arithmetic unit, central unit, memory unit,		
	Input and output.		
	HISTORY AND DEVELOPMENT OF COMPUTERS		
	Generations of computers; (I, II, III, IV and V), classifications of computers;		
	analog computers, digital computers, mainframe, and mini-frame computers		
Credit II	DATA INPUT OUTPUT, MEMORY AND COMPUTER CODING	15 Hrs	
	DATA INPUT OUTPUT: Punched card reader, paper tape reader, magnetic		
	tape, floppy disk, magnetic disk, optimal scanner, voice data, data entry		
	terminal, teleprocessing monitor, visual display unit, modern input devices,		
	Output devices; CRT, printer, plotter.		
	MEMORY: Primary memory or main memory; magnetic core memory, semi-		
	conductor memory, RAM, ROM, PROM, EPROM, EEPROM.		
	Secondary memory or auxiliary memory or storage devices; Hard disk,		
	diskette, magnetic tape, ZIP disk devices, CD-ROM, DVD, virtual memory,		
	cache memory.		
	COMPUTER CODING: Number system, binary number system, decimal		
	number system, binary to decimal inter-conversion, octal number system,		
	hexadecimal number system, fundamentals of logical concepts		
Credit III	LANGUAGES, FLOW CHARTS AND OPERATING SYSTEMS	15 Hrs	
	Machine level languages, assembly level languages, high level languages.		
	OPERATING SYSTEMS: DOS, windows, UNIX/LINUX, Mac OS.		
	MODERN COMPUTING MACHINES: Workstations, parallel processing		
	computers, HPC, supercomputers, zero client system.		
	INTERNET AND RELATED PROGRAMMES: History of Networking and		
	internet, WWW, HTML, HTTP, telnet, FTP, computer domains, internet		
	browsers, TCP/IP, LISTSERV		

Credit IV	HEALTH SCIENCE INFORMATICS	15 Hrs			
	Introduction to information, scope, components of heath care informatics;				
	introduction, standardized languages in practice. Health IT architecture;				
	information technology architecture models in health care organization, service				
	oriented structures. Concept of bio-signal processing and medical imaging.				

- Introduction to database system by J. M. Martin, Prentice-Hall.
- Developing Bioinformatics Computer Skills (2001) Cynthia Gibas and Per Jambeck,
 O'Reilly Media, Inc.
- Computer fundamentals 6th edition (2007) P. K. Sinha & Priti Sinha, BPB Publications

CC-102 : I1	ntroduction to Biological Sciences	60 Hrs
Credit I	Anatomy and Physiology	15 Hrs
	The cellular level of organization; structure of the cell, comparison of	
	animal cell with evolutionary related cellular forms, cellular functions.	
	Structure and function of the brain Central Nervous System, Peripheral	
	and Autonomic Nervous system, Neurotransmitters. Anatomy of heart and	
	the cardiovascular system, circulatory system, kidneys and excretory	
	system, lungs and respiratory system, digestive system, reproductive	
	system, Lymphatic & Immune Systems.	
	Hormones; Anterior posterior pituitary hormones, contraction and	
	regulation of skeletal muscle and smooth muscle.	
Credit II	Pharmacology	15 Hrs
	History and development of drug discovery, Basic Principles of	
	pharmacology: molecular and cellular drug targets, drug-receptor	
	interactions, agonism, antagonism, drug metabolism, pharmacogenomics,	
	and pharmacokinetics.	
	Introduction to toxicology: overview of the field of toxicology covering	
	the basic principles, target organ toxicity, the toxicity of a limited group of	
	compounds, and an introduction to modern molecular toxicology.	
Credit III	Epidemiology	15 Hrs
	Introduction to epidemiology, Determinants of health, measuring disease	
	occurrence (frequency), surveillance, infectious disease epidemiology,	
	direct and indirect standardization, data sources and secondary analysis,	
	epidemiologic study design.	

Credit IV | Biochemistry 15 Hrs

Proteins- Chemical structure and General properties of amino acids, classification of proteins on the basis of size, shape, degree of association, complexity and according to biological functions (Enzymes, transport, storage, contractile, structural, defense and regulatory). Types of protein structures.

Carbohydrates- Classification, characteristics and functions of monosaccharides, disaccharides – polysaccharides. General scheme of carbohydrate metabolism.

Lipids- Classification of lipids. Fatty acids - general formula, nomenclature and chemical properties. Structure, function and properties of simple, complex, acylglycerols, phosphoglycerides, sphingolipids, waxes, terpenes, steroids and prostaglandins

Nucleic acid- Structure of nucleoside, nucleotide. Experimental evidence for nucleic acids as genetic material, Watson and Crick model of DNA, types of DNA.

- Lehninger's Principles of Biochemistry 5th edition, Nelson, D. L. and Cox, M. M. (2000) 10.1007/978-3-662-08289-8
- Anatomy and Physiology by Dummies 2nd edition, Donna Rae, Norris, M., & Siegfried, D. R. (2011). Hoboken, NJ: Wiley Publishing, Inc.
- Basic & Clinical Pharmacology (2012), Bertram G. Katzung, New York: McGraw-Hill Medical.
- Biochemistry by Lubert Stryer (2002) Berg, J. M., Tymoczko, J. L., Stryer, L., & Stryer, L.
 New York: W.H. Freeman
- Bioinformatics; Methods and applications; Genomics, Proteomics and Drug Discovery 3rd edition (2011), Rastogi, S. C. and Mendiratta and Rastogi, P. New Delhi: PHI Learning Private Limited

CC-103 : M	ledical Informatics	60 Hrs
Credit I	Genome Analysis and their applications in Health:	15 Hrs
	Introduction and history, rough and final draft of human genome project,	
	goals of the human genome project, Nucleic acids, genome information,	
	applications of human genome project, techniques used and data	
	analysis, ethical and social issues, International Human Genome	
	Sequencing Consortium, types of Single Nucleotide Polymorphism	
	(SNPs) and analysis, NCBI, BLAST. Gene Sequencing methods, Next	
	Generation Sequencing (NGS), early detection of diseases using genome	
	analysis.	
Credit II	Structural biology and drug discovery:	15 Hrs
	Protein sequence information, composition and properties,	
	physicochemical properties based on sequence, sequence comparison,	
	Pair-wise sequence alignment, gaps, gap-penalties, local and global	
	sequence alignment, multiple sequence alignment, useful programs,	
	ClustalW, BioEdit.	
	Protein Structure Prediction; Homology modeling, prediction of protein	
	structure from sequences, functional sites, Protein folding problem,	
	three-dimensional structure determination. Protein identification and	
	characterization by ExPASy server; Primary structure analysis and	
	prediction.	
Credit III	Virtual Screening for Drug Discovery	15 Hrs
	Introduction, drug discovery area, pharmacogenetics and	
	pharmacogenomics applications, parameters in drug discovery, cell	
	cycles, identification of drug target molecules, drug design and its	
	approaches, computer-aided drug designing methods; virtual screening,	
	computer aided molecular design (CAMD), molecular modeling	
	methods; molecular modeling packages and their uses in drug designing	
	and discovery. ADME and toxicity Predictions, QSAR studies for drug	
	designing.	

Credit IV	Databases and Informatics	15 Hrs
	Concept of data, data models, data representation, flow charts, data	
	mining, various types of databases; protein sequence databases; primary	
	and secondary protein sequence, nucleic acid databases and structural	
	databases, PubChem, ZINC database and file formats, medical	
	databases, literature databases. Database related programs; Oracle, SQL,	
	VB, Database management System (DBMS), RDBMS. Applications of	
	Medical Informatics

C-104 : Ge	erman Language A1	60 Hrs
Credit I	Reading	15 Hrs
	i. The pupils recognise the following types of text: dialogue; interview;	
	advertisement; programme of a performance (cinema, theatre, concert,	
	sport); a television and radio programme; notice; folder page of books,	
	of audio cassettes, of videocassettes and of CDs; articles in dictionaries	
	and lexica; a form to be filled in; menu; poem, short story, diary,	
	comics, picture novel, greeting card, personal letter, email letter,	
	announcement, invitation.	
	ii. The pupils can understand the following types of text globally and/or	
	selectively: leaflet, catalogue, label, transport timetable, city map, a	
	programme of a performance (cinema, theatre, concert, sport), T.V. &	
	radio programme, advertisement, notice, article in a dictionary and	
	lexicon, menu, personal letter, e-mail letter, columns in a newspaper and	
	magazine, comics, cuttings of reports, poem, short story, short texts of	
	information.	
	iii. The pupils understand in detail the type of problem and the	
	instructions in the text book as well as short announcements, signs	
	denoting advice and forbiddings, simple forms, invitations and greeting	
	cards.	
	iv. The pupils make use of the following strategies while reading:	
	- they recognise the correlation between text and picture.	
	- they recognise personal names, numbers and dates.	
	- they recognise the meaning of punctuation marks and text	
	typography.	
	- they establish the correlation between the title of a text and main points	
	of information.	
	- they recognise the parts of speech and clauses, word roots,	
	prefixes, suffixes and endings of words of those learnt as well as	
	internationalisms.	
	- they recognise the communicative function of the types of text listed	

under point (i).

- they work with word card indexing.
- they perceive the foreign culture in that they take a critical look at their own culture in the process.
- they make use of the knowledge, skills and strategies which they have acquired in the lessons of their mother language or their first foreign language, when deducing pieces of information from text or making connections between them.
- v. The pupils can handle reference works (e.g., dictionaries, grammars).

Notions:

The contents of teaching include the speaking material which allows the expression of the following notions: Existence, Space and Time; Quantity and Quality, Logical

Relationships; Definite and Indefinite Forms.

- Existence: being, constancy, change, possibility, impossibility.
- Space : dimensions, place, motion, direction.
- Time : point in time (once, repeated, definite, indefinite), length of time (continuous, limited by time); general observations without concrete reference to time.
- Quantity: can / cannot be added.
- Quality : of persons, localities, things, objects, events and dealings.
- Logical

Relationships: connection. Opposition, cause, condition, comparison.

- Definite and indefinite meanings.

Credit II

Listening:

The pupils are in a position to understand different German language texts globally or in detail through a direct contact or over the media. The texts should follow the standards of level A1 of the *Framework* and observe the phonetical and intonation variants of the German language. Of special significance in the training for the skill of *listening* is the inclusion of sight perception.

i. The pupils understand questions and instructions of the teacher during

15 Hrs

the lesson.

- ii. The pupils can create correlations between hearing texts and pictures.
- iii. The pupils can understand short dialogues between two or several partners who refer to themes and situations already dealt with.
- iv. The pupils can understand short everyday and especially tourist related information (e.g., at the post office, in a travel agency, at the railway station / airport).
- v. The pupils infer main announcements from conversations on themes and situations already dealt with.
- vi. The pupils can infer selective information from news, advertisements and programme information on Radio or in T.V. as well as from easy descriptive texts.
- vii. The pupils can understand short literary forms like poems and songs on the basis of directed explanation.
- viii. The pupils make use of the following strategies while listening:
- they put forward hypotheses and examine them in the light of the intention of the statement of various types of text.
- they recognise intonation models, linguistic and metalinguistic means of expressing affirmation and negation.
- they make use of already known models of word building.
- they recognise the communicative function of varied types of text.
- they work with a dialogue diagram.
- they draw up the construction plan of a text they have heard.

Language Interactivity:

The language interactivity taken up in the teaching contents takes into account the basic functions of the language, namely the social, informative, appellative and affective.

- (i) making contacts
- to welcome, to greet, to send greetings.
- To address (even in letters).
- To introduce oneself / others.
- To ask how one is, to give information about it.

- To request, to thank.
- To congratulate, to wish luck to give thanks for it.
- To invite, to accept, to refuse.
- To express regrets.
- To bid farewell (even in letters).
- (ii) giving information
- to ask for information and to give it.
- To present facts; to narrate, to report, to describe.
- To list (enumerate), to verify by examples.
- To complete / correct / disprove / confirm information.
- To ask for correctness.
- To show knowledge / lack of knowledge.
- To give reasons.
- (iii) arranging things
- to express wishes.
- To make suggestions; to give / ask for advice.
- To ask for / refuse / offer help.
- To complain, to protest.
- To express readiness / refusal.
- To give / refuse / ask for permission; to forbid.
- Information about / asking for intentions.
- To ask if someone wants to do something, / is ready to do it.
- To promise, to confirm.
- (iv) showing attitudes and expressing feelings

Expressions of:

- Agreement, refusal
- Conjecture, certainty, persuasion.
- Importance, insignificance.
- Interest, curiosity, disinterestedness, indifference.
- Preference, dislike, anger,
- Joy, excitement.
- Doubt, disappointment, annoyance.

- Anxiety, (fear), care, worry.
- Relief, appeasing, satisfaction.
- Trust, mistrust.
- Impatience, expectation, hope.
- Surprise, wonder.

Topics:

- (i) I and my family: relatives,; relationships; dwelling /house; daily / yearly routine; activities in common; meals; feasts / celebrations; travelling.
- (ii) I and my friends: circle of friends / clique; free time (hobbies, sport, games, radio, T.V., music, reading, meetings, parties, pets); idols; dreams.
- (iii) I and my surroundings: school (subjects, timetable, school day); neighbours; my street, my city / village, (means of transport, shops, shopping, post office) Information about the German-speaking countries will be integrated in such topics and their various aspects.

Areas, Roles and Places of Language Communication:

The lesson prepares the pupils for a reasonable amount of communication in the following areas:

Free time, school family, friends, services and for the use of German speaking mass media. Communicative language activity is realized at school, in public, on means of transport, on visits and on the road. The pupils reach their role competence as is described in the *Common European Framework for Languages* of the Council of Europe.

Language material:

(i) Phonetics

Quality and quantity of vowels, **A**-sounds, **E**-sounds, **Ü**-sounds. **Ö**-sounds, the murmuring vowel, **h** at the beginning of the word, **ich**-

sound, **ach**-sound, **ng**-sound, accentuation of the word, structure, sentence accent and melody.

(ii) Orthography

The alphabet, Aä, Oö, Uü, ei, ai, au, eu, äu, sp, st, ch, schg, tsch, ts, tz, chs, ng, ig, qu, ck, ss, β.

(iii) Lexis

Difference is to be made between a productive and a receptive vocabulary. The productive vocabulary comprises the basic vocabulary and the most common models of word-building, which are necessary for realising the above mentioned language interactivity in the parameters of the topics and their aspects already mentioned. The development of receptive skills presupposes and demands a receptive vocabulary that can be increased.

Credit III | Speaking:

15 Hrs

The pupils realize in their statements ways of speaking which are mentioned in the subsequent part entitled *Contents*.

- i. The pupils reproduce the phonetic and intonation pattern correctly.
- ii. The pupils ask and answer questions in connection with the themes and situations already dealt with.
- iii. The pupils participate in conversation with their teacher and / or with their classmates in the course of the lesson.
- iv. The pupils hold short conversations with one or several partners (known or unknown) in the sphere of the themes and situations already dealt with.
- v. The pupils make short telephone calls.
- vi. The pupils make short announcements in connection with themes already handled.
- vii. The pupils make use of appropriate patterns of behaviour (mimics, gesticulations, body distance or nearness, etc) during conversation.
- viii. The pupils can make use of the following strategies while speaking:
- they ask for and themselves provide additional / explanatory information.

- they signal lack of understanding and demand from their partner an appropriate reaction. - they direct the conversation according to their own interests and / or change the subject. - they make use of clichés in order, e.g., to cope more easily with situations in which they are under pressure of time. - they make use of paralinguistic means. Credit IV 15 Hrs Writing i. The pupils fill in tables with key words according to a text they have read or heard. ii. The pupils fill in easy forms, write greeting cards, invitations and short personal announcements. iii. The pupils lay down vocabulary cards according to a preset pattern. iv. The pupils write short texts to photos and pictures. v. The pupils make use of the following strategies while writing: - they employ preset patterns and examples with sense. - they use reference works for self correction of mistakes. Form 1 - Grammar o W-Frage: Wie heißen Sie? o Aussage: Ich heiße / Ich bin ... o Personalpronomen: ich, Sie, du o Verbkonjunktion (ich, Sie, du): heißen, kommen, sprechen, sein. o Präposition aus: Ich komme aus Finnland o Possessivartikel: mein / meine o Personalpronmen: er / sie, wir, ihr, sie o Verbkonjunktion: *leben*, *haben* ... o Preposition in: Sie leben in Helsinki. o Ja- / Nein-Frage: Kennen Sie ...? o Nullartikel: *Haben Sie Äpfel?* o Bestimmter Artikel: ein / eine

o Negativer Artikel: *kein / keine*

o Plural der Nomen: Tomaten, Eier,

o Verbkonjunktion: essen

o Bestimmter Artikel: der / die / das

o Lokale Adverbien: hier / dort

o Prädikatives Adjektiv: Sie ist schön.

o Personalpronomen: er / sie /es.

o Negation nicht: Das Bad ist nicht klein.

o Verbkonjugation: gefallen

o Trennbare Verben: Timo steht früh auf.

o Verbkonjugation: sehen, arbeiten.

o Verbposition im Satz

o Präpositionen am, um, von...bis: Am Sonntag um acht Uhr.

o Akkusativ: den Salat, einen Tee, keinen Saft.

o Ja- / Nein-Frage und Antwort: ja, nein, doch

o Verbkonjugation: lesen, treffen, schlafen, fahren, nehmen, "möchten"

o Modalverben: können, wollen

o Satzklammer: Ich kann nicht tanzen.

o Perfekt mit haben: hat...gelernt

o Perfekt mit sein: ist...gefahren

Form 2 – Topics:

o Beruf und Arbeit

Berufe benennen und erfragen.

Informationen über Vergangenheit und Gegenwart austauschen.

Von Ereignissen und Aktivitäten in der Vergangenheit berichten.

Praktikumsbörse: Anzeigen verstehen.

Ungewöhnliche Berufe.

Kurztexte verstehen.

o In einer fremden Stadt

Anweisungen geben / Abläufe erklären.

Anweisungen und Ratschläge geben.

Über Erlaubtes / Verbotenes und Regeln sprechen.

Informationsbroschüren verstehen.

An der Hotelrezeption: nachfragen, um Erklärungen und

Verständnishilfen bitten.

o Gesundheit

Körperteile benennen.

Über das Befinden sprechen.

Über das Befinden anderer sprechen.

Das Aussehen beschreiben.

Anweisungen und Ratschläge geben und verstehen.

Einen Brief (Anfrage) schreiben.

Einen Termin vereinbaren.

o In der Stadt unterwegs

Nach dem Weg fragen und den Weg beschrieben.

Verkehrsmittel benennen.

Ortsangaben machen.

Orte und Richtungen bestimmen.

Fahrpläne: Informationen entnehmen.

Durchsagen verstehen.

Am Bahnhof: um Auskunft bitten.

o Der Kunde ist König

Zeitangaben verstehen und machen.

Zeitliche Bezüge nennen.

Um Serviceleistungen bitten.

Höfliche Bitten und Aufforderungen ausdrücken.

Einen Informationstext verstehen.

Schriftliche Mitteilungen und Telefonansagen verstehen.

o Neue Kleider

Kleidungsstücke benennen und bewerten.

Gefallen / Missfallen ausdrücken.

Vorlieben und Bewertungen ausdrücken.

Einen Zeitungsartikel verstehen.

Vorlieben erfragen, eine Auswahl treffen.

Im Kaufhaus: um Hilfe / Rat bitten. o Feste Das Datum erfragen und nennen. Über Personen und Dinge sprechen. Gründe angeben. Einen Termin schriftlich absagen und zusagen. Einladungen lesen und schreiben. Feste nennen. Glückwünsche ausdrücken. Form 2 – Grammar: o Wortbildung Nomen: *der Lehrer* □ *die Lehrerein*; der Kaufmann □ die Kauffrau o Präteritum sein, haben: war, hatte o Modalpräposition als: Ich arbeite als Programmierer. o Temporale Präpositionen vor, seit für: vor einem Jahr. o Modalverben: müssen, dürfen. o Satzklammer: Sie müssen einen Tisch reservieren. o Pronomen man. o Imperativ: Gehen Sie zur Touristeninformation. o Possessivartikel: dein, sein, ihr, unser... o Modalverb sollen o Satzklammer: Wir sollen zu Hause bleiben. o Präposition mit: Ich fahre mit dem Auto. o Lokale Präpositionen an, auf, bei, hinter, in, neben, über, unter, vor, zwischen: *Wo...?* – *Auf dem Parkplatz.* o Lokale Präpositionen zu, nach, in: Wohin...? - Zum Buchladen. o Temporale Präpositionen vor, nach, bei, in: Wann...? - In einer Stunde. o Temporale Präpositionen bis, ab: Ab wann...? - Ab morgen. o Höflichkeitsform Konjunktiv II: würde, könnte. o Satzklammer: Könnten Sie bitte Kaffee kochen?

o Verben mit verschiedenen Präfixen: an-, aus-, auf-, zumachen.	
o Demonstrativpronomen der, die das: der Rock □ Der ist super!	
o Frageartikel welch-: Welches Hemd?	
o Demonstrativpronomen dies-: Dieses Hemd gefällt mir.	
o Komparation gut, gern, viel.	
o Verbkonjugation: <i>mögen</i> .	
o Personalpronomen im Dativ: mir, dir,	
o Verben mit Dativ: gefallen, gehören, passen, stehen.	
o Ordinalzahlen: der erste	
o Personalpronomen im Akkusativ: mich, dich	
o Konjunktion denn	
o Verbkonjugation: werden.	

• As per the A1 German Language norms.

CCPR	2-105 : Laboratory Course I	(120 Hrs)
	${f A}$	100 Marks
•	Computer basic knowledge; hardware, connection cables, typing, Windows 98/XP, search engines.	, Internet browsers,
•	LAN connections, setting up the IP address, network security. Internet surfing and information, downloading and installing software.	searching
•	Hands on session with Microsoft Word.	
•	Microsoft Excel (Spreadsheet Application).	
•	Hands on session with Microsoft Access (Database related applications).	
•	Creation of computer presentation with MS Power Point.	
•	Introduction to Oracle for creation of database.	
•	Introduction to literature database at NCBI and querying the PUBMED database us search engine.	sing the ENTREZ
•	Getting the amino acid sequences by exploring and querying the protein sequence	database.
•	Getting the gene sequences by exploring and querying the nucleic acid databases.	
•	Introduction to RCSB PDB database.	
•	3-D Protein structure visualization and measurement of bond length, bond angle an using graphics and command line RasMol.	d torsion angles
•	Analysis of Drug-receptor interactions using Chimera.	
	В	100Marks
•	Introduction to small drug molecule databases eg. PubChem, ZINC	
•	Similarity search using the Blast and interpretation of the results.	
•	Pair-wise and multiple sequence alignment by using ClustalW.	
•	Introduction of BioEdit.	
•	Protein Structure Prediction (Homology Modeling) using SPDBV.	
•	Model Building and Energy minimization.	
•	Calculation of molecular properties of drug molecules using SPARTAN.	
•	Introduction UNIX/LINUX commands.	
•	Data transfer; ping, telnet, ftp.	
•	Drug-receptor structure stability using molecular dynamics simulation with the help	p of GROMACS.
•	Molecular Docking and Drug designing by using AutoDock.	
•	Toxicity analysis using ADMET SAR online tool.	
•	Pharmacokinetic analysis of drug molecule using T.E.S.T	
•	QSAR analysis of drugs using T.E.S.T.	

AEC-106	Mandatory Non-CGPA compulsory Ability Enhancement Course	30 Hrs
---------	--	--------

SEMESTER II		
CC-201 : Research Methods and Statistics		60 Hrs
Credit I	Foundation of Research	15 Hrs
	 i) Characteristics of scientific Research, ii) Formulation of Research Problem, iii) Research Process, iv) Literature Review, v) Sampling, Data collection, Data Analysis, Report writing 	
Credit II	Research Design	15 Hrs
	 i) Concept and features of Research Design, ii) Types of Research Design, iii) Concept of cause and effect, iv) Correlation and Causation, v) Types of variables 	
Credit III	Hypothesis Testing	15 Hrs
	 i) Definition, ii) Research Hypothesis, iii) Statistical Hypothesis, iv) Qualities of Good Hypothesis, v) Hypothesis Testing 	
Credit IV	Data and Measurement and Statistical Data Analysis	15 Hrs
	 i) Measuring of Data, ii) Primary Data, Secondary data, iii) Measurement Techniques iv) Attitude Scaling Techniques v) Sampling types vi) Cleaning of data, Coding, editing vii) Tabular presentation of data viii)Frequency tables ix) Univariable Analysis x) Bivariable Analysis xi) Linear Regression Analysis xii) Test of Significance 	

- Epidemiological Research Methods (1996) Don McNeil. New York : John Wiley
- Epidemiology and Statistics for Public Health Research (2018). Broschiertes Buch. Lap Lambert Academic Publishing
- Medical Biostatistics 4th Edition (2017) Abhaya Indrayan, Rajeev Kumar Malhotra Chapman & Hall/CRC Biostatistics Series, CRC Press
- Principles of Biostatistics 2nd Edition (2018) Marcello Pagano, Kimberlee Gauvreau, CRC Press
- Biostatistics: The Bare Essentials, 3rd Edition (2007) Geoffrey R. Norman, David L. Streiner PMPH publishers USA

CC-202 : C	linical Data and Quality and Management	60 Hrs
Credit I	Introduction to Clinical Research	15 Hrs
	i) Introduction and features	
	ii) Outcome measures	
	iii) Responsibilities and study documents	
	iv) Ethics in Clinical Research	
Credit II	i) Introduction to GCP	15 Hrs
	ii) Role of Investigators	
	iii) Clinical Trial Protocol	
	iv) CRF (Case Report Format)	
	v) Informed consent	
Credit III	Regulatory Affairs i) CRF	15 Hrs
	ii) ICH Guidelines for Clinical Trials	
	iii) Documentation	
	iv) Pharmacovigilance and Clinical Trials	
	v) Drugs Approval Process	
Credit IV	Information Management in Hospitals	15 Hrs
	i) Necessity of Standards of electronic health	
	ii) Security issues	
	iii) Healthcare Information Regulations of Standardsiv) Health Record and Privacy	
	v) Health Level Standards – HL7	
	vi) Integrated Health Information Systems	
	Hospital Information Systems	
	i) Definition, Structure and Application	
	ii) System Advantages	
	iii) Nursing Informatics	
	iv) Automated Clinical laboratory Systems	
	v) Pharmacy Information Systems	
	vi) Electronic Health	

- Clinical Data Management 2nd Edition (2000) Richard K. Rondel, Sheila A. Varley, Colin F.
 Webb. Wiley publishers
- Principle and Practice of Clinical Research 4th edition (2017) John Gallin, Frederick
 Ognibene & Laura Lee Johnson. Elsevier academic press.
- Healthcare Information Management Systems Cases, Strategies, and Solutions. Ball, Marion J. Weaver, Charlotte A., Kiel, Joan M. 3rd edition (2004) Springer-Verlag New York

CC-203:	Clinical Quality Management	60Hrs
Credit I	Introduction to Quality Management i) Concept of Quality	15 Hrs
	ii) Quality Systems	
	iii) Quality Audits	
	iv) Quality Control, Quality Assurance,	
	v) Total Quality Management (TQM)	
Credit II	Quality Management Tools i) Site Level Quality Management	15 Hrs
	ii) Quality Management Data Review Tool	
	iii) Quality Management study wise Review Tool	
	iv) Quality Management Summary Report	
	v) Subject Record Review	
Credit III	Quality Assurance and Pharmacovigilance (PV) i) General Introduction of PV	15 Hrs
	ii) Principles of PV	
	iii) PV and selected organ clone	
	iv) Pharmacovigilance systems	
	v) Guidelines and laws governing PV	
Credit IV	Pharmacovigilance Global Perspectives i) Global PV and safety standards	15 Hrs
	ii) Global regulations and guidelines	
	iii) GCP/GMP/GLP guidelines for PV	
	iv) Global audits	
	Quality Management Indian Perspectives i) Epidemiology and Evidence Based Medicine	
	ii) Drug Regulatory Authority	
	iii) Guidelines for Pharmaceuticals	
	iv) Guidelines for Neutraceuticals, Cosmetics	
	v) Guidelines for Herbal and Alternative Medicine	

• A Practical Guide to Quality Management in Clinical Trial Research 1st Edition (2005) Graham Ogg. CRC Press

CC-204 : Clin	ical Data Management-I	60 Hrs
Credit I	Data Acquisition (DAQ) i) Importance of Data	15 Hrs
	ii) Data Storage	
	iii) Data Safety	
	iv) Role of Data in Public Health Politics	
	v) Data and Epidemiology studies	
Credit II	Clinical Data Management i) CDM Process	15 Hrs
	ii) Collection, Integration, and availability of Data	
	iii) Verification, Validation and quality control	
	iv) Software's for CDM	
	v) Clinical Trial Phase wise Data Management	
Credit III	CRF (Case Report Form) i) CRF and ECRF	15 Hrs
	ii) CRF Requirements ICH Guidelines	
	iii) ICH Guidelines	
	iv) Disease wise CRF	
	v) Comparative study of Indian and Global CRFs	
Credit IV	Document Management System i) HIS (Hospital Information Systems)	15 Hrs
	ii) Document Management and work Management systems	
	iii) Archiving Systems	
	iv) Clinical Trial Management Systems	
	v) PRO systems (Patient Reported Outcomes)	
	Hospital Management Systems in India	
	i) Present Scenario	
	ii) NABH Guidelines for QC and QA	
	iii) Role of HIS in Government Policy making	
	iv) Public Health and HIS	
	v) Private Hospital and HIS	

CCPR	2-205 : Laboratory Course II (Key Competencies) A	(120 Hrs) 100 Marks
•	Introduction to Didactics	
•	Different Didactic Skills	
•	Didactic Methodology	
•	Different models	
•	Role of counseling	
•	Counseling in clinical Trials	
•	Motivational interview	
•	Motivation and Psychology	
•	Seminar activities	
•	Types and Methods	
•	Case studies	
	В	100Marks
•	Basics of HRM	
•	Function of HRM	
•	Theories of HRM	
•	HRM in Clinical Trials	
•	HRM in Healthcare	
•	Role of HRM in corporate hospitals	
•	eHRM	
•	Software for eHRM	
•	Cost, Benefits Ratio of HRM	
•	CTMS	
•	ePro
